

Superintendent's Regulation – 1125-R

CONFIDENTIALITY OF SECURITY VIDEO

Approved upon Superintendent's Initials

6/19/13

Date

The Rochester City School District's security video images, including live and recorded images, implicate confidentiality concerns for our students and in many cases are subject to privacy afforded by the Family Educational Rights and Privacy Act ("FERPA").

If a security video or saved video image(s) constitutes an "education record" of a student, as defined by the FERPA:

1. It/they may be shown and/or provided to the student, if eligible under the FERPA, or the student's natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian;
2. It/they may not be shown or provided to any other requestor unless in accordance with a proper subpoena, warrant or court order; but
3. It/they may be shown and/or provided to first responding law enforcement and/or fire personnel in connection with a health or safety emergency.

If a security video or saved video image(s) does not constitute such an education record, it/they may be shown and copies provided in response to a request from a federal, state or local law enforcement agency in connection with an ongoing investigation or prosecution.

Disclosure of security video other than as stated above shall only be done as permitted in writing by the General Counsel for good cause shown.
