

Dear Veteran,

My name is Anna, I am extremely grateful for your service. Because of military members like you, our freedoms are protected, and for that, I respect everyone who helped. I hope for the future, I try to not take my freedoms for granted as much as I have in the past. I am glad to feel safer and free because of everything people like you have done. Your service is important to me personally because my Grandpa, was in the army along with lots of others in my family, and he tells stories and explains hardships, and the stories help open my eyes to see the importance of the service military members provide. I hope your legacy is carried out well as much as other legacies are respected in my family. I am incredibly grateful for the freedoms I am free to enjoy and experience because of your services. My personal beliefs inspire me to be thankful for your sacrifices because you are protecting our freedoms and country, you have made sacrifice after sacrifice to keep our nation safe. I often think about time and how to use it best, you have used your time to help protect our Country, that fills me with respect for everyone who has done that. I am so grateful that younger generations will get to learn about the military and sacrifices that have been made to keep them safe and I genuinely hope they are grateful and safe in the future. You are truly appreciated, and I hope this letter brings you encouragement. I hope you wear your title as a veteran with absolute pride and the feeling of accomplishment, all of America is thankful for you. I honestly can't thank you enough or express my gratitude towards you, you have made the world safer for both past, present, and future generations. I am glad we have holidays where veterans can be respected even more than they do already. You should feel glory as long as you live, there is no time limit of how long you should be recognized and appreciated. I want you to know you are taken seriously, you are respected, you are important, you are a million other great things, most importantly, you are loved.

Anna K.
