December

What We Are Learning

AG - Students are learning how to safely perform skills related to agricultural technology and mechanical systems, such as identifying common building tools, materials, and fasteners; and identifying and using tools, equipment, and personal protective equipment common to agricultural technology and mechanical systems.

Careers - Shout out to all the students for presenting their slideshow on their Pathway! Everyone did **AMAZING**! Students have begun working on their "My Future" Pennant Project.

Leadership - Students are learning the characteristics of effective leaders. They are investigating the different types of Leadership styles, which style they are and which style they work best under. Some Leadership classes will be playing "Santa's Elves" and responding to 2nd Graders' letters to Santa. They will then deliver the letters and have cookies and cocoa with them.

Tech Apps I - Students are discussing code for HTML and coding our own website. We have also started adding style to our sites!

Tech Apps II - Students will continue their work with Graphic Design Content.

Upcoming Events

12/4 - Wood shop project (AG)
12/5 - State LDE Contest (AG)
12/8 - Godley FFA Christmas Party
12/8-12/9 Leadership students will be visiting RB, Legacy and PV.
12/13 - Godley FFA Livestock Show
12/15 - CTE Poster Contest Begins (due by the end of finals for your class period)
December 16-18 - Semester Exams

Talk About Learning

AG - We are learning about PPE (personal protective equipment) used in a wood shop along with identifying common hand tools.

Careers - All students should know their High School Pathway and the career they want to pursue. They need to discuss this with their parents and discuss how they can accomplish this goal. Also, students should practice answering questions from their parents to get ready for our Mock Interviews!

Leadership - Please talk to your students about being positive role models to other students in the district by having integrity, honesty, positivity, and a good work ethic.

Tech Apps I - If students would like extra help/practice with coding they can work through the express course on code.org or could create their own games at scratch.mit.

Tech Apps II - Show your parents any of the applications we have studied on all of the Google Apps, Canva, Photopea, Tynker, etc.

Important Reminders

AG - Encourage students to complete activities related to agriculture outside the classroom.

Careers - We need magazines to do Vision boards, Map pencils, clipboards for traveling to the HS to take notes, 2 professional chairs to practice interviews, spiral notebooks for journaling, and poster boards.

Leadership- Would like help with cookie/snack donations for the trips to the elementary schools when they play Santa's Elves. Students can log into Quills through Dooley's RTI Google Classroom and work on ELA skills.

Tech Apps I & II are in need of pencils, Kleenex & hand sanitizer.
