Dropout Rates & Graduation Rates

- Dropout rates and graduation rates have reciprocity
- The District's dropout rate has historically been below those recorded for the state, the region, and many of our area districts

What is a dropout?

The State defines a dropout as a student who attends Grade 7-12 in a public school in a particular school year, does not return the following fall, is not expelled, and does not:

- graduate,
- receive a Texas Certificate of High School Equivalency (TxCHSE),
- continue school outside the public school system,
- begin college, or
- die.

The data that we will review today is the latest from the Texas Education Agency (TEA) and reflects our performance for student enrolled with us for the 2023-24 school year.

What is an annual dropout rate?

An annual dropout rate is the percentage of students who drop out of school during one school year.

$$\frac{\text{number of students who dropped out during the school year}}{\text{number of students enrolled during the school year}}$$

TEA calculates three annual dropout rates:

- Grades 7-8
- Grades 9-12
- Grades 7-12
