

RUGBY SCHOOL THAILAND

SUPPORT FOR LEARNING POLICY

THE WHOLE PERSON THE WHOLE POINT

The health, safety and well-being of young people are of paramount importance to all the adults who work at Rugby School Thailand. Children have the right to protection, regardless of age, gender, race, culture, sexual orientation, or disability. They have a right to be safe in our school. Members of staff in the school have a legal and moral obligation to safeguard and promote the welfare of the pupils, taking all reasonable steps to protect them from harm whether from physical injury, abuse, neglect, emotional harm or from anything that interferes with their general development.

“If a child can’t learn the way we teach, maybe we should teach the way they learn.”

– Ignacio Estrada

1. INTRODUCTION

Our Definition of Support for Learning:

At RST our approach to support is comprehensive, recognising that a student's learning profile is unique and can be influenced by a variety of factors. We provide targeted support across five key areas of need:

- **Cognitive and Learning Needs** This category includes students who may have challenges with specific academic skills.
 - **Specific Learning Difficulties:** Such as **dyslexia** (reading and spelling), **dyscalculia** (math), or **dyspraxia** (motor skills).
 - **General Learning Difficulties:** Students who require a modified pace or a different approach to the curriculum.
 - **Cognitive Processing Challenges:** Difficulties with memory, attention, or executive function.
- **Communication and Interaction Needs** This focuses on students who require support to communicate effectively or to interact socially.
 - **English as an Additional Language (EAL):** Students who are new to English or who need additional language support to access the curriculum and thrive socially. (Please refer to separate EAL policy)
 - **Speech and Language Difficulties:** Students with speech sounds, language comprehension, or expressive language challenges.
 - **Social Communication:** Challenges with social skills, understanding social cues, or forming peer relationships.
- **Social, Emotional, and Mental Health (SEMH) Needs** This covers students who need support to manage their emotions and relationships.
 - **Anxiety and Stress:** Students who struggle with anxiety, stress, or low self-esteem, which may impact their learning.
 - **Emotional Regulation:** Difficulties in understanding and managing strong emotions.
 - **Mental Health Conditions:** Students with diagnosed or suspected mental health needs.
- **Physical and Sensory Needs** This category includes students with physical disabilities or sensory impairments.
 - **Sensory Impairments:** Visual or hearing difficulties that require accommodations.
 - **Physical Disabilities:** Mobility challenges or medical conditions that impact physical functioning.
 - **Medical Needs:** Students with health conditions that require specific support in the school environment.
- **Exceptionalities** We also support students with abilities that go beyond age-related expectations.

- **High Learning Potential:** Students with exceptional academic, creative, or athletic abilities who require extension and enrichment opportunities.
- 1.1. We are guided in this approach by the UK Children and Families Act (2014) and the SEND Code of Practice 2015 (updated 2020). The 2008 Education Act for Persons with Disabilities also promotes inclusive education in Thailand.
 - 1.2. By following educational best practices, as reflected in both the British national standards and Thailand education laws, we use a support for learning approach that integrates assessment and intervention -support- within the teaching and learning cycle. We focus on identifying need, using collaborative consultation and working with pupils within their educational contexts and inclusive environments to enhance their learning.
 - 1.3. Our School community benefits from the participation of our culturally, linguistically, neurologically, and academically diverse pupils

2. HIGH-QUALITY TEACHING AND GRADUATED APPROACH

At RST we recognise that children enter our School at different stages of learning, and that specific needs are often not identified before joining the School.

The Graduated Approach to Support (Waves of Intervention)

We use a graduated, tiered approach to ensure support is a continuous cycle of planning, action, and review.

- **Wave 1: Universal Support** This is high-quality, differentiated teaching provided to all students in the classroom. All teachers use strategies to meet a wide range of needs, ensuring lessons are accessible and engaging for everyone. This includes using a variety of teaching methods, providing visual aids, and offering choice in how students demonstrate their understanding.
- **Wave 2: Targeted Support** If a student requires more specific help, they will receive targeted support, often in a small group setting. This may be for a specific skill, such as phonics, number recognition, or developing fluency in English. These sessions are planned and delivered by the class teacher or a specialist support teacher.
- **Wave 3: Specialist Support** For students with more significant or long-term needs, we create an **Individualised Education Plan (IEP)**. This plan is developed in partnership with parents and outlines specific, measurable goals. Support is provided through one-on-one sessions, specialist interventions, or a combination of in-class and withdrawal support. We collaborate with external specialists (e.g., educational psychologists, speech and language therapists) to ensure a holistic approach.

- 2.1. In line with UK national standards, our aim is always towards identifying the least intrusive yet most effective support. Parents and students are consulted and informed throughout the process.

3. ASSESSMENT FOR SUPPORT

Assessment principles

- 3.1. Our assessment process follows RTI principles in identifying students' needs for support, having multiple levels of support (see Waves of Intervention) and progress monitoring to have accurate data of a student's baseline (starting point), and in what areas they are making progress, and where they may still have challenges that need to be addressed. In carrying out such assessments, Rugby School Thailand uses a set of principles of good practice.
 - Assessments are in accord with English legislation, national guidance and recognised good practice in education. They take into account student's multilingual and cultural backgrounds.
 - The aims and purposes of individual assessments are agreed between the main contributors (including parents and where appropriate, the student) with a view to the best interest of the student.
 - Assessment is incorporated within the teaching and learning cycle wherever possible.
 - Assessment is needs-based, context related and relevant to the presenting problems in education, and to the student.
 - Assessment aims at understanding the learning process, the child's interaction with it, and assisting and informing teachers with suitable teaching strategies.
 - Assessment contributions are made from knowledge about and understanding of the student and the effects of different School contexts.
 - Assessments are prospective in nature; that is, of use in planning intervention.
 - Assessment is a joint process between all teachers and other staff, parents and students.
 - The primary assessors are those adults working most closely with the child or young person in everyday situations.
 - The School values all relevant contributions in their information gathering.
 - Educational assessment is a School-led collaborative process.
 - Assessment information is derived from samples of work, behaviour, or social interaction; from the experiences of those directly involved with the student in everyday situations; from focused, one-to-one assessments of performance.

In class/whole school testing-Prep

- 3.2. For teacher-created and whole year end of term testing, where it is deemed necessary, some students may have access to readers/scribes and adult prompting. These accommodations may be provided by any trained staff.

Standardised or normative testing

- 3.3. These are tests which compare the performance of an individual student with the average performance of same-aged peers. These are only one piece of evidence to tell us more about a student's strengths and challenges.

- 3.4. Such tests can, where appropriate, provide supplementary information to the core assessment in individual cases, particularly where they allow a structured examination of particular skills. Where deemed potentially useful, such additional information will be obtained. Currently, there are whole School assessments, such as CEM, MidYIS, YELIS and ALIS being used to evaluate student progress and placement. Assessments for the purpose of determining individual student areas of need are not included in the tuition, and are seen as an additional service. Charges and descriptions of available assessments are included in Section 9. Students may also be referred to an outside agency for assessment, at the family's cost.

Exam Access Arrangements

- 3.5. For some access arrangements in examinations, standardised test results may be required as part of the evidence. Please see the next section for additional information regarding Exam Access Arrangements.

Pre-Prep and Early Years

- 3.6. In Pre-Prep and EYFS in addition to the formal checks, early years practitioners working with children should monitor and review the progress and development of all children throughout the early years. Where a child appears to be behind age-related expectation, or where a child's progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, practitioner observations and from any more detailed assessment of the child's needs. From within the setting, practitioners should particularly consider information on a child's progress in communication and language, physical development and personal, social and emotional development. Where any specialist advice has been sought from beyond the setting, this should also inform decisions about whether or not a child has SEND. All the information should be brought together with the observations of parents/carers and considered with them.
- 3.7. It is particularly important in the early years that there is no delay in making any necessary special educational provision. Delay at this stage can give rise to learning difficulty and subsequently to loss of self-esteem, frustration in learning and to behaviour difficulties. Early action to address identified needs is critical to the future progress and improved outcomes that are essential in helping the child to prepare for adult life.
- 3.8. Identifying and assessing SEND for young children whose first language is not English requires particular care. Early years practitioners should look carefully at all aspects of a child's learning and development to establish whether any delay is related to learning English as an additional language or if it arises from SEN or disability. Difficulties related solely to learning English as an additional language are not SEND.

Assessment support from outside the School

- 3.9. Some students may have recognised and diagnosed medical conditions that have consequences for their performance in education. Rugby School Thailand welcomes any information that can be provided in respect of these student's medical or para-medical needs. In respect of student's educational or support for learning needs, the most appropriate form of external advice is normally from educational psychologists. Such specialists may be asked to contribute where,

- particular information is not otherwise available

- skills and knowledge are required which other contributors to the educational assessment feel they do not have
 - there is some uncertainty or specific concern about a student's performance.
- 3.10. Although in the majority of cases the detailed involvement of an educational psychologist is neither necessary nor legally required, we may use such services in a general and consultative capacity. There is no involvement from an educational psychologist around named individual students without the prior agreement of parents.

4. EXAM ACCESS ARRANGEMENTS

Specific to Y10 and above

- 4.1. The procedures in respect of these special arrangements are the subject of a separate practice guideline overseen by the [Joint Council of Qualifications](#) (JCQ), which is composed of AQA, City and Guilds, CCEA, NCFE, OCR, Pearson, SQA and WJEC, the largest providers of qualifications and [Cambridge International Examinations](#) (CAIE). For students to receive access arrangements in examinations, Rugby School, Thailand needs to demonstrate via standardised testing and/or classroom practice that a student needs the arrangement/s in order to effectively access the test to the best of their ability. Final approval is made by the College Exam boards based on the documentation provided. Primarily, Rugby School Thailand students are taking exams via Oxford AQA (International), AQA, Pearson Edexcel (UK and International) and CAIE. Approval requests for Exam Access Arrangements must be made to each College Exam Board through which the student is taking an examination. Some may have slightly different requirements, so it is possible to receive an approved Exam Access Arrangement through one board, but not through another.
- 4.2. Decisions are based on a student's normal way of working (classroom practice), assessor's information, and the requirements of the subject they are taking.
- 4.3. Students do not have to have a recognised learning disability to receive Exam Access Arrangements. Conversely, having a recognised learning disability, such as "dyslexia" does not automatically qualify a student for Exam Access Arrangements.

Outside Assessment

- 4.4. An outside assessment from an educational psychologist or diagnostician cannot be used to award Exam Access Arrangements without prior consultation with the School. Parents must discuss this with the School, if they are planning to carry out an independent assessment. Section 9 includes a description of inhouse assessments available through Rugby School Thailand and their charges.
- 4.5. Assessors must be recognised by the Joint Council of Qualifications in order for an assessment to be valid. This means that they have completed a recognised course in the UK (equivalent to Level 7 and including at least 100 hours of individual specialist assessment), have received the SpLD Assessment Practicing Certificate (APC) or are a licensed educational psychologist registered with Health and Care Professions Council (HCPC).

Exam Access Arrangements

- 4.6. may be provided for teacher created and whole year end of term tests, as well as College Exam Boards at both Prep and Senior School level. Students may qualify for one or more Exam Access Arrangements. Parents and students will be notified prior to exams of which Exam Access Arrangements they have been qualified and approved for.
- 4.7. Available exam access arrangements include, but not limited to:
 - a. Extra time (typically 25%)
 - b. A human or computer reader/reading pen
 - c. A human scribe
 - d. Word processing (either with or without spelling/grammar checks)
 - e. Other assistive software, such as voice recognition (speech to text)
 - f. Exam papers printed on coloured paper
 - g. Additional, supervised rest breaks
 - h. Bilingual dictionary
 - i. Separate room for testing (individual testing)

Course Exam Access Arrangements

- 4.8. Any Exam Access Arrangements on College Board Exams should mirror what is happening in the classroom during coursework and teacher/unit exams. For example, if a student needs extra time, they should be receiving extra time on class exams or a shortened exam that they can finish within the allotted time. If they have difficulty with handwriting, they should be allowed to submit coursework and test papers via a word-processing document. If they are requesting coloured paper for exams, they should be using a similarly coloured paper or colour overlay in class.

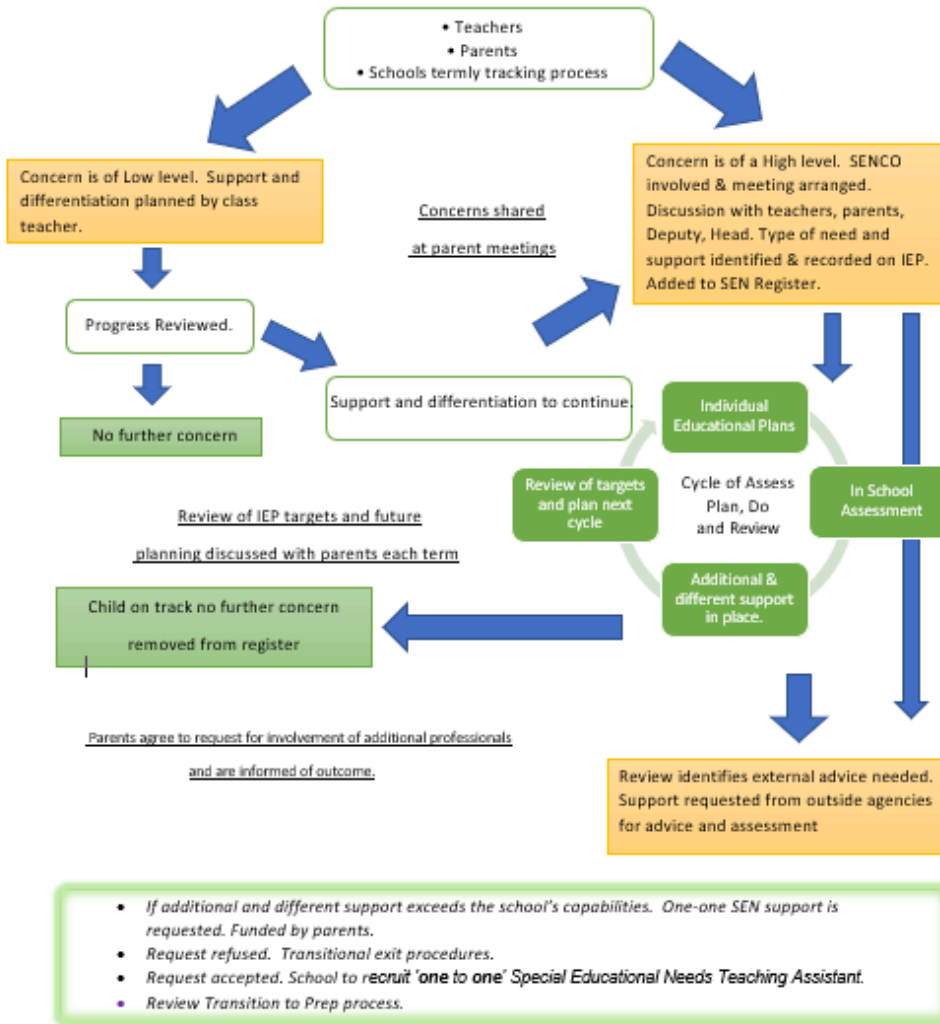

5. REFERRAL FOR SUPPORT

Referral for Additional Support

- 5.1. As outlined earlier, one of the primary aims of our assessment process is to help identify action that might be taken in order to promote students' learning in the classroom. Like the assessment, the support is focused on observable and remediable learning problems and is related to the School's capabilities.
- 5.2. While students are often referred to Support for Learning by other staff members, parents are also welcome to contact Rugby School Thailand any time they have a concern about their child's progress and to inform us of any temporary conditions that may need support.

RST SEN Support and Identification

Information collected and concerns identified by: -

Created by Hannah O'Brien

Note: Currently 1-1 aide support is only currently available as a paid option at the Pre-Prep level. This is not offered at Prep or Senior.

6. INDIVIDUAL EDUCATION PLANS (IEPs)

Plan Co-ordinator

6.1. The IEP is a summary means of reviewing a student's progress. An important feature of this structure is the requirement for a coordinator or key worker to be identified for each student with an IEP. This is the person in the School most relevant to the individual characteristics of each case. In most instances, this will be a member of SfL staff, but it could be a class teacher. The co-ordinator's function is to monitor the implementation of the plan, maintain records, and arrange and chair review meetings.

- 6.2. All students at Rugby School Thailand who are receiving individualised support will have a file which is kept securely by Support for Learning staff (see **Confidential Documents** below). Students may be on a programme of individual short-term targets; progress will be monitored throughout the term and the targets reviewed and updated in consultation with the class teacher, parents and student (at the discretion of the Head of SfL) each term.

Review meetings and Short term targets

- 6.3. Main review meetings are generally held once a term. All main contributors, including parents, are invited to attend. Contributions can be made in person or in writing. Where deemed appropriate, the student may also be invited. Between main reviews, School staff will consult and make any necessary changes as they go along. Where there are major developments, the coordinator will arrange an additional main review or otherwise inform parents and other primary contributors. The majority of students at Rugby School Thailand are not in the review system. Many students, however, will have an individual programme of short-term targets. This will be drawn up each term in consultation with the student's class teacher and discussed with the parents and, at the discretion of the SfL teacher, with the student.

Timetable changes

- 6.4. Students receiving Support for Learning services may have adjustments to their timetable to meet their needs. This may include withdrawing from courses (such as additional languages, electives), and/or lower number of IGCSEs taken.

7. PARENT AND STUDENT INVOLVEMENT

- 7.1. We aim wherever possible for the full involvement of our students and their parents in any processes that affect their learning, including attendance at review meetings. Older students are usually able to make their own decisions about this. For younger students, certain types of involvement can be baffling or stressful and possibly counter-productive. Where such difficulties can be anticipated, adults should make informed decisions on behalf of the student. Any relevant student views can be obtained in more informal settings and represented at the meeting. One of the more formal ways in which this may be achieved with some students is to fill in a questionnaire.
- 7.2. Parents will be asked for their input when target setting and reviewing targets. They will also be asked when necessary to complete screeners from a parental perspective and share with the school to help gain a more rounded understanding of a child.
- 7.3. Progress will be shared with parents at the end of every term through written reports, Parent Teacher Consultations and scheduled meetings. In Pre-prep parents will also receive updates via email every three to four weeks.
- 7.4. Communication and collaboration with parents is seen as a vital element of the Sfl process and essential to the success of any support.

8. INFORMATION FROM PROFESSIONALS OUTSIDE THE SCHOOL

- 8.1. Rugby School Thailand welcomes all relevant information about students who may need additional support for learning. Some professional contributors may not be able to attend review meetings.

In order to obtain their views from their own areas of expertise, we may ask them a copy of their report or documentation. We may also request them to fill out a questionnaire to update us on goals and progress or current status.

Confidential Documents

- 8.2. Documents that reference a student's medical condition, diagnosis, and/or individual learning plan are considered confidential documents and must be protected. It is the responsibility of Support for Learning team members to control access to these documents so that they are kept safe, but accessible to those staff members who have a need to know the information.
- 8.3. All students at Rugby School Thailand who are receiving individualised support will have a file which is kept securely by Support for Learning staff. On the School Google drive, accessible by teaching staff only, for students with diagnosed specific learning difficulties or receiving any kind of support, there will be individual specific notes for staff.
- 8.4. Parents should be given copies of students' support documents, but can also request copies at any time from their plan coordinator or campus Head of SFL.

9. ADDITIONAL CHARGES

- 9.1. Rugby School Thailand's Support for Learning Department, staffed by qualified specialists, is able to provide 1-to-1 or small group support. The Support for Learning Department is fully resourced and supports children with mild to moderate special educational needs. This will be in addition to support from class or subject teachers, or from Teaching Assistants. Our professionalism and our small class sizes ensure that individual care and attention is standard. Any support provided by our Support for Learning Department, or withdrawal from such support, will be discussed and agreed between parents and School in advance. Half a term's notice is required for withdrawal unless otherwise agreed by the School.
- 9.2. Charges for additional support are as follows:
 - Classroom support from the teacher and/or TA – **no charge**
 - 1-to-1 assistance from classroom TA during class (e.g. reading) – **no charge**
- 9.3 Charges for additional support for PRE-PREP SCHOOL
 - If a need for one-to-one aide support is identified, parents will pay additional charges for the hiring of a teacher assistant. Charges will vary due to need and hours and will be determined on a case-by-case basis.
 - 1-1 aide support is not reflected in the fees chart below.
 - 1-1 aide support is not currently available at other campuses within RST.
 - Students who are in need of additional support will be placed on one of the levels reflected in the chart below, based on their level of need.
 - All charges are billed termly.
- 9.3. Charges for additional support for PREP and SENIOR SCHOOL
 - The School may offer levels of support to students who require SFL support to access our curriculum effectively. This is charged per student, termly as follows:

Level	Hours Per Week	Per Term (THB)
One	One or Below (Pre-Prep Only)	5,500
Two	One to Two	11,000
Three	Three to Four	22,000
Four	Intensive (Pre-Prep) & Five Plus (Prep)	33,000

- 9.4. Children will join with others only by agreement with parents, and only if learning needs and age are sufficiently similar.
- 9.5. Outside Specialists brought in as independent contractors by the School, such as Speech/Language Pathologists and Occupational Therapists will set their own fees and billing will be direct from them.
- 9.6. Additional charges for inhouse assessments

Service Type	Description	<u>Length</u> 2 hours
1. <u>Screening Consult</u> <ul style="list-style-type: none"> • Observations • Consultations • Verbal Feedback • Email Summary 	This includes an in-school 1 hour observation and 1 hour consultation with teachers and/or parents with verbal feedback and advice. A summary is emailed to both school and parent.	<u>Investment</u> Included with school tuition
<p>A Screening Consult includes a 1 hour observation of your child at School. The main purpose of this is to determine whether a child needs further assessment and is especially helpful for parents/teachers who are not quite sure if a full cognitive assessment/well-being/autism assessment is needed. Included is a one-hour consultation where concerns are shared and next steps discussed. The evaluation is completed with a brief email to both parent and teacher, detailing the agreed actions and findings which may include further assessment, monitoring, or no action required.</p>		

Service Type	Description	<u>Length</u> 3-5 hours
2. <u>Dyspraxia/Developmental Coordination Assessment</u> (5-10) <ul style="list-style-type: none"> • Observations • Evaluation using standardized tools 	This includes an in-school 1 hour observation, 1-2 hour evaluation using standardised tool(s), and 1 hour consultation with teachers and/or parents with verbal feedback and advice. A report, including	<u>Investment</u> 5000 baht

<ul style="list-style-type: none"> • Parent questionnaire • Consultation • Emailed report 	recommendations, is emailed to both School and parent.	
<p>A Dyspraxia Consult includes a 1 hour observation of your child at School, and a 1-2 hour evaluation using standardised tool(s) to assess visual motor integration and adaptive skills. A parent questionnaire will be sent home to cross reference with the observation and assessment results. Included is a one-hour consultation where concerns are shared and next steps discussed. The evaluation is completed with an emailed report summarising results, detailing recommendations for home and School and any agreed upon actions/next steps.</p>		

Service Type	Description	Length
<p>3. <u>Developmental Assessment Report</u></p> <ul style="list-style-type: none"> • Questionnaires and measures • Emailed report with recommendations and strategies 	<p>This includes individual work with the pupil at school, completing a wide range of questionnaires and measures.</p> <p>Followed by a summary of results with recommendations and strategies to parents and teachers.</p>	<p>2 hours with student, plus scoring and writing the report.</p> <p><u>Investment</u> 10000 THB</p>
<p>A Developmental Assessment Report includes individual work with the child or young person, completing a wide range of questionnaires and measures, completed in one visit. These are then scored and formulation provided, along with strategies for intervention. This is emailed to parents and teacher. The main purpose of this is to gather well-being data (social/emotional/behavioural) about a child. It is especially helpful for parents / teachers who are in need of data to inform their well-being support or therapy /counselling for a child.</p>		

Service Type	Description	Length
<p>4. <u>Exam Access Arrangements Report</u></p> <p>Ages 11-20</p> <p>A range of assessments needed for scoring and evidence of exam access arrangements, including:</p> <ul style="list-style-type: none"> • Spelling (WIAT III-UK-T) • Word Reading (WIAT III-UK-T) • Processing Speed • Working Memory • Handwriting Speed • If needed, cognitive IQ assessment for comparison • Emailed report with recommendations and strategies 	<p>This includes individual work with the child or young person (2-4 hours) in their school completing a specific range of assessment measures.</p> <p>Followed by a summary of results emailed to parents and teacher.</p>	<p>2-4 hours with student, plus scoring and writing/emailing the report.</p> <p><u>Investment</u> 15000 THB</p>

An Exam Access Assessment Report includes individual work with the child or young person, completing a wide range of assessments completed in one visit. These are then scored and presented in a report which is emailed to parents and teachers. The main purpose of this is to gather data to present to examination boards for exam access arrangements.

Service Type	Description	
<p>5. <u>Autism Assessment</u> Ages 2-20</p> <ul style="list-style-type: none"> • ADI-R interview with parent/s (2 hours, audio recorded, no children should be present). • Cognitive (IQ) assessment with the child / young person (1.5 hours) • When necessary, additional questionnaires for parent/s and school teams. • This data is then used to identify or rule out Autism. 	<p>This includes individual work with the pupil at school completing a specific range of assessment measures. Also included is a 2 hour interview with the parents. Followed by a summary of results emailed to parents and teachers.</p>	<p><u>Length</u> 1-3 hours with student 2 hours with parents Written report Followup meeting to discuss results</p> <p><u>Investment</u> 20000 THB</p>

Service Type	Description	
<p>6. <u>Full Assessment- Cognitive, Achievement and Phonological</u> Ages 5-20</p> <ul style="list-style-type: none"> • Cognitive IQ assessment • Observation • Joint consultation with parents and teacher(s) • Writing/Spelling • Reading • Phonological Assessment • Listening Comprehension • Math <p>Emailed report with recommendations and strategies</p>	<p>This service CAN be used for the diagnosis of learning difficulties, dysgraphia, dyslexia or dyscalculia.</p>	<p><u>Length</u> up to 8 hours including time with student, plus scoring and writing/emailing the report.</p> <p><u>Investment</u> 25000 THB</p>

This includes individual work with the child or young person (up to 5 hours) in school completing cognitive, phonological and achievement assessments along with a 30-40 minute observation and 1-hour joint consultation with parent/s and teacher.

10. CONTINUING PROFESSIONAL DEVELOPMENT

10.1 Rugby School Thailand is deeply committed to the ongoing professional development (CPD) of all staff, particularly in the area of Support for Learning. This commitment ensures our teachers are equipped with the latest evidence-based strategies to meet the diverse needs of every student.

10.2 Our staff engage in regular CPD sessions and workshops, which are delivered by our own specialist Support for Learning team and where possible external experts who bring in the latest research and best practices. For new teachers, this commitment begins with a comprehensive induction process where they receive a full overview of our support systems assisted by the Support for Learning team.

10.3 To ensure seamless transitions, we have a structured handover process where detailed student profiles and support strategies are shared with new teachers and year groups. All class teachers are given secure access to their students' individual support plans, enabling them to confidently implement strategies and track progress. This collaborative approach, combined with continuous training on topics such as differentiated instruction, supporting students with dyslexia and ADHD, and effective EAL strategies, guarantees that every student at Rugby School Thailand receives the targeted, high-quality support they need to thrive. This collaborative approach, combined with continuous training on topics such as differentiated instruction, supporting students with dyslexia and ADHD, and effective EAL strategies, guarantees that every student at Rugby School Thailand receives the targeted, high-quality support they need to thrive.
