

TEST COMBINATIONS FOR 2025-26 TEI ACHIEVEMENT STATISTICS

Test combinations are preliminary. (December 1, 2025)

For the Classroom Effectiveness Index (CEI) and Academic Peer Group (APG), each current test has required scores from one or two tests from the prior school year. For more information on how scores from the prior school year are used in calculations, refer to the TEI rulebook available from the TEI resources page at <https://tei.dallasisd.org>.

Classroom Effectiveness Index: Students must have both required test scores from the prior year to be eligible for inclusion in a teacher’s CEI statistic. Some current tests have more than one pair of prior-year tests that can be used in modeling. Only one combination will be considered for a student. The first option listed is the first one selected. If scores are not available from that combination of assessment in the prior year, the next option is selected, and so on.

Academic Peer Group: Students must have the required test score from the prior year to be eligible for inclusion in a teacher’s APG statistic. Some current tests have more than one possible required test from the prior year that can be used in modeling. Only one score from a prior-year test will be considered for a student. The first option listed is the first one selected. If no score is available from that assessment in the prior year, the next option is selected, and so on.

Grade levels: An entry of “*” in the Grade column indicates the grade level of the assessment is not relevant to the statistic or the assessment has no grade level.

i-Ready: For TEI achievement statistics, only i-Ready scores are used. Any reference to “i-Ready” in this document refers to the i-Ready assessment. ENG=English; SPN=Spanish.

STAAR Science and STAAR Mathematics: English and Spanish scores are combined.
