SCHOOL CLIMATE SURVEY

Prepared by:

Brianna Gray, M.S., Executive Director of Student Support Services

association of
ALASKA
school boards

CLIMATE SURVEYS

School Climate & Connectedness Survey (SCCS) – AASB offers Alaskan schools surveys for their students, staff, and families to measure:

- How students, staff and families view school climate.
- How connected students feel to adults and their peers.
- How connected staff feel to their peers and students.
- Social and emotional learning (SEL) skills.
- Observed risk behaviors at school and school events.
- Cultural Connectedness (cultural identity, cultural responsiveness/sensitivity, and instructional equity).
- Staff perceptions of Trauma-Informed Schools.
- How school climate is experienced by different sub-groups, such as race/ethnicity, gender, and grade level.
- Data trends over time.

SCCS's interactive survey platform makes survey administration, reporting, and analysis interactive and user-friendly. Participating districts have access to webinars and ongoing training support for the oversight of survey administration, as well as how to use the interactive platform and results to make data-informed decisions.

The School Climate & Connectedness Survey was developed by AASB and the American Institutes for Research (AIR).

CLIMATE SURVEYS

High-quality school climate data allows you to:

School climate surveys measure how students, staff, and families perceive the school environment, which has been shown to directly impact academic achievement, social and emotional development, and overall well-being. By understanding these perceptions, schools can strengthen relationships and create a positive, safe, and connected learning community.
