

## **Meeting 1 Minutes - Nov14, 2025**

### **Summary of High School Science Adoption Committee Meeting 1**

A committee has been formed that includes teachers, building administrators, community members, specialists, and the Director of Secondary Teaching & Learning/CTE, representing every region of the district. The committee will engage in a two-year process to recommend resources for high school science courses.

The focus is on recommending high school science instructional materials that meet standards and support all learners.

#### **Meeting Highlights:**

- Reviewed school board policy
- Discussed Washington State science standards (NGSS) and high school science graduation requirements.
- Review current science pathways and materials.
- Discussed foundational research and critical features of instructional materials.
- Used an interest-based process and discussion protocol to compile a list of interests that will be used to create a request for information (RFI) and evaluate materials.

The next meeting is scheduled for February 23, 2026.
