

DJM ECOLOGICAL SERVICES SUMMER INTERNSHIP

ABOUT DJM

DJM Ecological Services specializes in the installation, maintenance and restoration of native plant communities. DJM has restored ecosystems throughout the Midwest including prairies, wetlands, glades, savannas, and woodlands. Additionally, we are recognized for our expertise specific to the development of green infrastructure utilized to control and treat storm water.

Areas of proficiency include Ecological Consulting, Environmental Contracting, Natural Areas Management, Custom Seed & Plant Propagation, Prescribed Fire, Sustainable Landscape Installation, Urban Forestry, Vegetated Infrastructure, Permitted Stormwater Facilities, Timber Stand Improvement, and Invasive Species Control.

POSITION SUMMARY:

Summer Interns will participate in a variety of projects. The variability offers great experience specific to restoration techniques, plant identification, and natural areas management concepts. Work proceeds in variable weather conditions, on difficult and hazardous terrain, and under physically demanding circumstances.
