

Grade 7
Exploring Technology

Exploring Technology is a 45 Day Program—Meets 3 Class Periods per 6-Day Cycle *(Half Year Course)*

- This computer-based course will reinforce basic keyboarding skills, demonstrate proficiency in Google Applications and explore an introduction to video production.
- This course is designed to encourage and enable students to feel comfortable using a Chromebook.
- Computer application experiences will acquaint students with the organization and functions of evolving technologies.
- Students will explore and apply software application tools that they can utilize in core area classes.
- Using a problem-based learning approach, students will be engaged in interdisciplinary activities that are meaningful and authentic.
- The curriculum includes objectives to enable students to understand the societal uses and impact of technology in today's school, living habits, and workplace.
