Purpose -

The purpose of the District Assessment Plan is to provide students, teachers, district leaders, parents, community members, school board members with accurate, reliable, and valid data that may be used to:

- Promote assessment literacy through the district and community
- Serve as a communication tool
- Ensure alignment of district curriculum with state standards
- Inform purchasing decisions through the district
- Inform teacher professional development
- Improve student learning
- Evaluate the college and career readiness of our students
- Measure student growth
- Provide accountability for the district's stakeholders

This plan was developed as part of the Warrior Run School District's ongoing development of a comprehensive plan for the district. It is a working document that will continue to be updated as the district's needs change.

Assessment Data Usage -

The use of data from assessments is an ongoing process and the timing and delivery of assessment changes based on the type. The image below demonstrates the frequency, type and timing of these different types of assessment.

Progress Checks and Monitoring -

Following each of the major assessments, teams of teachers, specialists and leadership team members will gather to determine the needs of students and group accordingly. Please see the teams and their data points and dates below.

Resources -

The following is a list of resources that are used throughout the district to aid in assessment procedures. As assessment is ongoing for the sake of growth and mastery, this list provides a snapshot and should not be considered exhaustive. Best practices in assessment allow for continual adjustments based on the needs and performance of the students at any given time in any given class. The assessments listed above are excluded from this list.

Resource	Purpose	Users	How Results are Used
IXL	Regular check in on the mastery of students toward a particular skill or concept through exposure to questions that would appear on	K-8 Teachers	Teachers review the results by student and by class to see how students are doing and what skills need to be remediated.

	state assessments.		
SAS Portal Assessment Builder	Teachers can access released items, samples from prior assessments, organized by standards in the SAS Portal from PDE.	K-12 Teachers	When used with students, this aids teachers in assisting students with test taking skills and what to expect on state assessments.
Intervention Programs including WonderWorks and Read Naturally	Due to a need for more intensive support in order to master a skill, the students receive additional time working with a program chosen by district teachers or reading specialists.	K-6 ELA or Special Ed Teachers	Based on the response to intervention, further diagnoses of a student's individual needs are recommended.
Get More Math	Students can complete modules created by their teacher based on the content that was just taught, and then they are taken to complete a mixed review which spirals back to content that they saw previously in the course.	5-12 Math Teachers	Teachers can see what students are working on, how they are performing, and can also see which students need help or are off-task.
Digital Formative Assessments - Kahoot!, Quizizz, Formative, Gimkit, Blooket	Teachers use these as formative assessments in class to check for understanding of a concept. They are usually game-based and engaging for students.	K-12 Teachers	Teachers can see reports that indicate which questions each student got right or wrong.
