Executive Summary

The Castilleja TDM Monitoring Report fulfills the Condition of Approval ("COA") requirement related to monitoring the number of trips and travel conditions to and from Castilleja. The key findings are listed below:

- Castilleja's Final TDM Plan was submitted by the School and approved by the City of Palo Alto in 2023 in accordance with the City's COA 20. The intent of the plan is to reduce the AM peak hour and daily vehicle trips, and parking demand at the School to ensure compliance with the COA.
- For the Fall 2025 monitoring period, there were 914 average weekday (Monday to Friday) daily trips while school was in session and 556 average daily trips while summer camp was in session. Both averages are below the trip cap of 1,198 daily trips. During the school session, there were 295 average AM peak hour[1] trips and during the camp session there were 255 average AM peak hour trips. Both AM peak hour averages are below the trip cap of 383.
- For the Fall 2025 monitoring period, during the 7:00 AM – 9:00 AM arrival period, the mode split while school was in session was as follows:
    - 64 percent of all students used alternative transportation modes (bike, walk, school bus/shuttle, and carpool).
        - 40 percent of all students used the School's Caltrain shuttle or school buses to get to campus.
        - 10 percent of all students walked to campus.
        - 5 percent of all students rode bicycles to campus.
        - 9 percent of all students carpooled to school and were dropped off by a parent or guardian.

Parking demand at the School was determined based on the combined peak occupancy of the three on-campus parking lots and street frontages bordering the School. The total parking supply in Fall 2025 was 104 spaces. There are typically a total of 150 parking spaces in the on-campus parking lots and street frontages of the campus; however, during the Fall monitoring period, the Administrative Lot and Senior Lot were closed due to construction. The peak occupancy of 74 percent was determined based on hourly manual counts of the on-campus and on-street parking along street frontages bordering the School while School was in session. This indicates there were available spaces on the campus and at the campus frontages. The daily peak parking demand while school was in session was 104 vehicles or 0.183 vehicles per student given an enrollment of 416 students.

[1] Peak hour refers to the hour with the highest vehicular volume within the two-hour peak period (7:00 AM to 9:00 AM). Analysis for AM peak hour trips at driveways and adjacent streets utilizes the peak hour per the Conditional Use Permit. The average AM peak hour trip count was calculated using data from the automated driveway counters placed at all entrance and exit driveways to the school, per the Conditional Use Permit.

1. Introduction

Located in Palo Alto, California, Castilleja School is an all-girls middle school and high school. The campus is bordered by Embarcadero Road to the north, Kellogg Avenue to the south, Bryant Street to the east and Emerson Street to the west. The current enrollment on campus is 416 students (Fall 2025), which includes 6th through 12th graders. Of the 416 students, 43 percent live within a 5-mile radius of campus.

The School's Conditional Use Permit ("CUP"), an entitlement permit approved in the City of Palo Alto *Record of Land Use Action*, dated June 6, 2022 ("RLUA"), requires that Castilleja meet trip cap targets of 1,198 average daily trips (ADT) and 383 average AM peak hour trips, to avoid traffic impacts. The trip cap targets apply for the weekdays when the School is in session, excluding holidays, event days, and non-school days (e.g., faculty work days), and construction trips.

The Transportation Demand Management Plan ("TDM Plan") was formally approved by the City of Palo Alto in 2023. Castilleja follows the TDM Plan while also updating/improving programs and strategies to comply with the trip caps and other requirements in the CUP, reducing parking demand, and minimizing school-related disruptions and intrusions into the nearby residential neighborhoods. To that end, each year the School adopts a TDM Operations Guide & Program Manual to ensure compliance with the TDM Plan.

This report documents the programs in the current Castilleja TDM Plan and the ongoing TDM monitoring results including the mode split, driveway volumes (trip caps), and parking for the Fall 2025 monitoring period (July 2025 to October 2025). The sections are organized as follows:

- Section 2: TDM Plan
- Section 3: Loading Areas, Driveways, and Roadways
- Section 4: Mode Split
- Section 5: Parking
- Section 6: Conditions of Approval Matrix with Report Index

2. TDM Plan

The intent of the TDM Plan is to reduce AM peak hour and daily vehicle trips, and parking demand at the School. The TDM Plan serves as a publicly available resource to inform interested parties of the School's transportation-related requirements and activities to meet the CUP requirements. The following sections summarize the scope of the TDM Plan.

2.1 Scope of TDM Plan

The goal of the TDM Plan is to ensure that the School meets the average daily and average AM peak hour trip caps set by the City. Castilleja's TDM Plan describes the required mitigation strategies as well as other programs and activities the School uses to reduce vehicle trips. The major mitigation strategies include:

- Mode of Travel – The mode split mitigation strategies focus on developing incentive programs to encourage carpooling and non-vehicular travel modes, providing shuttle services, and not allowing juniors to drive.
- Communication and Education – Mitigation strategies such as increasing awareness of TDM programs through newsletters, assisting in the development of carpools, provisioning transportation alternatives by geographic area, and hosting events to encourage and promote the use of alternative modes are included in the Plan.
- Traffic Operations and Management – Traffic operations mitigation strategies include registering student and faculty/staff cars, traffic control during the morning peak, and ongoing traffic and parking monitoring. Beyond the TDM strategies, the TDM Plan describes how the School intends to address violations and enforcement.
- Parking Management – Parking strategies consist of School policies related to assigning parking areas by user type and the use of off-site lots and/or satellite parking areas.
- Summer Camp and Event Traffic Management – Summer camp mitigation strategies build off the strategies used during the academic year such as School personnel to manage daily drop-off/pick-up and providing drop-off/pick-up instructions to families. Special event mitigations include use of Spieker field for parking, providing shuttles to or from off-site or remote parking, and using traffic control personnel where necessary.

The *TDM Operations Guide and Program Manual* is the tool used to implement the TDM Plan and documents the strategies used to successfully reduce the number of daily and AM peak hour trips and minimize the transportation effects on the neighborhood. The *TDM Operations Guide and Program Manual* will be updated annually and describe the TDM Plan strategies for a given year.

In addition to the programs discussed above, the TDM Plan includes the following additional strategies:

- Develop a comprehensive incentive program for faculty, staff, and students for carpooling and using alternative means of transportation. (COA 25 a xxi, 21 a)
- Juniors are not allowed to drive to school, except that the School may make up to 5 exceptions at any given time. (COA 22m)

- At the beginning of *each semester*, Castilleja shall register all student cars, distribute I.D. tags, and review the traffic and parking policies with student drivers. (COA 25 a. x)
- At the *beginning of every school year*, Castilleja shall set aside scheduled time for all faculty and staff to register their cars, receive an I.D. tag and review the traffic and parking policies. (COA 25 a. ix)
- Provide bicycle safety education for students, parents, and staff to encourage students and staff to ride bicycles to and from school (MM 7a 16)
- Host school-wide bicycle encouragement events (such as competitions, incentives, and other fun events) to support biking, walking, carpooling, and transit use. (MM 7a 17)

2.2 TDM Monitoring and Reporting

The School is required to prepare monitoring reports for submission to the City of Palo Alto three times per academic school year until the School has reached maximum enrollment (or 5 students below maximum enrollment) for 2 years and has consistently met the average daily and AM peak hour trip caps. Once the School reaches maximum enrollment for two consecutive years and has consistently met the trip cap requirements, the School will only need to prepare monitoring reports twice a year. The schedule for conducting and submitting monitoring reports is shown in **Table 1**.

Castilleja currently collects TDM program data using the following methods:

- Driveway Traffic Counts: permanent vehicle counter devices installed on all campus driveways that electronically track all vehicles entering and exiting the campus. The counters collect the data in 15-minute intervals and the information is stored electronically[2].
- Bike, School Bus/Shuttle Usage: daily counts are collected on the number of students using School bus/shuttle and the number of bikes on campus.

In addition to the above methods, Fehr & Peers also collected field data, evaluated ongoing trends, and assessed the success of TDM programs, all of which is summarized herein. These additional methods include the following and are described in more detail in Sections 4 through 6 of the report.

- Campus driveway calibration (as summarized in **Section 4.2.3**, below) and
- Neighboring street daily volume counts over a 7-day period (as reflected in **Table 6 and 7**)
- Mode split counts at campus driveways (as reflected in **Chapter 5**)
- Parking occupancy counts (parking demand) (as reflected in **Chapter 6**)

[2] The permanent electronic counts were calibrated using the third-party counts collected at the loading areas and driveways as described in **Section 4.2.3**.

Table 1. Monitoring Schedule

Season	Monitoring Period	Monitoring Report Due Date
Report three times per academic school year		
Spring 2023[1]	March to June	August 15, 2023
Fall 2023[2]	July to October	December 15, 2023
Winter 2024[3]	November to February	April 15, 2024
Spring 2024[4]	March to June	August 15, 2024
Fall 2024[5]	July to October	December 15, 2024
Winter 2025[6]	November to February	April 15, 2025
Spring 2025[7]	March to June	August 15, 2025
Fall 2025[8]	July to October	December 15, 2025
Report two times per academic school year[9]		
Winter	July to December	February 1
Spring	January to June	August 1

Note:
1. Analysis for Spring 2023 was conducted and submitted to the City of Palo Alto in August 2023.
2. Analysis for Fall 2023 was conducted and submitted to the City of Palo Alto in December 2023.
3. Analysis for Winter 2024 was conducted and submitted to the City of Palo Alto in April 2024.
4. Analysis for Spring 2024 was conducted and submitted to the City of Palo Alto in August 2024.
5. Analysis for Fall 2024 was conducted and submitted to the City of Palo Alto in December 2024.
6. Analysis for Winter 2025 was conducted and submitted to the City of Palo Alto in April 2025.
7. Analysis for Spring 2025 was conducted and submitted to the City of Palo Alto in August 2025,
8. This report submitted December 15, 2025 satisfies the monitoring requirements for Fall 2025.
9. The schedule for reporting two times per academic school year is dependent on Castilleja meeting maximum enrollment for two consecutive years and having consistently met the trip standards.

Source: Castilleja School TDM Plan, 2022.

2.3 Special and Major Events

There were 123 days in the Fall 2025 monitoring period; there were 47 days where school was in session, all of which were in person days. The first day of school for the Fall period was August 21, 2025. A calendar of all in school days during the monitoring period was included in **Appendix A**. Castilleja hosted an on campus summer camp for elementary students during the Fall monitoring period from June 30 to August 8.[3] The breakdown of school days, summer camp days, and holiday or event days is shown in **Table 2**.

[3] There were 28 days of summer camp during the Fall monitoring period. There was no camp on Juneteenth and 4th of July.

Table 2. Breakdown of School/Non-School Days in Monitoring Period

Fall 2025 Semester	Number of Days
Academic School Year	
In Session School Days	47[1,2]
Holiday Days	4 days[2,3]
Event Days	12 events over 12 days (3 events occurred on weekends)
Number of Weekend Days	34
Faculty Work Days	3
Summer Camp Days	
Camp Days[4] (June 16, 2025 – August 8, 2025)	28 (4 weeks)
Summer Camp Holidays	2[5]

Notes:
1. Of the 47 days where school was in session, 41 days were non-event days.
2. School was not in session July 1 through August 20, 2025 for summer break.
3. There were 3 holidays while school was in session (Labor Day, Yom Kippur, and Diwali).
4. Camp was in session during the Fall monitoring period from July 1, 2025 to August 8, 2025.
5. Two Summer camp holidays occurred, one on Juneteenth (June 19, 2025) and one on the Fourth of July (July 4, 2025).

Source: Castilleja, 2025.

Castilleja hosts special events throughout the school year including school performances, athletic events, school hosted holiday celebrations/events, commencement, and events for prospective or newly admitted students and their families. Under the CUP, the School is allowed to hold up to 50 special events and 5 major events per school year. Special events are events that attract 50 or more guests. Below is a list of required parking approaches from MMRP 4a based on the number of expected guests, which is also subject to modification based on the time of day the event takes place. A full list of events and associated parking strategies is listed in **Appendix B**.

- 50 – 80 guests during instructional hours[4]: Develop a parking plan, traffic monitors
- 80+ guests during instructional hours: Develop a parking plan, utilize traffic monitors, offer shuttle service to Caltrain
- 160+ guests outside of instructional hours: Develop a parking plan, utilize traffic monitors, offer shuttle service to Caltrain, provide satellite parking locations (if available)
- Fewer than 160 guests outside of instructional hours: Allow parking on on-site lots
- Castilleja has two remote parking lots each with 20-25 parking spaces. These Satellite parking areas are available during school hours with scheduled and/or on demand shuttle service. For all Major events, Castilleja School requests the use of a parking lot at Palo Alto High School and provides shuttle service

[4] Instructional hours are from 7:00 AM to 6:00 PM Monday through Friday.

When Castilleja is required to develop a parking plan for an event, the School takes the following into consideration:

- 25 offsite parking at First Presbyterian Church
- 20 offsite parking spaces at AME Zion Church with the option of adding 25 more spaces for a total of 45 spaces if necessary.
- 150 on campus and frontage street parking[5]
- The School reviews its past parking demand for the same or similar events (based on timing and number/type of guests) and uses the information to determine when there is a need to open Spieker field for additional parking.
- When there are events that will bring parents for committee or student information meetings with between 50–75 guests, the School asks employees to use the offsite parking to reserve all available parking spaces in the administrative lot for guest parking.

During the monitoring period covered by this report, 12 events occurred at the School. The events, dates and time, attendance, and parking strategy for these 12 events are listed below in **Table 3**.

Table 3. Castilleja Special Events from July 2025 to October 2025

Event Name	Event Date	Event Time	Event Size	TDM Parking Plan[1]
New 6th Grade Family Welcome	Saturday, August 16, 2025	2:00pm–4:00pm	100+	Less than 160 guests: Campus lots, campus curbside, 7 traffic monitors
6th–8th Grade on campus for MS Family Orientation	Wednesday, August 20, 2025	8:30am–3:15pm	50–100	Cars will not be parking. Parents will be dropping off students. 7 Traffic monitors
Opening Day Tie Ceremony	Thursday, August 21, 2025	8:00am–3:15pm	Major	Caltrain shuttle, remote/satellite parking, campus curbside, 7 Traffic monitors
Back to School Night	Thursday, September 18, 2025	5:30pm–9:00pm	Major	Caltrain shuttle, remote/satellite parking, campus curbside, 7 Traffic monitors
Spirit Week BBQ	Friday, September 26, 2025	3:00pm–6:00pm	100+	Not for outside attendees, Students will already be on campus
Alum Reunion	Saturday, September 27, 2025	1:00pm–8:00pm	100+	Less than 150 guests: Campus lots, campus curbside, 7 traffic monitors
Dr. Noel-Pierre's Installation Ceremony & Celebration	Friday, October 3, 2025	1:30pm–4:00pm	Major	Caltrain shuttle, remote/satellite parking, campus curbside, 7 Traffic monitors

[5] During the Fall monitoring period, due to construction, the senior and administrative lots were closed, and additional spaces were added in the Bryant Driveway. During construction, there are 104 available on campus and frontage parking spaces.

Event Name	Event Date	Event Time	Event Size	TDM Parking Plan[1]
Sports Event: MS Swim Meet	Tuesday, October 7, 2025	3:45pm–5:30pm	100+	Campus lots, campus curbside, satellite parking, 7 traffic monitors
Middle School Preview Event	Saturday, October 11, 2025	9:00am–12:00pm	100+	Campus lots, campus curbside, satellite parking, 7 traffic monitors
Keeping the Circle Green	Wednesday, October 22, 2025	6:00pm–8:00pm	100+	Campus lots, campus curbside, satellite parking, 7 traffic monitors, Caltrain Shuttle
Middle Fall Social	Thursday, October 23, 2025	6:00pm–8:00pm	100+	Most students are on campus. Parents pick-up and drop-off in the campus driveways and at the Employee Lot Gate. We have 7 traffic monitors managing the traffic flow.
US Preview Event	Tuesday, October 28, 2025	6:15pm–8:00pm	100+	Campus lots, campus curbside, satellite parking, 7 traffic monitors, Caltrain Shuttle

Notes:

1. Traffic Monitors manage traffic and parking for special events only.

Source: Castilleja, 2025.

3. Loading Areas, Driveways, and Adjacent Streets

This section documents the pick-up/drop-off area operations, driveway volumes, and adjacent street ADT. For the purposes of this report, driveways are defined as vehicle access points to campus and are located on Castilleja's property. These driveways are organized into three pick-up/drop-off loops, with each loop consisting of two driveways, for a total of six driveways on campus. The loops are described in more detail below. There is an additional driveway that provides vehicular access to Castilleja's parking lots. Due to construction on campus, access to the Administrative Lot and Senior Lot were closed off during the Fall monitoring period. Adjacent streets refer to the public streets bordering the campus. This includes Embarcadero Road, Bryant Street, Kellogg Avenue, and Emerson Street.

Analysis for loading areas, driveways, and adjacent streets is collected daily and during the morning and afternoon peak periods (7:00 AM – 9:00 AM and 2:00 PM to 4:00 PM). Per the CUP, the analysis for average AM peak trips at driveways and adjacent streets utilizes the peak hour which refers to the hour with the highest vehicular volume within the two-hour peak period (7:00 AM to 9:00 AM).

3.1 Pick-up/Drop-off Area

The existing student pick-up/drop-off loops are on Bryant Street and Kellogg Avenue along the School frontage and in the employee parking lot at the corner of Kellogg and Emerson. The three one-way loops are designated right turn-in and right turn-out driveways. There are A-frame signs located at the driveway entrances and exits to remind drivers of the vehicle flow as shown in **Figure 1**. Signs are maintained by School staff. School personnel monitor traffic entering and exiting the loops.

All three loops have one-way circulation as shown in **Figure 2**. The Bryant loop has one lane for unloading/loading and one lane for passing. The Kellogg loop has one lane for unloading/loading. The on-campus drop-off lanes on Bryant Street and Kellogg Street can accommodate five to six vehicles and the dwell time[6] for vehicles is 5-10 seconds during the morning peak. The short dwell time minimizes queuing at the driveways. Counts and field observations of ingress and egress queues at the driveways were conducted in four 15-minute increments prior to start of school (8:30 AM) and the 15-minute increment after the end of the school day (3:15 PM). During student drop-off and pick-up, the vehicle queue in the drop-off/pick-up lane is on average five vehicles and a maximum of seven vehicles for both drop-off loops. In the morning period, vehicle queues at both loops were short and generally cleared in less than one minute. No significant spillback or circulation impacts onto the local streets were observed. Traffic monitors at the driveways were actively working to monitor and minimize queues at the driveways onto the local streets. In the afternoon peak period there were two instances when vehicle queues exceeded the driveway capacity. To avoid the queue spillback onto the local street, staff monitors prompted these vehicles to circulate. These events were brief and typically involved no more than one vehicle. Staff were actively monitoring the driveways to

[6] Dwell time is the time a vehicle is stopped when dropping off or picking up students.

reduce queueing and delay at the three loops and ensure compliance with School pick-up and drop-off procedures.

3.1.1 Pick-up/Drop-off Process

Each loop has a designated team of attendants to assist with traffic management during the AM and PM peak periods. All attendants wear yellow vests when managing traffic and are provided with a copy of the *Traffic and Neighborhood Monitoring Guidelines*. These attendants monitor to ensure compliance with parking and drop-off requirements, including restricting parking or drop-offs in the surrounding neighborhood.

For the 2025-2026 school year, the class start time was 8:30 AM and the end time was 3:15 PM. The drop-off and pick-up locations are assigned based on grade. **Table 4** summarizes the designated drop-off location for students in each grade.

The following describes the pick-up/drop-off activities conducted by the School's traffic attendants:

- Morning Drop-Off: Seven attendants manage drop-off traffic from 8:05 AM to 8:30 AM. Three are located at Bryant Driveway (one at the entrance, one at exit, and one in the loading area), two are at Kellogg Driveway (one at the entrance and one at the exit), and one at Emerson driveway exit. The seventh attendant is not assigned to a specific location. Depending on the need, they are commonly positioned at the corner of Kellogg/Bryant, near the corner of Embarcadero/Bryant, or at the bus drop-off point. Attendants stationed at the corners are monitoring that students/employees walking to campus were not dropped off or parked in the neighborhood.
- Daily Neighborhood Parking Monitor: Throughout the school day Castilleja employees monitor parking one block from the School in each direction on Kellogg Ave, Bryant Street, Emerson Street and Melville Avenue. The employees check for parked cars with Castilleja stickers. If a student or employee is found parked in the neighborhood, they are instructed to move their car immediately and the incident is logged.
- Afternoon Pick-Up: Seven attendants manage pick-up from 3:05 PM to 3:25 PM. Three are located at Bryant Driveway (one at the entrance, one at exit, and one in the loading area), two are at Kellogg Driveway (one at the entrance and one at the exit), and one at Emerson driveway exit. The seventh attendant is stationed at the corner of Kellogg and Bryant to observe whether there are parents waiting or picking up students on the surrounding streets.
- Traffic attendants[7] are asked to report issues to the School via email with the student/parent's name and a description of the issue. Traffic attendants will also report any excessive vehicle queues, safety concerns, or other recommendations to improve safety and circulation. During this monitoring period no issue reports were logged.

[7] **Traffic Attendants** refer to Castilleja's employees or security guards that assist daily with morning and afternoon management and parking.
Traffic Monitors refer to attendants that are hired to make sure that all vehicles park legally & safely when attending special events.

Table 4. Castilleja School Student Drop-Off Locations

Grade Levels	Drop-Off Location
Grade 6, 7,8	Bryant driveway
Grade 9 - 12	Kellogg driveway
Student Carpools	Employee Lot

Source: Castilleja, 2025.

Castilleja maintains ongoing communication with parents to remind them that drop-off, pick-up, and/or parking in the neighborhood are prohibited. The School has employees assigned to walk the streets adjacent to the School to monitor street drop-offs, pick-ups, and parking in the neighborhood.

During the summer camp sessions, parents are instructed to follow similar rules as during the school year. A letter to parents was sent out before the session instructing them on the pick-up and drop-off process. To minimize queuing and better disperse pick-up and drop-offs, students were assigned to different pick-up and drop-off locations based on camper last name. At the beginning of each summer camp session, each parent was provided a placard to be displayed on the dash of the car as shown in **Figure 3** with their camper's name and an assigned pick-up and drop-off location and time slot. Summer camp pick-up and drop-off occurred at the Bryant and Kellogg loops and the employee lot and were split evenly between the following time periods:

Last Names	Drop-Off	Pick-Up
A-K	8:30AM	4:00 PM
L-R	8:40 AM	4:15 PM
S-T	8:30 AM	4:00 PM
U-Z	8:40 AM	4:15 PM

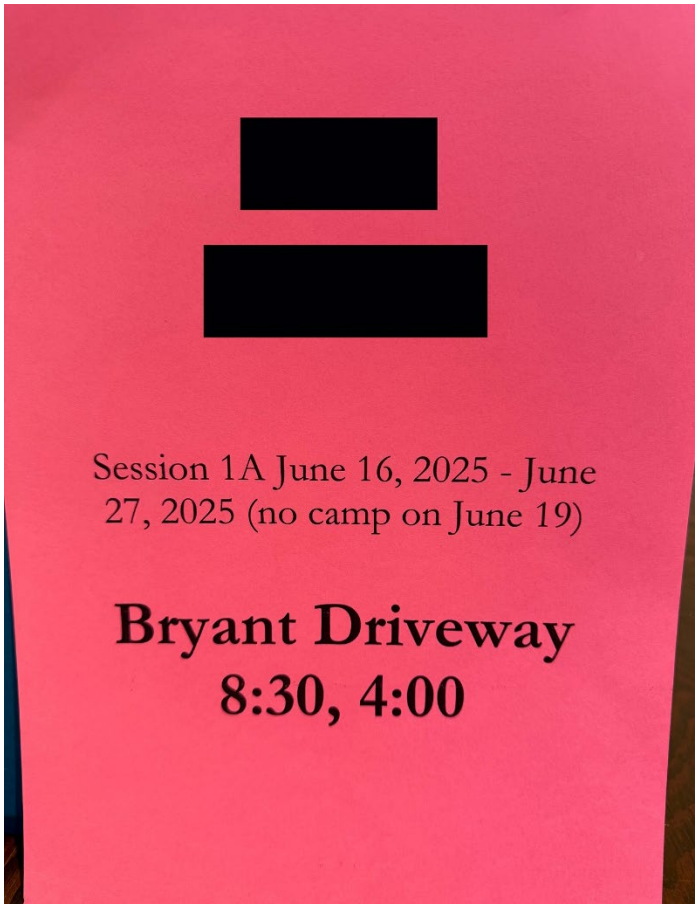

Figure 3: Example Summer Camp Student Name Placard

3.1.2 Pick-up/Drop-off Location Distribution

Table 5 summarizes the drop-off distribution while school was in session for each street loading area based on average vehicle trips during the AM (7:00 AM – 9:00 AM) and PM (2:00 PM to 4:00 PM) peak periods based on the mode share field observation. Of the students who were dropped off during the AM peak period, 59 percent were observed at Bryant Street, 34 percent were observed at Kellogg Avenue, and 7 percent were observed in the Emerson Street parking lot.

Compared to previous monitoring periods including Fall 2024 (61 percent at Bryant Street, 35 percent at Kellogg Avenue, and 4 percent at Emerson Street) Fall 2025 had a similar distribution of students at the Bryant Street Loop. The small changes in distribution compared to Fall 2025 is likely because 6th graders are assigned to the Bryant Street drop-off location but in Fall 2024, there were no 6th graders on the Bryant Street Campus. During this monitoring period, 6th graders have returned to campus and may have shifted the distribution of trips across the three drop-off locations. Furthermore, due to construction, the Senior Lot is currently closed to vehicle access, likely resulting in a smaller number of students that were dropped off in the Emerson Street Senior Lot & Employee Lot Exit.

Table 5. Castilleja School Student Drop-Off/Pick-Up Distribution

Location	Target Distribution Percentage[1]	AM Peak Period			PM Peak Period[2]		
		Average AM Drop-Off Headcounts	Percentage	Delta	Average PM Pick-Up Headcounts	Percentage	Delta
Bryant Street Loop & Administrative Lot	43%	99	59%	16%	44	48%	5%
Kellogg Avenue Loop & Employee Lot	30%	57	34%	4%	42	46%	16%
Emerson Street Senior Lot[3] & Employee Lot Exit	27%	12	7%	-20%	5	5%	-22%
Total	100%	168	100%	-	91	100%	-

Notes:

1. Target distribution percentages are outlined in the *Castilleja School Expansion EIR Appendix E: Traffic Impact Study* (2020).
2. Afternoon pick-up period is over a longer period of time compared to the morning drop-off period, therefore even though there is a higher percentage at the Kellogg Avenue Loop in the PM, traffic is dispersed over a longer period of time. Therefore, the higher percentage at the Kellogg Avenue Loop does not necessarily mean there will be queues at the driveway.
3. The senior lot was closed due to construction during the monitoring period.

Source: Fehr & Peers, Castilleja, 2025.

3.2 Driveway Volume

To monitor the driveway volume and evaluate the trip count compliance with the COA 22 requirement of ADT and AM peak hour trip cap, Castilleja installed automated counters at all campus driveways to collect vehicular volumes. Daily vehicle counts were collected at Castilleja School driveways (nine sensors in total), shown in **Figure 4**.

1. Bryant Street Administrative lot driveway (bi-directional)
2. Bryant Street loop driveway inbound
3. Bryant Street loop driveway outbound
4. Kellogg Avenue loop driveway inbound
5. Kellogg Avenue loop driveway outbound
6. Kellogg Avenue Employee Lot west driveway (bi-directional)
7. Kellogg Avenue Employee Lot east driveway (bi-directional)
8. Emerson Street Employee Lot exit-only driveway
9. Emerson Street Senior Lot driveway (bi-directional)

Due to the closure of Administrative and Senior lots for construction, driveway volumes at driveways 1 and 9 were not included during this monitoring period. The on-site construction area remains fenced, and access is restricted exclusively to construction vehicles. The driveway pucks within the construction zone have been removed, and student, parent, and staff vehicles are not permitted to enter or use these driveways for student drop-off or pick-up.

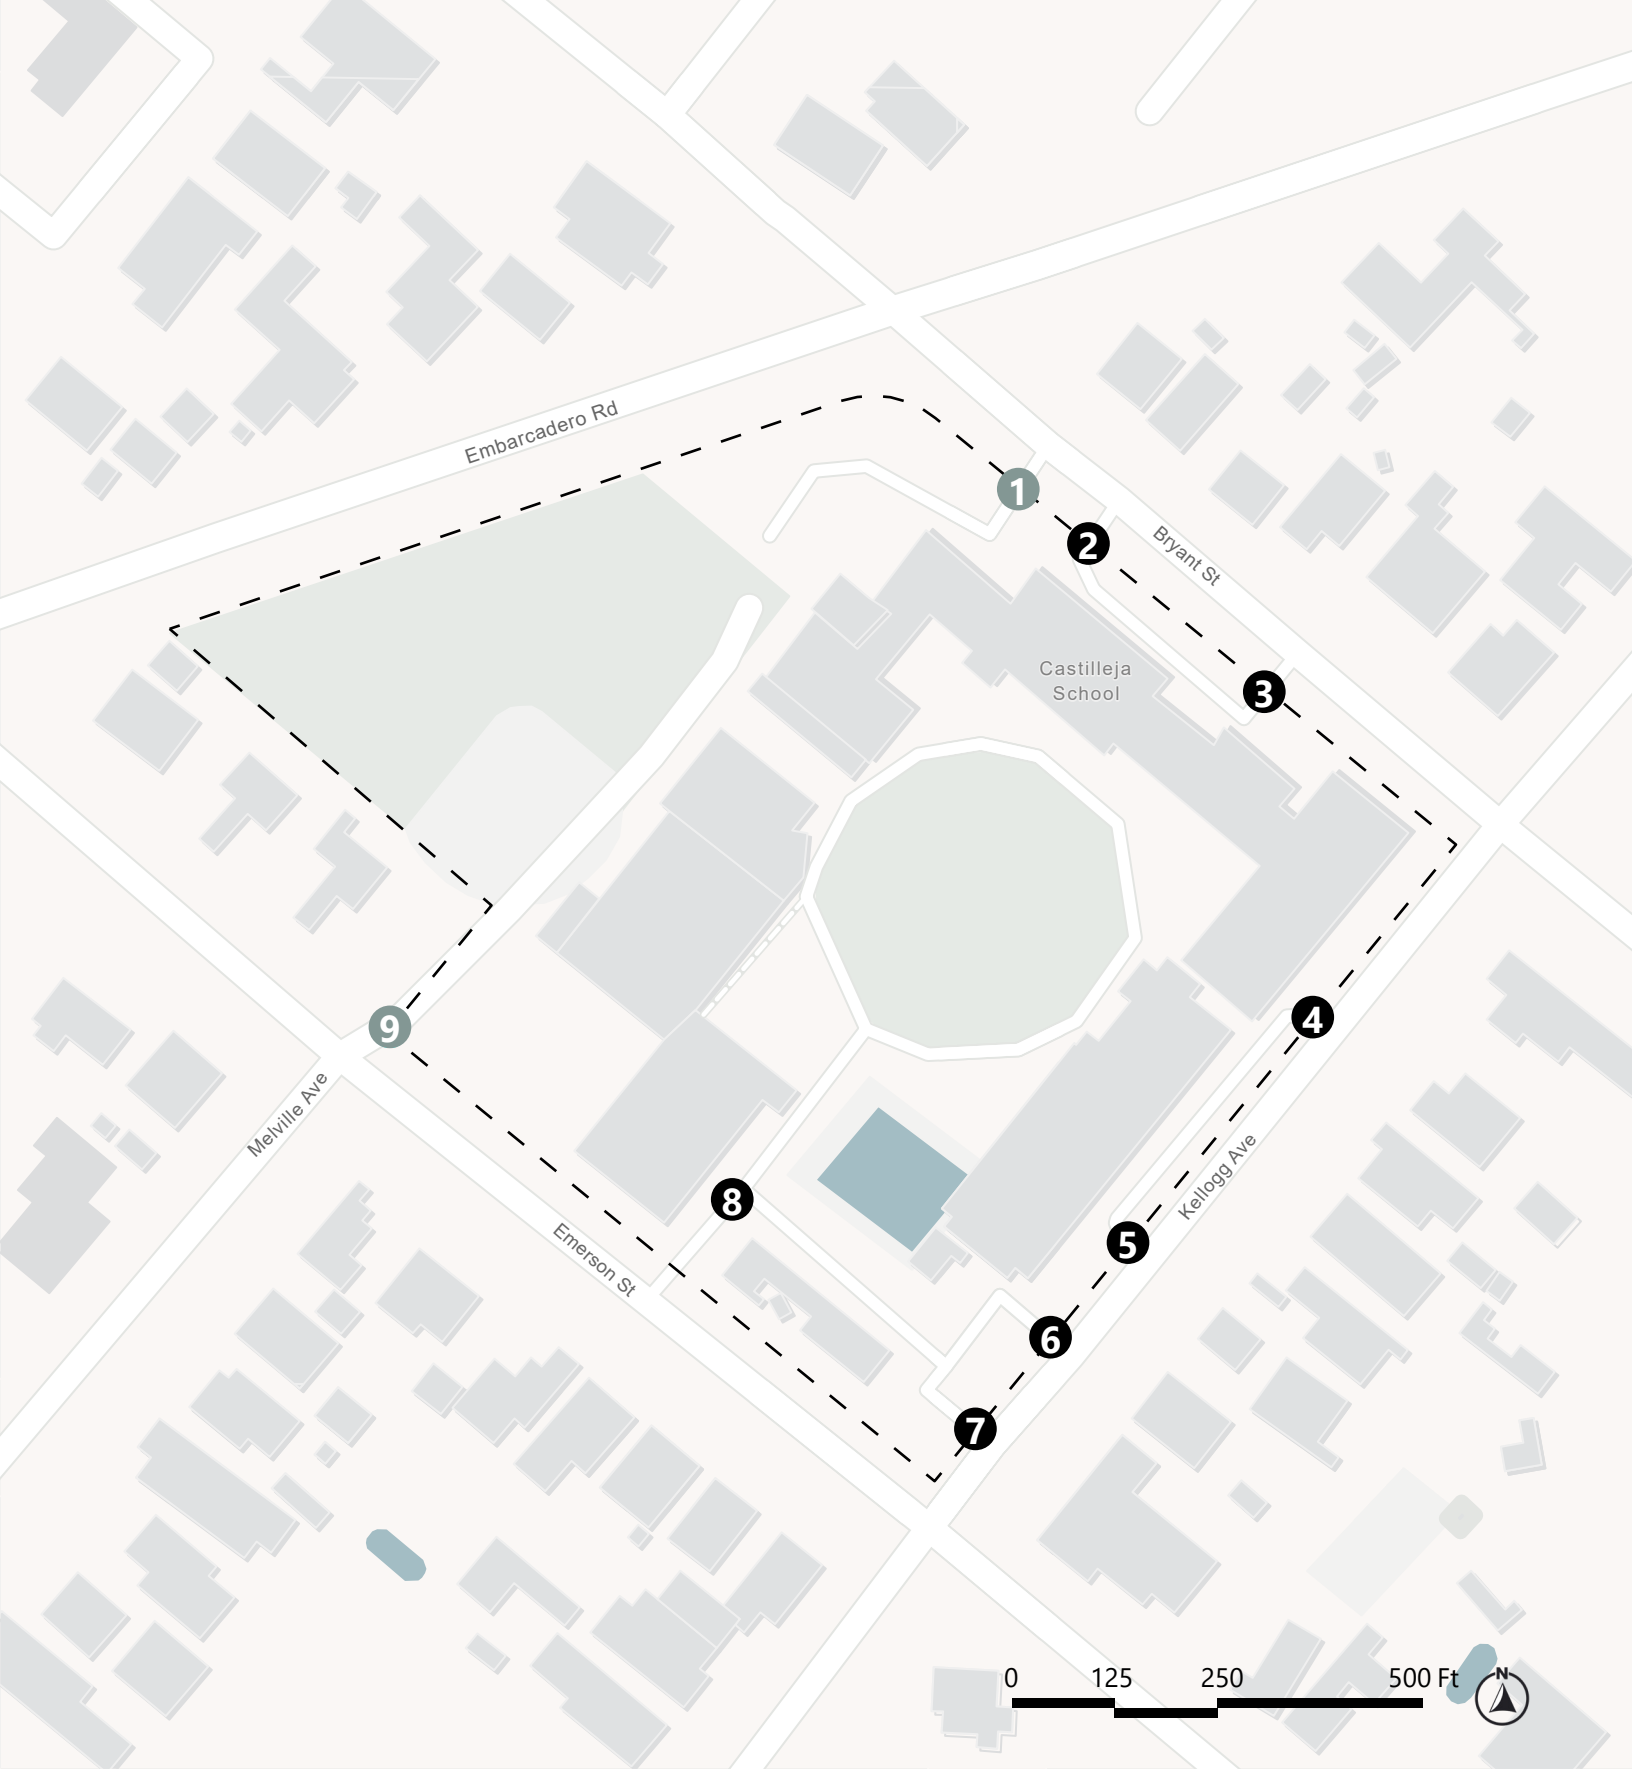

FIGURE 4

Driveway Count Sensor Locations

Fehr & Peers

3.2.1 Automated Traffic Counting Devices

The automated counters are Sensys FlexMag sensors that are installed in the driveway pavement close to public right of ways. The sensors use wireless magnetometer technology for vehicle detection and transmit real-time data to a central database. The devices are self-calibrating and require no ongoing maintenance until the batteries need replacement. The Sensys support team monitors the system daily via diagnostic tests and receives alerts when anomalies occur.

The vehicle volumes are collected and reported in 15-minute intervals, 24 hours a day. The 15-minute count data is stored on the SNAPS Server database managed by Sensys. The data will be stored for three years and can be accessed as needed. Castilleja runs a daily report to download the data on Castilleja's server and Fehr & Peers obtains this data from Sensys for the monitoring reports. Castilleja will post the monitoring report on its neighborhood portal three times a year on December 15, April 15, and August 15. Castilleja will post the count data concurrently with the submittal of traffic monitoring report to the City.

For July 2025 to October 2025, the individual weekday driveway volumes by 15-minute intervals are attached electronically as **Appendix D.**

3.2.2 Average AM Peak and Average ADT

The Fall 2025 monitoring period is from July 2025 to October 2025. The analysis considers the typical weekdays when school is in session and weekdays when summer camp is in session during the monitoring period. Per the CUP, weekends, holidays, non-school days (i.e., faculty work days), and scheduled event days are not included in the analysis. The 15-minute driveway volumes are aggregated into hourly and daily volumes for each typical weekday. **Figure 5** shows the individual weekday school and summer camp daily total volume for the campus during the July 2025 to October 2025 monitoring period, excluding the event days and non-school days. The average number of daily trips that occurred during the monitoring period is required to be below the daily trip cap of 1,198 trips. During the Fall monitoring period, the average number of weekday (Monday to Friday) daily trips while school was in session was 914 trips. During summer camp, the average number of weekday (Monday to Friday) daily trips was 556 trips. Both averages were below the average daily trip cap of 1,198 trips.

The individual weekday school session and summer camp session AM peak hour volumes are shown in **Figure 6**. The peak hour is the hour with the highest vehicular volumes within the two-hour peak period (7:00 AM to 9:00 AM). The AM peak hour for the Fall 2025 monitoring cycle was calculated to be from 7:45 AM to 8:45 AM. While school was in session, the average AM peak hour volume was 295 trips. During summer camp, the average AM peak hour volume was 255. Both averages are below the average AM peak hour trip cap of 383 trips during the monitoring period. There were no weekdays where the AM peak hour volumes exceeded the AM peak hour trip cap.

3.2.3 Calibration of Automated Counts

Fehr & Peers calibrates the automatic counters once a year during the Winter monitoring period to ensure that the automatic counts are consistent with the pick-up and drop-off activities on campus. To calibrate the automated driveway counts, Fehr & Peers collected driveway counts via roadway

count equipment (pneumatic hoses) at the same nine locations from 7:00 AM to 7:00 PM during which most of the daily activities occur. These daily counts were compared to the automated Sensys counts for the day for the period 7:00 AM to 7:00 PM. For both days the comparison showed that the automated counts were between 5 and 15 percent higher than the calibration counts, which is well within the margin of error of the count equipment. Further, the Sensys counts were slightly higher than the calibration counts, or in other words the Sensys results are more conservative.

Figure 5: Daily Total Volume (Excluding Events/Holidays)

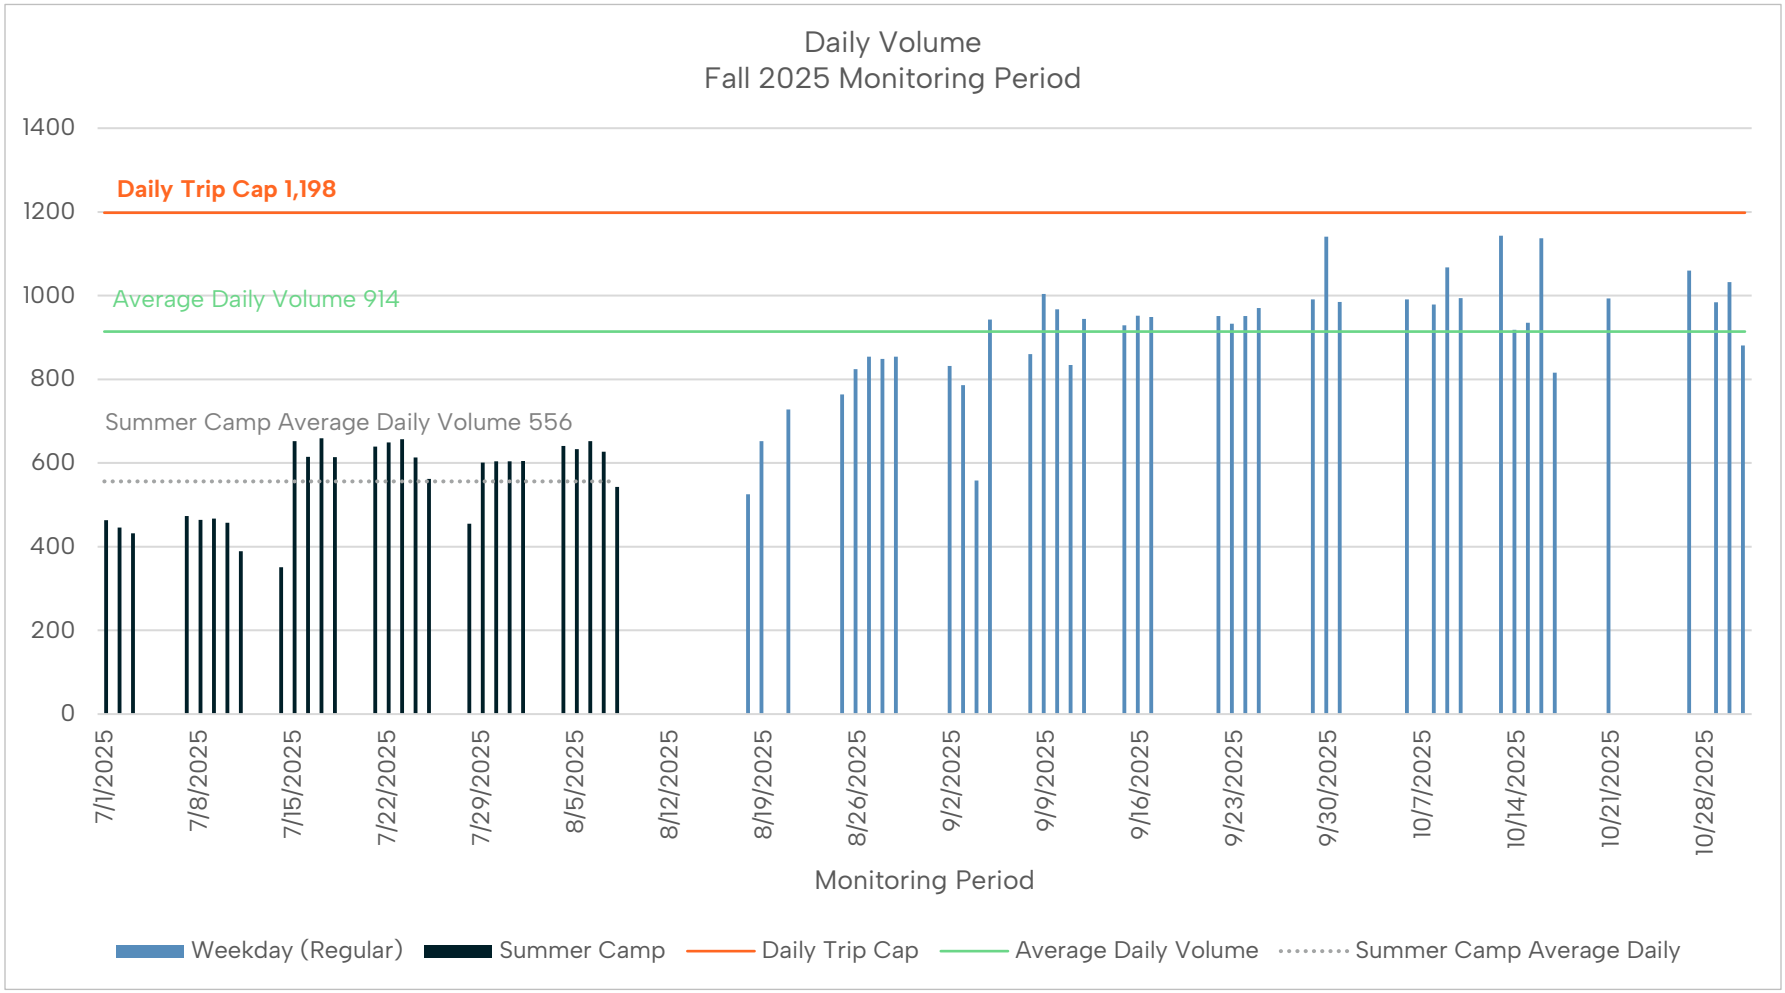

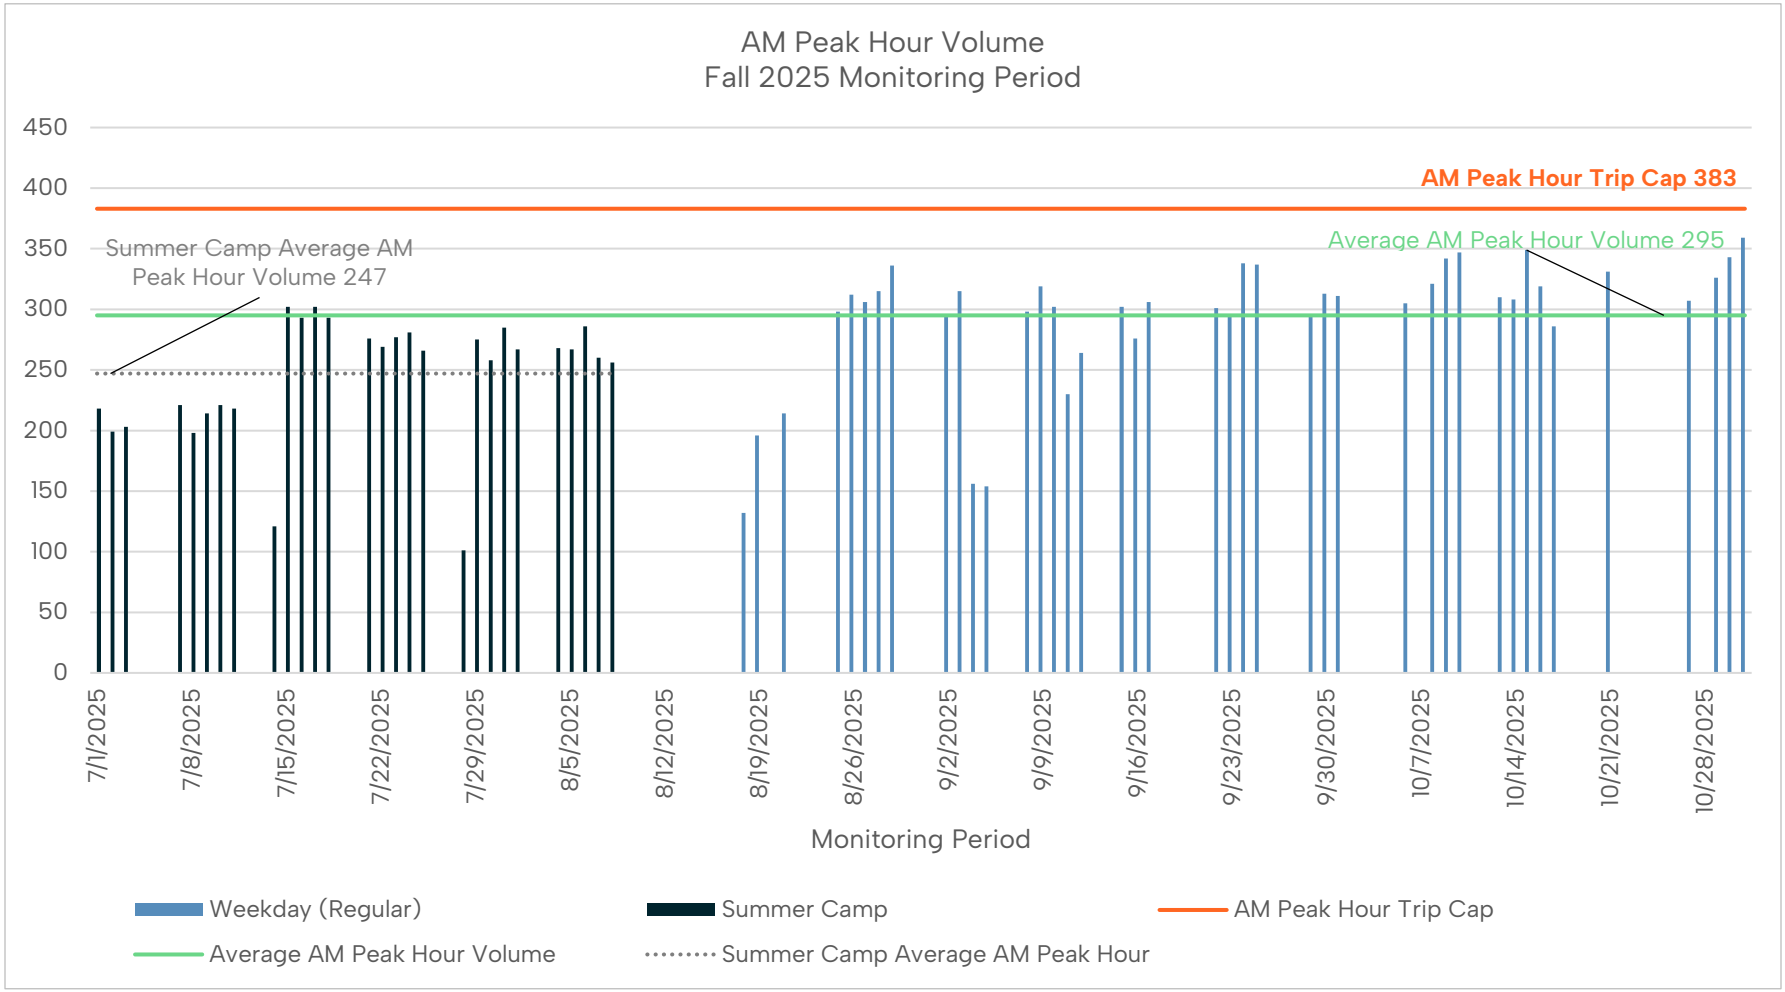

Figure 6: AM Peak Hour Volume (Excluding Events/Holidays)

3.3 Adjacent Street ADT and AM Peak Counts

Roadway ADT refers to all vehicle trips on the streets adjacent to the School frontage. Per *COA 22 g* and *COA 24 b.iv* temporary roadway count equipment (pneumatic hoses) was installed for seven days to track weekday and weekend trips on adjacent streets (Bryant Street, Emerson Street, and Kellogg Avenue). The counters record the number of vehicles crossing the hoses in each direction including vehicles which may not be going to the school. These differ from driveway counts which record every vehicle (twice) as it enters and exits the School driveways. The counts from the adjacent streets are used for ongoing monitoring by the City and may be used for possible adjustments to the TDM plan, however, they are not intended to determine a violation of Castilleja's CUP.

During the AM drop-off period, each vehicle using the loading areas is counted as two trips (entering and exiting). However, these vehicles only represent one trip on the adjacent streets. The adjacent street ADT also includes neighborhood through traffic. Therefore, the relationship between trips on the adjacent streets and trips using the campus driveways is not comparable. The 306 vehicle trips counted at the driveways reflect approximately 153 vehicles.

Table 6 presents the average weekday and weekend ADT on each of the adjacent streets and **Table 7** shows the average trips during the weekday and weekend AM peak hours.

Table 6. Average Daily Trips (ADT) (Adjacent Street Counts)

Street	Cross Streets	Average Daily Trips	
		Weekday	Weekend
Bryant Street	Embarcadero Road and Kellogg Avenue	825	510
Emerson Street	Melville Avenue and Kellogg Avenue	836	372
Kellogg Avenue	Emerson Street and Bryant Street	879	309

Source: Fehr & Peers, 2025.

Table 7. Average AM Peak Hour[1] Trips (Adjacent Street Counts)

Street	Cross Streets	Average Daily Trips	
		Weekday	Weekend
Bryant Street	Embarcadero Road and Kellogg Avenue	86	38
Emerson Street	Melville Avenue and Kellogg Avenue	79	19
Kellogg Avenue	Emerson Street and Bryant Street	141	29

Notes:
1. AM peak hour is from 7:45 AM to 8:45 AM according to the school field count.

Source: Fehr & Peers, 2025.

To illustrate travel behavior over time, **Table 8** shows the ADT and average AM peak hour trips from this monitoring period (Fall 2025) and the previous three monitoring periods. Because there are differences in weather and travel behavior from period to period, there are variations in the trips. Generally, the number of trips is consistent across the three monitoring periods. Compared to Fall 2025, the number of weekday trips along the adjacent streets is generally consistent across all driveways. The number of trips is slightly lower on Bryant Street and higher on Emerson Street and Kellogg Avenue.

Table 8. Average Daily Trips (ADT) and Average AM Peak Hour[1] Trips Over Time (Adjacent Street Counts)

Adjacent Street Segment Counted	Cross Streets	Average Daily Trips								Average AM Peak Hour Trips							
		Fall 2024		Winter 2025		Spring 2025		Fall 2025		Fall 2024		Winter 2025		Spring 2025		Fall 2025	
		Week day	Week end	Week day	Week end	Week day	Week end	Week day	Week end	Week day	Week end	Week day	Week end	Week day	Week end	Week day	Week end
Bryant Street	Embarcadero Road and Kellogg Avenue	942	603	753	319	871	532	825	510	104	22	86	10	99	12	86	38
Emerson Street	Melville Avenue and Kellogg Avenue	739	260	649	277	669	384	836	372	70	6	67	8	76	9	79	19
Kellogg Avenue	Emerson Street and Bryant Street	656	297	781	246	855	276	879	309	110	11	146	14	161	6	141	29

Notes:

1. AM peak hour varies by monitoring period depending on the field count but generally starts between 7:30 AM and 8:00 AM. For Fall 2025, the observed peak hour occurs between 7:45 AM and 8:45 AM based on the school field count.

Source: Fehr & Peers, 2025.

4. Mode Split

This section describes the mode split for student arrival to campus from the October 2025 field and survey data while school was in session. Based on the counts and shuttle ridership provided by the School, approximately 64 percent of the students use alternative transportation modes (carpools, bike, walk, school bus/shuttle).

Due to the substantially lower attendance during summer camp, with weekly sessions ranging from 90 to 165 campers between June 30 and August 8, mode split counts were not collected during the four-week summer camp session.[8] Although mode split during the summer camp is not reported, Castilleja continued to encourage carpooling and the use of alternative transportation modes such as walking and biking to get to campus during the summer camp sessions. Shuttles and buses are not provided while summer camp is in session.

4.1 Student Mode Split

Fehr & Peers used a third-party vendor Traffic Data Service to conduct field counts at Castilleja. Surveyors observed the morning drop-offs and recorded the number of students per vehicle. The overall student arrival mode split was determined from field observations, vehicle counts of inbound private vehicles, shuttles, buses, pedestrians, and bicyclists during the morning school arrival period (7:00 AM-9:00 AM) on Wednesday, October 8 and Friday, October 10. The raw count data collected by surveyors is included as **Appendix C**. Surveyors were instructed to collect information on the following items:

- Number of vehicles entering and exiting the school at each driveway and on-street drop-off/pick-up points, and occupancy of each vehicle
- Number of Castilleja students exiting from each car (drop-offs)
- Number of student bicyclists and pedestrians entering and exiting the School
- Number of riders on each shuttle entering or exiting the campus

As shown in **Table 9**, during the 7:00 AM – 9:00 AM arrival period, highest mode split (45 percent) was students who were dropped off on campus (36 percent were dropped off alone and 9 percent carpooled). The observed vehicle occupancy for dropped off trips was 1.11 students per vehicle. Students that drove and parked on campus were not observed as the senior parking lot was closed due to construction. Seniors who have heavy items or equipment may use shuttles to the school from the off-site First Presbyterian Church parking lot; and walk to campus from the lot.

Transit holds the second highest share with 40 percent of students riding one of the Schools transit options. The mode split of students taking transit includes Caltrain, school buses, and shuttles. The Caltrain shuttle (operated by the School) provides service between the Palo Alto Downtown Caltrain Station and campus. The trips are timed based on the scheduled arrival times in the AM peak period and departure time in the PM peak period. Castilleja offers five AM Peak hour Caltrain Shuttles and five PM Peak hour Caltrain Shuttles. The Castilleja school buses provide service between designated pick-up locations and the School. During the monitoring periods, there were seven school bus routes

[8] The first summer camp session, held June 16 through June 27, enrolled 147 campers. The second session, from June 30 through July 11, enrolled 90 campers. The third session, from July 14 through July 25, enrolled 146 campers. The final session, from July 28 through August 8, enrolled 165 campers.

that serve students living in Los Altos, San Carlos, Woodside, Stanford Hills, Burlingame, Menlo Park, East Palo Alto, and Portola Valley. The School has made concerted efforts to provide convenient transit options which have helped contribute to levels of transit ridership. Additionally, the School adopted improved technology to better count student transit riders last year. This software has improved the quality of transit ridership data over time particularly as drivers overcome initial learning curves and become familiar with the service.

Table 9. Student Morning Arrival Mode Share

Mode	Students[1,2]	Percent
Drop-Off	167	45%
Single Student	*133*	*36%*
Carpool	*34*	*9%*
Drive & park on Campus	0	0%
Drive alone	*0*	*0%*
Carpool	*0*	*0%*
Walk	37	10%
Bike	18	5%
Transit[3]	148	40%
Bus	*116*	*31%*
Shuttle	*11*	*3%*
Caltrain	*21*	*6%*
Total	370	100%

Notes:
1. The number of student arrivals was counted during the 7:00 AM – 9:00 AM arrival period and will be different than total enrollment due to students arriving before or after the peak period and student absences.
2. There were 413 students in attendance on October 8th and 410 students in attendance on October 10th.
3. Rider count is obtained from Castilleja. The field data collection counts the total riders that get off the buses and shuttles but does not try to ascertain the shuttle type.

Source: Fehr & Peers, 2025.

On average, approximately 10 percent of students walked to campus and 5 percent of students rode bicycles to campus on the monitoring day. We observed that 9 percent of students carpooled by being dropped off. In total, about 64 percent of the students used alternative transportation modes (bike, walk, school bus/shuttle, carpool).

4.2 Bike Usage

Castilleja provides 100 bike parking spaces throughout the campus and collects bike counts on a daily basis while school is in session. The Fall monitoring counts described in the previous section

show that an average of 18 students biked to school during the AM peak period. The daily counts collected by the School in the period between August 2025 to October 2025 while school was in session showed that an average of 34 people biked to campus on a typical weekday. Therefore, the bike supply is sufficient to serve the demand. The Castilleja count is based on bicyclists parked on school bike racks mid-day and does not differentiate between students and staff. The School also provides bicycle repair facilities to encourage bicycle use and support bicycle maintenance needs. For the Fall Monitoring period the School did not provide any bicycle repair clinics.

Source: Fehr & Peers, 2025

5. Parking

5.1 Parking Supply & Operations

Currently, Castilleja provides on-site, curbside (on street frontage[9]), and off-site parking in satellite parking lots for students, staff, and visitors. While on-site parking typically includes the Administrative lot, Employee lot and Senior lot, during the Fall 2025 monitoring period, the Administrative Lot and Senior Lot were closed due to construction. The on-site parking lot supply for Fall 2025 is 44 spaces and does not include any student spaces. Due to the closure of the Administrative Lot and Senior lot, 51 spaces were lost and 5 spaces were added to the Bryant Driveway. To avoid conflicts during drop-off and pick-up time, parking in the temporary guest spaces is only permitted from 8:40 AM to 2:50 PM. In addition to the on-site parking, there are about 60 public spaces along the School frontage where visitors can park. Other vehicles not related to the School can also park in these curb spaces. Students are not permitted to park on the street; instead, seniors must park at the First Presbyterian Church lot and juniors must park at AME Zion Church lot. Street parking used by the School includes the following areas:

- South side of Bryant Street between Embarcadero Road and Kellogg Avenue
- West side of Kellogg Avenue between Bryant Street and Emerson Street
- North side of Emerson Street along Castilleja frontage

In addition to the adjacent street frontages there are several streets in the neighborhood that the School has monitored in the past. These areas are called the Expanded Study Area and include the following six street segments:

- West side of Kellogg Avenue between Bryant Street and Waverley Street
- South side of Waverley Street between Kellogg Avenue and Churchill Avenue
- South side of Bryant Street between Kellogg Avenue and Churchill Avenue
- North side of Emerson Street between Kellogg Avenue and Churchill Avenue
- West side of Kellogg Avenue between Emerson Street and Alma Street
- East side of Melville Avenue between Emerson Street and Alma Street

Castilleja has secured two off campus parking options for employees, students, and parents/guardians:

- First Presbyterian Church (25 spaces; 0.4 miles from campus)
- AME Zion Church (20 spaces; 2.5 miles from campus). Shuttles are provided in the morning and afternoon to and from the AME Zion Church Location.

[9] Streets frontages are defined in this report as the curbside (including parking area) and is used for the parking analysis. Adjacent streets, as defined earlier in the report, refers to the portion of street that includes the travel lanes and is used when referring to vehicle trips that pass through the street.

5.2 Parking Demand Monitoring

Manual parking occupancy counts were conducted in the on-site campus parking lots and along the street frontages on Wednesday, October 8 and Friday, October 10. On-street parking demand was analyzed for both of the areas described above:

- Adjacent Streets frontages – Counts on Emerson Street, Kellogg Avenue, and on Bryant Street along Castilleja frontages. Parking occupancy on the blocks along the perimeter of the School is included in the demand estimate. Construction vehicles are required to park in the fenced construction area and are not permitted to park along the street.
- Expanded Study Area – Counts along segments of Kellogg Avenue, Waverley Street, Bryant Street, Emerson Street and Melville Avenue.[10]

The on-street parking demand assumed for the School includes all vehicles parked adjacent to Castilleja School. For the current monitoring period, no attempt was made to assess whether the parked vehicles were driven by Castilleja students, staff, visitors or third parties unaffiliated with the School. As a result, total parking demand and rates may capture parking that was not generated by Castilleja School.

Parking demand at the School was determined based on the combined peak occupancy of the one on-campus parking lot and adjacent street frontages bordering the School. The daily peak parking demand was 77 vehicles or 0.183 vehicles per student given an enrollment of 416 students. There are a total of 104 parking spaces in the on-campus parking lots and street frontages of the campus. The peak occupancy of 74 percent was determined based on hourly counts of the on-campus and on-street parking areas adjacent to the School which indicates there were available spaces on the campus and campus frontages. **Table 10** summarizes parking demand, parking supply, and parking occupancy for both the on-campus and on-street spaces adjacent to the School observed during this monitoring period. **Appendix E** includes an hourly breakdown of parking demand and occupancy.

Table 10. 2025 Castilleja School Daily Peak Parking Demand[1]

	On-Campus	On-Street[2]	Aggregate
Parked Vehicles	32	45	77
Demand Rate – vehicles per student	0.076	0.107	0.183
Parking Supply	44	60	104
Occupancy	73%	75%	74%

Notes:
1. School parking lots and block faces adjacent to school. The expanded area parking is included in **Table 11**.
2. Parking supply is derived by estimating the number of vehicles which can optimally park within the block length (minus driveway length, red curb, and bus loading area) of the expanded study area.

Source: Fehr & Peers, 2025.

[10] The Expanded Study Area was studied to identify neighborhood parking demand. Castilleja prohibits students, visitor, and employees from parking in the neighborhood. Any violations are documented and addressed in accordance with the School's infraction policy.

Peak parking demand typically occurs in the middle of the day, when the majority of faculty, staff, and visitors are on site. The Bryant Loop parking was at its highest occupancy (50 percent occupied) at 5:00 PM. The employee parking lot at the corner of Kellogg and Emerson was at its highest occupancy (77 percent occupied) at 1:00 PM and remained at 77 percent until 2:00 PM.

Including the expanded study area (labeled *Expanded Study Area* on **Figure 7**), 115 vehicles were counted during the parking demand peak hour at 11:00AM (**Table 11**) and the aggregate occupancy rate for parking areas including the expanded study area is 60%. Overall, the parking demand on adjacent streets and the expanded study area remains at or below 83 vehicles throughout the day.

Table 11. Castilleja School Daily Peak Parking Demand with Expanded Study Area

	Aggregate of On-Campus & Adjacent On-Street[1]	Expanded Study Area[2]	Aggregate
Parked Vehicles	77	38	115
Parking Supply	104	89	193
Occupancy	74%	43%	60%

Notes:
1. School parking lots and block faces adjacent to school as reported in **Table 10**.
2. No attempt was made to assess whether the parked vehicles were driven by residents or Castilleja students, staff, or visitors.

Source: Fehr & Peers, 2025.

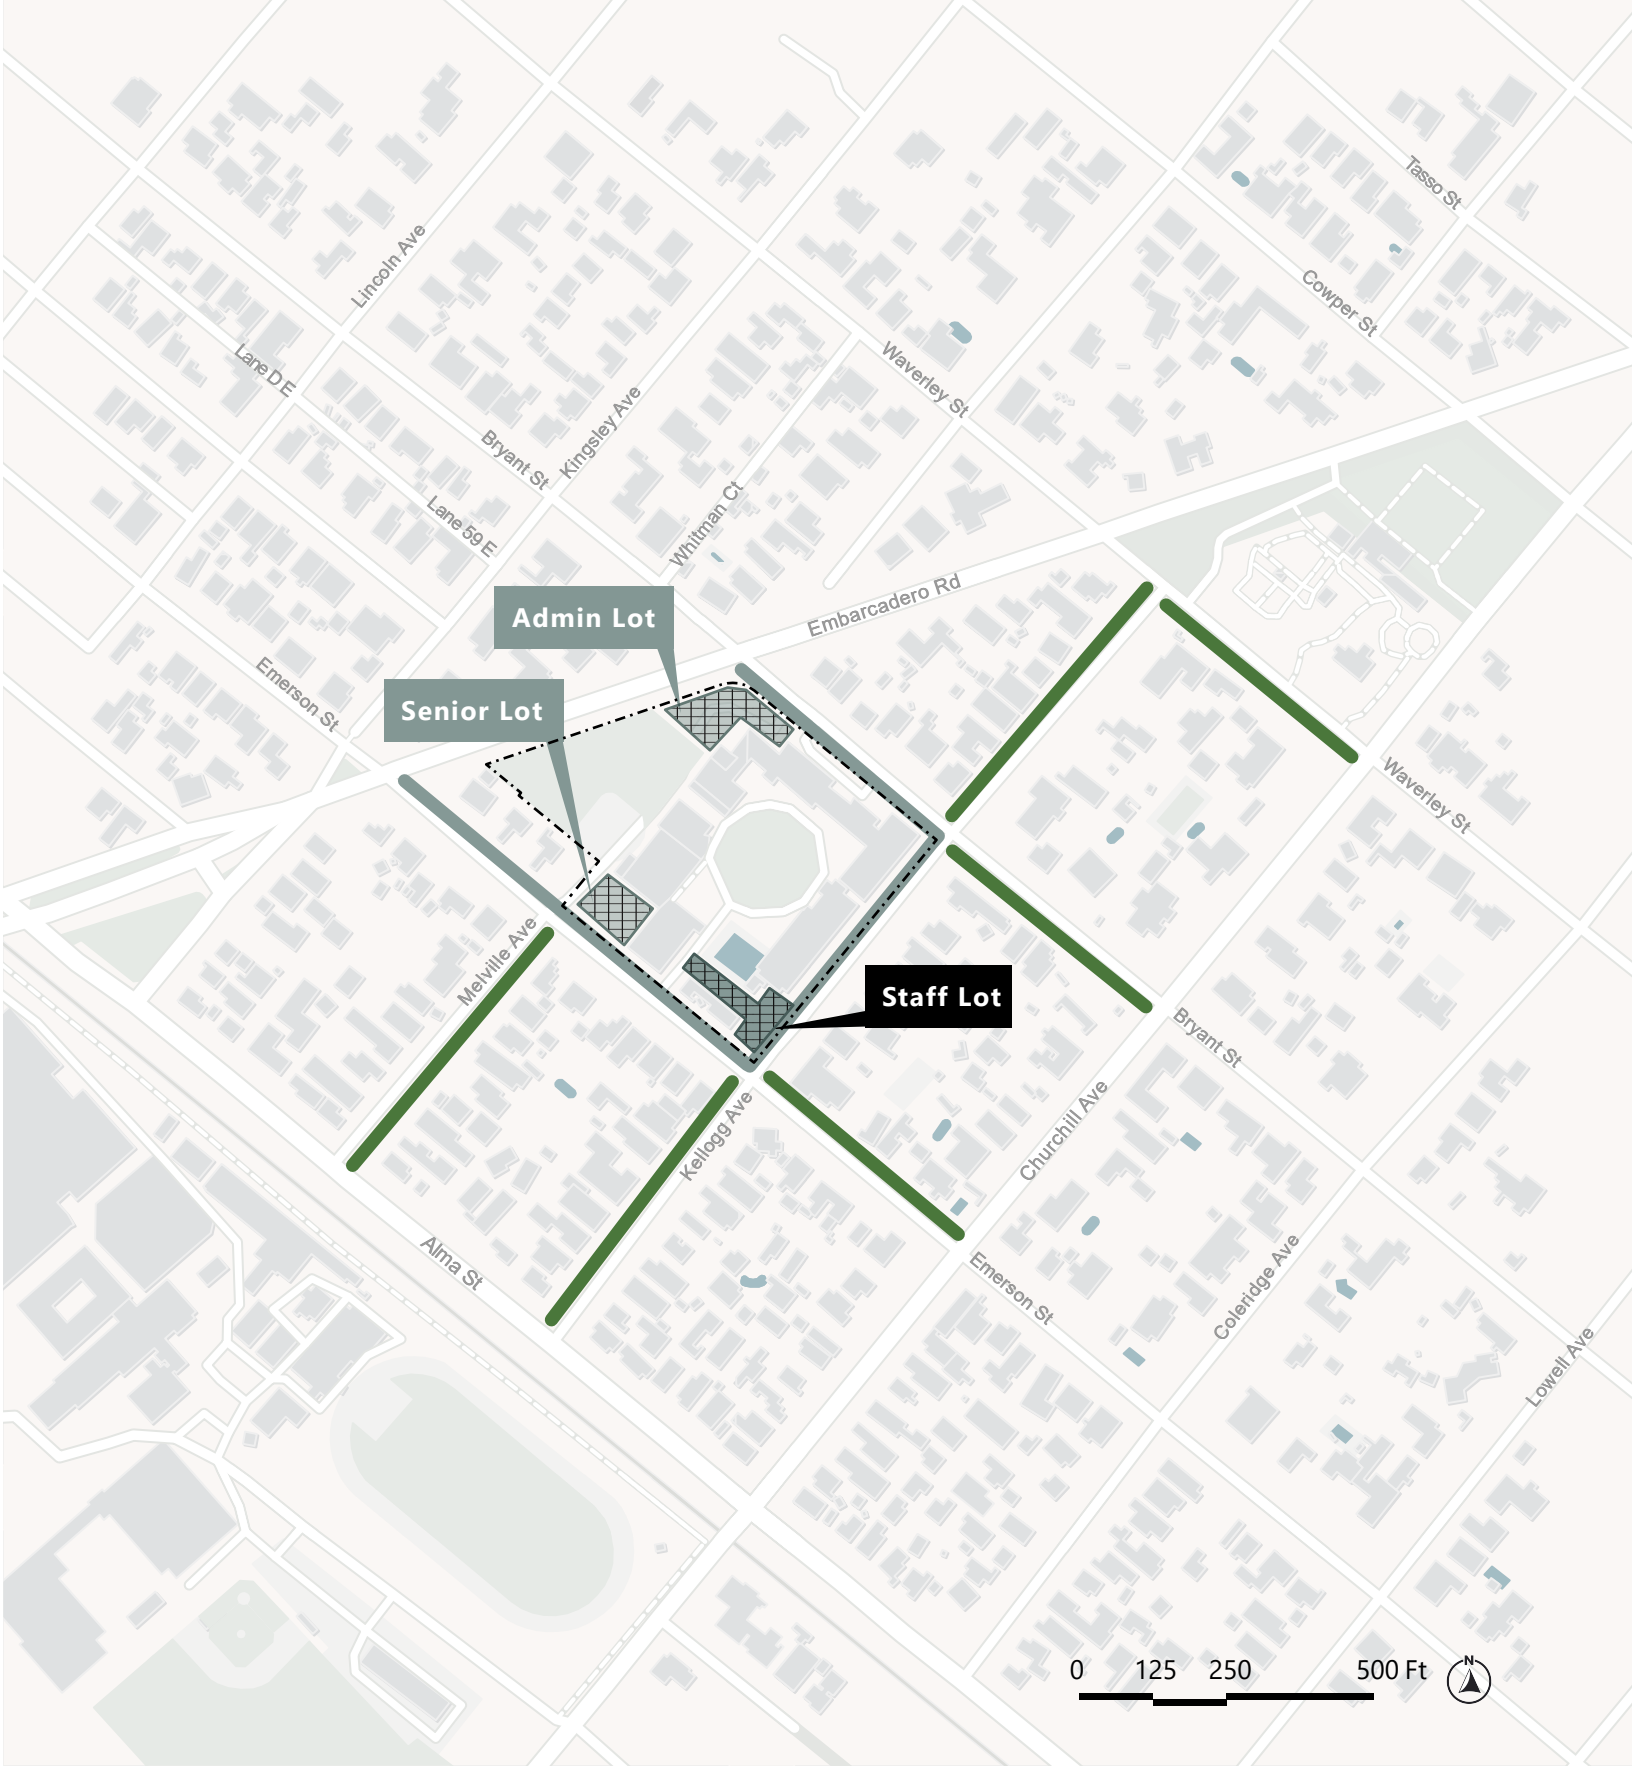

FIGURE 7

Castilleja Parking Locations

Fehr & Peers

5.3 Parking Compliance

Parking compliance is monitored by Castilleja's traffic attendants following the School's Traffic Monitoring Guidelines shown in **Appendix F**. The morning and evening traffic attendants are tasked with monitoring the surrounding areas within their sights to identify any dropping off or picking up of students as well as any other unsafe activities such as double parking. The attendants will rectify the situation immediately and remind the offender of School's parking rules. Traffic, pick-up/drop-off, or parking violations are reported via email or text to Castilleja.

All parents/guardians, students who are approved to drive, and employees are asked to register their cars. Time is set aside at the start of the school year for this process, and they are reminded throughout the year. Cars parked on campus or around the perimeter of campus that are found to not have a sticker receive a warning reminding them to register their car. Note that some cars parked on the frontage streets could be owned by non-Castilleja affiliated individuals. **Figure 8** and **Figure 9** show registration stickers and **Figure 10** shows a vehicle registration warning.

Employees and students are instructed to park on campus, at the designated remote parking lots (First Presbyterian Church and AME Zion Church), and on the school side of the blocks around the perimeter of campus. Employees, parents/guardians and students are informed that parking in the neighborhood is strictly prohibited.

Figure 8: Castilleja Vehicle Registration Sticker

Figure 9: Employee Parking Permit Sticker

Figure 10: Castilleja Vehicle Registration Required Flyer

Castilleja considers violations of traffic/parking guidelines to be serious infractions of school policy. Castilleja has sole discretion in determining what conduct violates its expectations and the appropriate consequences for traffic/parking violations. Generally, the process for traffic/parking infractions for Upper School (US) students and parents is described below, though the school may respond as it deems appropriate under the circumstances, including deciding not to follow all or any of these steps before revoking privileges in situations where Castilleja determines a serious violation occurred.

The process for traffic/parking infractions for Upper School students:

1. First Warning: The Director of Campus Operations and Compliance will ask the student to correct the traffic/parking infraction.
2. Second Warning: The Director of Campus Operations and Compliance will ask the student to correct the traffic/parking infraction and remind them of the school's parking rules. The student will be informed that a third offense will result in escalation to the US Dean of Students.
3. Third Warning: The US Dean of Students will meet with the student and notify their parents/ guardians of the repeated infractions. Together, the US Dean of Students and the student will determine appropriate consequences.
4. Fourth Warning: The US Dean of Students will meet with the student and their parents/ guardians. Senior privileges will be suspended for two weeks, while juniors will be required to attend supervised study hall and may lose their second semester privileges.
5. Fifth Warning: The Head of Upper School will meet with the student and their parents/ guardians to discuss further consequences. Senior privileges will be suspended for the remainder of the semester and juniors will lose their second semester privileges.

Parents or guardians who are caught violating school's traffic, pick-up/drop-off, or parking requirements are added to the Parking/Traffic Infractions tracking document and the parent or guardian is emailed. The enforcement process for parents/guardians is as follows:

1. First Warning: The parent/guardian receives an email explaining drop-off and pick-up procedures and rules.
2. Second Infraction: The parent/guardian receives a written warning and is notified that the next infraction will come with a fine.
3. Third Infraction: The parent/guardian meets with the division head and the parent receives a $50 fine from the school.

Castilleja emails families regarding the parking/traffic/pick-up/drop-off policy, including traffic management for special events. The copies of mailings are included as **Appendix G**.

Employee infractions are documented through the following process. Parking/traffic/access policies are shared with staff at the beginning of the school year and included in **Appendix G**.

1. 1st Infraction: The Director of Campus Operations and Compliance will notify the employee and ask them to correct the traffic or parking infraction.
2. 2nd Infraction: The Director of Campus Operations and Compliance will notify the employee, reiterate the need to correct the infraction, and remind them that dropping off, picking up, or parking in the neighborhood is strictly prohibited.
3. 3rd Infraction: The Director of Campus Operations and Compliance will inform the employee's supervisor, who will then meet with the employee to address the issue.

5.3.1 Monitoring of Neighborhood Parking

In addition to the 7 daily traffic attendants, there are floating attendants that sign up as part of the employee TDM requirement in the morning, midday, and during pick up to spot check the expanded parking area. The floating attendants look for cars that have Castilleja parking stickers. If the traffic attendants identify a vehicle with a Castilleja parking sticker the person is notified to move their vehicle immediately. Traffic attendants identified 12 cars in the current reporting period. Upon identification, students and employees are notified to move their car to an appropriate location, such as on campus, at the designated remote parking lots (First Presbyterian Church and AME Zion Church), or on the school side of the blocks around the perimeter of campus. Identified individuals are also subject to the traffic infraction process described above.

Castilleja employees that sign up as floating attendants in the morning and afternoon spot check the expanded parking area to watch for vehicles that drop-off or wait to pick-up a student. If they are identified, they are reminded about Castilleja's CUP and transportation rules.

6. COA Matrix

Table 12. Castilleja CUP Monitoring Requirements

COA/MMRP	Requirement	Index
Data and Metrics		
COA 24.b.i	Driveway volume counts by 15-minute increments	Appendix C and Appendix D
COA 24.b.ii	*Driveways & Loading Zones* – Average weekday AM peak trips and average weekday daily trips for the monitoring period, excluding construction trips, Special Event and Major Event dates and non-school days; summer school shall be separately reported and not averaged with the academic year.	Section 3.2.2
COA 24.b.iii	Total average daily weekday trips and AM weekday peak trips during the week that the campus frontage street segments are evaluated by the City.	Section 3.2.2
COA 24.b.iv	The average daily weekday traffic volumes on the campus frontage City street segments (except Embarcadero).	Section 3.3
COA 24.b.v	The dates and number of times the average weekday daily trips and/or AM weekday peak trips exceeded. AM weekday peak and/or ADT exceedance threshold, including any special, limited circumstances such as trips during construction.	Section 3.2.2

Appendix F: Traffic Monitoring Guidelines

Traffic and Neighborhood Monitoring Guidelines

Thank you for signing up to assist with our morning/afternoon traffic and/or neighborhood monitoring as required by our CUP. Your help with this will offset your TDM requirements.

We have opportunities for monitoring traffic and parking during the morning/afternoon drop-off and pick-up as well as opportunities throughout the day for monitoring parking in the surrounding neighborhood.

All monitors are required to wear a yellow vest which can be picked up at the maintenance office.

If you witness any traffic, pick-up/drop-off or parking infraction please email the transportation team at transportation@castilleja.org with the student/parents name and a description of the infraction.

At all driveways, please report any excessive vehicle queues, safety concerns, or other recommendations to improve safety and circulation to transportation@castilleja.org.

General Guidelines for Monitoring Drop off and Pick up at all Driveways

- No left turns into or out of the driveways. Right turns only. NO EXCEPTIONS! and no U-turns.
- Students must be prepared to exit the vehicle without delay. Parents should remain in the vehicle.
- Make sure students are not being dropped off or picked up in the middle of the street or across the street and that anyone affiliated with Castilleja is not parking on the neighbor's side of the street.
- Cars parking on the curbside need to pull up to the next car parked in front of them. The first car needs to pull up as far as possible.
- Monitor the cars that exit the driveways and help them avoid oncoming cars, bicyclists and pedestrians.
- Advise drivers of any violation that they commit and write down the violation and drivers name to be recorded later. You can use the clipboard provided from the maintenance office or send an email to transportation@castilleja.org .
- Middle school students get dropped off and picked up at the Bryant St. driveway. Upper school students get dropped off and picked up at the Kellogg driveway. Carpools drop off and pick up in the employee parking lot driveway. Carpools are 2 or more students being dropped off, a student and an employee or 2 employees.
- Traffic monitors are required to report any excessive vehicle queues, safety concerns, or traffic violations. For reporting please use the **transportation@castilleja.org** email.
- The Transportation Department will contact the appropriate administrator and inform them of the violation.

Bryant St. Driveway

- No left turns into or out of the driveways. Right turns only. NO EXCEPTIONS!

  Driveway Exit:
  - Stand so the drivers can see you clearly and you can see the street traffic. It is your responsibility to put your hand up to stop the driver until you give them the all clear to proceed. Bryant street is a bike boulevard and it is very important that you make sure the bike traffic is clear before giving a driver the all clear to proceed.

  Driveway Entrance:
  - Stand so the drivers can see you clearly and you can see the street traffic. There are two paths on this driveway. You will want to make sure drivers are using both. If the traffic is backing up onto the street you will need to communicate with the person working the center driveway and let them know the front person needs to circle around.

  Center Driveway:
  - Stand on the inside of the crosswalk. You will need to supervise the drivers and

Traffic and Neighborhood Monitoring Guidelines

students. Stop drivers when students are in the crosswalk.
- Ask drivers to circle around if their student is not present and there is a back up. The right side of the driveway is for staging and drivers must stay with the vehicle. The left side must continue to flow through.
- If the line of cars starts to back up onto the street and the front car's student is not ready to be picked up the driver will have to circle the block and get back in the queue.

Kellogg Avenue Driveway

- No left turns into or out of the driveways. Right turns only. NO EXCEPTIONS!
- Watch for students being dropped-off or picked-up in the middle of the street or across the street. If you see a violation, take down the name of the student and send an email to transportation@castilleja.org .

  Driveway Exit
  - Hold traffic when students are exiting the bus to make sure the students are clear before letting cars exit.
  - Hold cars until it is safe to exit.

  Driveway Entrance
  - Monitor the flow of traffic into the driveway.
  - If the line of cars starts to back up onto the street and the front car's student is not ready to be picked up the driver will have to circle the block and get back in the queue.
  - Report any excessive queues or safety concerns to transportation@castilleja.org.

Emerson Driveway Exit

- No left turns into or out of the driveways. Right turns only. NO EXCEPTIONS!
- Make sure cars parking on the curbside pull up to the next car parked in front of them. The first car needs to pull up as far as possible.
- Watch for students being dropped-off or picked-up in the middle of the street or across the street. If you see a violation, take down the name of the student and send an email to transportation@castilleja.org .

Senior Lot Entrance/Exit

- Closed for Construction

Corner Monitoritoring

- If you are signed up for corning monitoring in the AM or PM please arrive 20 minutes prior to the start or end of the school day. Pick one of the following locations: Embarcadero/Bryant, Bryant/Kellogg, Kellogg/Emerson, and Emerson/Melville.
- Pick up the clipboard for recording activity at the maintenance office and return the clipboard along with the recording sheet after you have completed your shift.
  - Ask students and employees who are walking to campus where they are walking from. We want to identify if they were dropped off or picked up in the surrounding neighborhood. If you suspect they were dropped off or picked up in the neighborhood, notify the offender about the rules and let them know this is their first warning and mark down their name, grade, offense.
  - Look down the streets to see if anyone coming to Castilleja is parking or getting dropped off in the neighborhood. Advise those who have parked or have gotten dropped off in the neighborhood that it is a violation of our CUP and they will be reported. Write down the violation and name of the student or driver for follow up.

Traffic and Neighborhood Monitoring Guidelines

Neighborhood Monitoring

- If you are signed up for neighborhood monitoring you can do this during your free period throughout the school day.
    - Please walk up to 2 blocks from Castilleja on the following streets: Kellogg Avenue, Waverley, Bryant, Emerson, Melville (Between Emerson and Alma). You are looking for cars with either a student or employee sticker. If you identify a vehicle parked in the neighborhood that has a Castilleja parking sticker, report the sticker and make of car to transportation@castilleja.org.
    - The Transportation Department will contact the appropriate administrator and inform them of the violation. The employee or student will be asked to move their car and the infraction will be entered into our parking infractions form.

Appendix G: Communications to Families, Employees and Visitors

G1. CastiNews Transportation Communications

Our weekly all-community newsletter, "CastiNews," always includes the following transportation and TDM blurbs:

TRANSPORTATION

Thank you for your support and cooperation!

AFTER-SCHOOL TRANSPORTATION FOLLOWING ATHLETICS

We offer the following transportation options:

- Morning and afternoon bus/shuttle
- Shuttles between campus and the University Avenue Caltrain station from 7:40 to 8:20am and from 3:20 to 6:35pm.
- If your student participates in after-school athletics, you will need to either pick up your student from campus, or have them take the Caltrain shuttle. Teams practicing off campus will be driven back to campus for pick up.

Questions about Transportation? Email transportation@castilleja.org.

SHUTTLES

Castilleja offers morning and afternoon shuttle service from numerous locations, including the Palo Alto University Avenue Caltrain station. Review the shuttle routes and find the morning and afternoon shuttle signup forms here.

TRANSPORTATION AND PARKING PORTAL

Please familiarize yourself with our Transportation and Parking Portal for families. Here you will find details about:

- Shuttle routes
- Car registration
- Pick up/drop off instructions
- Carpool with other families

You can find it under "Transportation" in the Parent/Guardian Portal. Questions about TDM and Transportation? Contact Assistant Superintendent of Buildings and Grounds Vince Dailey and/or Director of Campus Operations Nikki Myers.

REGISTER YOUR CAR/PARKING STICKER

All student and parent/guardian vehicles that come to campus must have a parking sticker affixed to the vehicle's front windshield. Register your vehicle here. Once your registration request has been processed, your parking sticker(s) will be mailed to you.

DROP OFF AND PICK UP

- Middle School students should be dropped off and picked up at the Bryant Street driveway.
- Upper School students should be dropped off and picked up at the Kellogg Street driveway.
- Please do not arrive early. Students are dismissed at 3:15pm, so 3:20pm is a good time to arrive to pick up your student. If cars are backed up in the driveway and onto the street, you will be asked to circle the block if your student is not ready at their pickup location.
- Pick up after athletic practices, rehearsals, and other after-school activities will be in the Employee Lot by the pool gate (accessed via Kellogg).

Dropping off or picking up anywhere in the neighborhood is strictly prohibited. This includes waiting in your car for dismissal. Remember to always follow the instructions of the parking attendant and monitors.

CIRCULATION

If you must drive, please follow these guidelines when driving through the neighborhood:

- **Traffic flows clockwise** (right turns only)
- **No left turns** into or out of campus driveways are permitted at any time.
- **No pick-up or drop-off is allowed in the street.** All cars must travel through Castilleja's driveways in order to drop-off or pick-up.
- **Watch for bicycles and pedestrians:** Bryant Street is an official Bike Boulevard. Exercise special caution when driving and parking on Bryant Street.
- **No double-parking** is permitted at any time.

Please see the campus circulation map here.

G2. TDM Email to Families

Dear Castilleja Students, Parents, and Guardians,

As we continue to work to reduce our impact on the neighborhood and comply with our Conditional Use Permit (CUP) guidelines from the City of Palo Alto, we expect every employee, student driver, and parent/guardian to support our Traffic Demand Management (TDM) program by adopting new ways to commute to campus.

Below, you will see all of the ways that Castilleja is here to help support you in this effort, but first **I want to highlight important parking guidelines.**

- **Parents and Guardians:** If you must drive a car to campus, you can park in designated visitor spaces in the Bryant Driveway from 8:40 to 2:50pm or on the school side of the street on Bryant, Kellogg, and Emerson.
- **Student Drivers:** Seniors should park in the numbered spots at the First Presbyterian Church. Juniors should use satellite parking at the AME Zion Church with shuttle service to and from campus. Sign up for the shuttle via this link.
- All other parking around campus and in the neighborhood is in violation of our CUP.

We want to partner with you to help you find the best choice for your family. **Please see below for details about different TDM options for your commute, including free bus and shuttle services in the morning and afternoon provided by Castilleja.** Thank you in advance, and if you have any comments, questions, or suggestions, please do not hesitate to contact us.

Sincerely,

Nikki Myers
Director of Operations and Interim Director of Facilities

Alternative Methods of Transportation

We expect families to use one of the following forms of transportation at least three times a week.

- **Bike or Walk to Campus:** These are great alternatives if you live within 1-2 miles of school, and we have ample bike parking on campus. Explore bike routes here:
    - Castilleja School Safe Bike Entry Route
    - Castilleja School Safe Bike Exit Route.
- **Take Castilleja Morning and Afternoon School Shuttles:** Castilleja has six shuttle routes, including San Carlos, Portola Valley/Stanford Hill, Menlo Park, Los Altos; Burlingame/Woodside, and East Palo Alto. View the route schedule and sign up here.
- **Ride Caltrain and Catch the Shuttle:** Consider Caltrain. Our shuttle picks up at the University Avenue Station in the morning and drops off after school. Find the Caltrain schedules here and the Shuttle Sign Up here. Shuttles are also available throughout the day as needed.

Carpool to School

Looking for a carpool or friends for your daughter to walk or bike with? Fill out this form and we can help with making those connections.

Circulation Requirements

If you must drive, please follow these guidelines when driving through the neighborhood:

- **Traffic flows clockwise** (right turns only). See the Circulation Map for details.
- **No left turns** into or out of campus driveways are permitted at any time.
- **No pick-up or drop-off is allowed in the street.** All cars must travel through Castilleja's driveways in order to drop off or pick up.
- **Watch for bicycles and pedestrians**: Bryant Street is an official Bike Boulevard.
- **No double-parking** is permitted at any time.
- **Traffic must move** at all times on Kellogg, Bryant, Emerson, and Embarcadero. If a line is forming from the driveway onto the street, please circle the block.

Drop-Off and Pick-Up

Any car driving to campus must be registered via the Vehicle Registration Form and have a parking sticker affixed to the lower right hand corner of the windshield. Student drop-offs and pick-ups are not allowed in the surrounding neighborhood or on the street. All student drop-offs and pick-ups must take place in the following locations:

- **Middle School:** Drop-off and pick-up for the Middle School will be on Bryant Street. For families with students across both divisions, use Bryant Street.
- **Upper School:** Drop-off and pick-up for the Upper School will be on Kellogg Street.
- **Carpools:** Please use the Employee lot, entering on Kellogg Street and exiting on Emerson Street. Students with a learner's permit may drive through the carpool lane to give additional time to switch drivers.
- **Pickup after athletics practices:** Please use the Employee lot, entering on Kellogg Street and exiting on Emerson Street.

{TDM Operations Guide and Manual}

G3. Email to Juniors (08/18/2025)

Dear Juniors,

As we embark on the 2025–26 school year, please review the following important information to help ensure a smooth and safe experience. **Please note:** Parking guidelines go into effect on **August 18, 2025**. Make sure your car is registered **before** that date.

Parking

- All juniors who wish to drive to school must park at **University AME Zion Church**, located at **3549 Middlefield Rd.**
- Be sure your vehicle is registered and displays the appropriate Castilleja parking sticker.

Morning Shuttle

- The shuttle departs at **8:10 a.m.**
- Please plan accordingly, as the shuttle ride takes approximately **10–15 minutes**.
- If you need a ride outside of this time, call the transportation line at **650-470-7878**.

Afternoon Shuttle

- The standard afternoon shuttle departs at **3:45 p.m.**
- For transportation at other times, please contact the transportation line.

Shuttle Upon Request

- Shuttle service is available outside of regular times, including evenings. Call **650-470-7878** to request a ride as needed.

Be Courteous

- Please be respectful of the church property and our surrounding neighbors. Your cooperation helps maintain a positive relationship with our broader community.

Reminder

- Juniors who drive to school must park at Per our **Conditional Use Permit** with the City of Palo Alto, students are **not permitted to park on campus or in the surrounding neighborhood** at any time.

Parking Policy

- Please refer to the **Student/Parent/Guardian Handbook** (page [insert page number]) for full details on Castilleja's parking policies.

If you have any questions about parking or transportation, you can refer to the parking/transportation page on the student portal, or reach out to **Ms. Myers, Director of Operations**. For all other inquiries, contact **Mr. Hatala, Head of Upper School**.

Thank you for your attention to these details and your continued cooperation.

G4. Email to Juniors (08/21/2025)

Hello All,

You are receiving this email because you filled out the Student Parking Form. A few reminders as the school year begins:

- **Parking Permit Pickup:** If you have not yet picked up your parking permit, please do so at the front desk. *(Note: You may park tomorrow, 8/22, without the permit as a one-day grace period.)*
- **Permit Placement:** Please display your permit on the **lower passenger-side windshield**.
- **Available Spaces:** We have **20 spaces available at: U AME Church** 3549 Middlefield Rd, Palo Alto, CA 94306
- Please refer to the image below for the designated spaces.

Castilleja School Parking Spaces at University AME Zion Church

- **Restricted Parking:** Parking is **not allowed around campus or in the neighborhood**. Juniors may only park at U AME Church for the duration of the 25/26 school year.

If you have any questions, please feel free to reach out to me or Mrs. Myers.

Welcome to your Junior Year!

G5. Email to Seniors (08/18/2025)

Dear Seniors,

As we embark on the 2025–26 school year, please review the following important information to help ensure a smooth and safe experience. **Please note:** Parking guidelines go into effect on **August 18, 2025**. Make sure your car is registered **before** that date.

Parking

- All seniors must park in the **numbered spots** at **First Presbyterian Church**, located in the lot on **Lincoln Street**.
- Make sure your car is **registered** and displays the **appropriate Castilleja sticker**. Register your car here.
- **Unregistered vehicles** or vehicles parked in **unnumbered spots** are subject to towing by First Presbyterian Church.

Shuttle Service

- For your safety, shuttle service is available **after dark**.For evening rides, call our transportation line at **650-470-7878** (save this number in your phone).

Equipment Pickup

- If you need help transporting equipment or belongings that are difficult to carry, contact **Mr. Vince Dailey**, Assistant Superintendent of Building and Grounds, or call the transportation line.

Staying Late

- If your vehicle will remain in the lot **after 6:00 p.m.**, please complete the **Google Form** provided by Ms. Myers.

Crossing Embarcadero

- Please use caution and be alert when crossing Embarcadero Road. Your safety is our top priority.

Time Management

- The walk to and from First Pres typically takes **7–10 minutes**. Plan accordingly to arrive on time.

Be Courteous

- Be respectful of church property and our neighbors. Your cooperation helps maintain a positive relationship with the surrounding community.

Reminder

- Per our **Conditional Use Permit** with the City of Palo Alto, seniors are **not permitted to park on campus or in the surrounding neighborhood** at any time.

Parking Policy

- Please review Castilleja's parking policies in the **Student/Parent/Guardian Handbook** (see page [insert number]).

If you have questions about parking or transportation, you can refer to the parking/transportation page on the student portal or contact **Ms. Myers, Director of Operations**. For all other inquiries, reach out to **Mr. Hatala, Head of Upper School**.

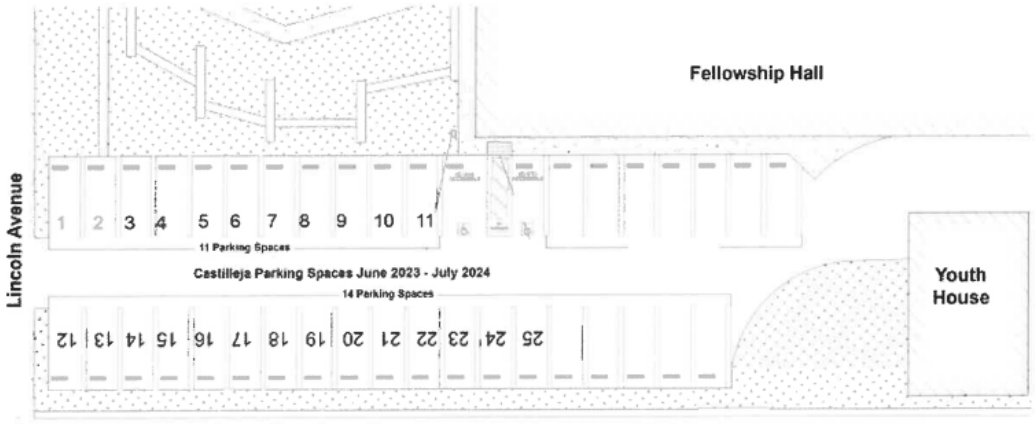

Thank you for your attention and continued cooperation.

G6. Email to Seniors (08/21/2025)

Hello All,

You are receiving this email because you filled out the Student Parking Form. A few reminders before the school year begins:

- **Parking Permit Pickup:** If you have not yet picked up your parking permit, please do so at the front desk. *(Note: You may park tomorrow, 8/21, without the permit as a one-day grace period.)*
- **Permit Placement:** Please display your permit on the **lower passenger-side windshield**.
- **Available Spaces:** We have **25 spaces available**. Please refer to the image below for the designated spaces.

- **Restricted Parking:** Parking is **not allowed around campus or in the neighborhood**.

If you have any questions, please feel free to reach out to me or Mrs. Myers.

Welcome to your Senior year!

G7. TDM Email to Employees

Hello Everyone,
Happy Monday! I hope you're feeling prepared and excited as we kick off what's sure to be an amazing school year. Before we settle in, I wanted to share some reminders about our TDM commitments and daily sign-ins.

Daily Sign-Ins
Please remember to sign into **Ruvna** each day you're on campus. This is essential for safety and our only way to know who is present in the event of an emergency. This is also how we collect data required by the city for our monitor reports.

Daily Transportation Survey
Be sure to complete the daily **transportation survey**, it's how we track your TDM incentive and it is another data collection point required by the city for our monitor reports.
Surveys are sent via your preferred method (text or email). If you haven't shared your preference yet, click **here** to let me know! Returning employees: no action needed if your preference remains the same.

Parking & Traffic Brigade
If you plan to park on campus (either on the street side of Castilleja or in the employee lot) more than once a week, sign up for **Traffic Brigade** or consider driving a **Castilleja shuttle**. Please only sign up for the upcoming week. This helps ensure that spots remain available for others and avoids situations where people forget they've signed up weeks in advance. New to the Traffic Brigade? Reach out to me or Vince Dailey for instructions and to get your yellow vest—it's a simple way to contribute to our shared campus responsibility.

Remote Parking
Our remote parking lot is at **University AME Zion Church**.

- Morning shuttle: **8:10 a.m. pickup**
- Afternoon shuttle: **3:45 p.m. drop-off**
  Need a ride outside those times? Call the **transportation line** at **650-470-7878**.

Vehicle Registration
If you haven't registered your vehicle yet, please do so **here**—it just takes a minute!

Please review our **TDM Operations Guide and Manual**.

If you have any questions, feel free to reach out or visit the **transportation page on the employee portal**. Thanks so much for your cooperation—and here's to a fantastic 2025–26 school year!

G8. Employee Parking Communications

Hello All,

A quick reminder: **tomorrow employees may park anywhere in the neighborhood!**

Starting tomorrow and going forward, employee parking will be available in the following areas:

- **Perimeter of campus (campus side of the street):** Please pull all the way up and leave minimal space between cars to maximize capacity.
- **Employee parking lot by Maintenance:** 20 spaces available, including **2 ADA** and **3 EV charging spaces**. These are first-come, first-served.
- **AME Church (3549 Middlefield Rd, Palo Alto):** Employees who park here also receive **$5 TDM cash**.

Please note: Parking at **First Presbyterian Church** is currently reserved for seniors and is not available for staff until further notice. Once we have a clear count of spaces that may be shared with staff, additional communication will be sent.

In the meantime, if you have any questions, please don't hesitate to reach out.

Thank you all for your continued support and patience around parking!

G9. CastiNews Special Events Blurbs July–October 2025

As per our CUP, we include special event parking information in our weekly newsletter, CastiNews. Below are CastiNews blurbs from this monitoring reporting period:

August 8, 2025:

NEW! AFTER-SCHOOL TRANSPORTATION

We offer the following transportation options:

- Morning and afternoon bus/shuttle
- Shuttles between campus and the University Avenue Caltrain station from 7:40 to 8:20am and from 3:20 to 6:35pm.
- If your student participates in after-school athletics, you will need to either pick up your student from campus, or have them take the Caltrain shuttle. Teams practicing off campus will be driven back to campus for pick up.

Questions about Transportation? Email transportation@castilleja.org.

August 15, 2025:

NEW! PARKING FOR UPCOMING EVENTS

The 6th-grade Family Ice Cream Social is on Saturday, August 16. Please park in the lots on campus and along the curb around campus. Please do not park in the surrounding neighborhood. School activities will begin Monday, August 18, for some grades. Please remember to use the following drop-off locations:

- Middle School: Bryant Street
- Upper School: Kellogg Avenue

- Carpool: Use the Employee Lot and drop your student(s) near the pool gate

NEW! OPENING DAY DETAILS

For this event, parking is permitted in the neighborhood. Arrive early enough so you have time to walk to campus from two blocks away. Please follow the instructions of the parking attendants.

Shuttle Service:

- Afternoon shuttles will run on Thursday, August 21. Normal shuttle service, morning and afternoon, will run on Friday, August 22.

October 3, 2025:

NEW! MIDDLE SCHOOL SWIM MEET PARKING

Please find parking on the campus curbside along Bryant, Kellogg, and Emerson. Limited parking is available in the employee parking lot and in the visitor spots in the Bryant driveway after 3:45pm. Per our CUP, there is no parking allowed in the neighborhood. Please follow the instructions of the parking attendants.

IMPORTANT REMINDER

Please do not arrive early for after-school pick-up; students are dismissed at 3:15pm. Dropping off or picking up anywhere in the neighborhood is strictly prohibited. This includes waiting in your car for dismissal. All drop-offs and pick-

ups should occur in the Bryant or Kellogg Driveways. Pick up for after-school activities is in the Employee Lot by the pool gate (accessed via Kellogg).

G10. MS Swim Meet Communications

As many of you are aware, we have **VERY STRICT TRAFFIC AND PARKING LIMITATIONS** at Castilleja. We are asking every school to communicate the relevant information with anyone from their school community that may be attending the swim meet. Below is a sample email that you can send out to your school community, athletes, and families. If your school has a different way of communicating information, that is fine. Please let me know how and when you will be getting this message out to your community so that I can report it back to my transportation and compliance team.

Here is the sample email to send to your drivers and families:

Dear Drivers and Attendees,

Construction has started at Castilleja. Please be aware of the following parking guidelines when attending events at Castilleja School:

1. ***Neighborhood Parking:*** *Parking in the neighborhood surrounding Castilleja School is strictly prohibited. Please use our designated parking lot and curbside parking on the campus side of the street for visiting teams and spectators. You may also park on the right hand side of the Bryant driveway and the 2 spots at the end of the Bryant driveway* ***after 3:45pm.*** *Please refer to the attached map.*
2. ***Arrival and Departure:*** *When arriving at our campus, please adhere to the right-turn-only rule when entering and exiting our parking lots and driveways.*
3. ***Campus Entry:*** *All visitors must enter through the Pool Gate. Please refer to the attached map for detailed directions.*
4. ***Bus Parking and Unloading:*** *Buses can park and unload* ***only*** *in the designated bus parking location on Kellogg. If the bus needs to stay throughout the competition, it can remain in the designated area after 3:30 p.m. For arrival times earlier than 3:30 p.m., buses must*

leave and return after this time. ***Please note:*** *Buses may not loiter/wait/or park in the neighborhood.*

If you have any questions or concerns regarding transportation to Castilleja, please contact Kelly Young, Middle School Athletic Director at kyoung@castilleja.org.

Best Regards,

Mr. or Ms. _____

Kindly share the above message and the campus map with your fans and drivers attending the event. Vehicles parked in unauthorized locations will be asked to relocate to designated parking areas.

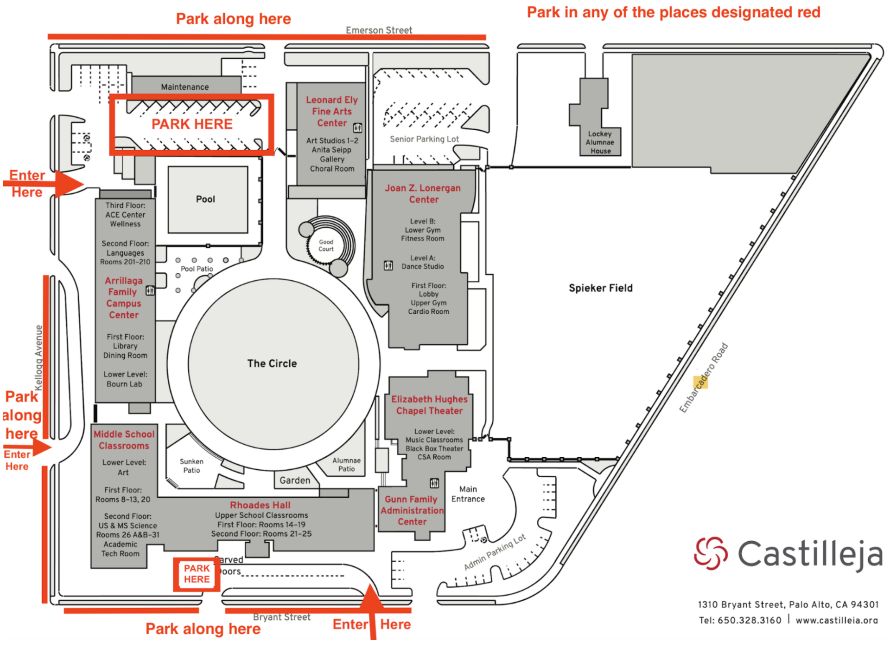

Thank you for your cooperation in helping us maintain a smooth and respectful parking experience for all attendees.

As a reminder, our swim meet must conclude prior to 6pm due to our CUP limitations with the City of Palo Alto. I know teams and families like to celebrate with snacks after competitions, but we kindly ask that you remind your teams that they cannot do so if timing does not permit.

Looking forward to hosting you and your team! Please let me know if you have any questions.

Best Regards,

Kelly Young

Appendix H: 2025-2026 TDM Operations Guide and Program Manual

Castilleja School

2025-26

Transportation Demand Management

Operations Guide & Program Manual

An annual consolidation of Castilleja School TDM mitigation practices & requirements

OVERVIEW OF TDM PROGRAMS & OPERATIONS MANAGEMENT

This Operations Guide provides an overview of the planned mitigation strategies for the 2025-26 academic year to achieve our AM peak trip threshold of 383 trips and our Average Daily Trip (ADT) threshold of 1198. It contains appropriate measures and elements consistent with other Palo Alto, Santa Clara County, and regional commute programs, as well as the required COA's and Mitigation Measures required by the RLUA. The goal is that by implementing the strategies listed in this Operations Guide, Castilleja will successfully reduce trip counts and impact to the neighborhood.

The Operations Guide is categorized in the following sections:

I. Modes of Transportation
II. Communication and Education
III. Traffic and Parking Management
IV. School Operations
V. Monitoring and Reporting

Modes of Transportation

CARPOOLING

Castilleja actively encourages carpooling for employees, students, and parents/guardians. For employees, we offer cash incentives to those who commute with two or more in a car not in the same family. For students and parents/guardians we have programs in place to support the matching of families. In addition, Castilleja offers carpoolers in electric vehicles priority in using chargers in the employee parking lot.

- **Student Carpool Facilitation:** Castilleja's student carpool matching efforts include a parent representative who contacts households that live near an active carpool or live near other homes to help foster a carpool arrangement between these families. Parents looking for a carpool match can fill out the online form located on our website. A member of our parent community uses the survey results to help facilitate carpool matching.

- **Employee Carpool Facilitation**: Castilleja has a spreadsheet for employees on the Employee Transportation Portal for employees wishing to find a carpool partner.

WALKING AND BIKING

Castilleja actively encourages walking and biking to school for both students and employees that live within a 2-mile radius of campus. For employees we offer a cash incentive for walking or biking to school. For employees and students, we provide on-site bike repair equipment and conduct bike safety and maintenance clinics.

- **Bicycle and Pedestrian Connections:** Bicycling and walking are an alternative to the private automobile. They are also zero-emission modes of transport and, therefore, every trip converted from a car to a bike or walk helps our air quality. Castilleja supports and encourages biking and walking programs. Our new campus will incorporate bicycle lanes and paths to promote bike commuting and walking.

- **Bicycle Parking:** Castilleja provides more than 100 secure bicycle facilities which is currently more than enough bike parking for all of our students and employees who wish to commute to Castilleja by bicycle. For our campus remodel Castilleja plans to install 140 Class II secure bicycle parking facilities for bicycle commuters. Castilleja counts bicycle parking daily. As the demand for bicycle facilities expands, Castilleja will add more racks to accommodate the growing number of bicycle commuters.

- **Bicycle Repair Fix It Station:** Castilleja has a bicycle Fix-it station in the maintenance office. The bike Fix-it station includes an air compressor and a bike repair kit. We have

staff that will assist any students or employees that need help with maintaining their bike.

- **Bicycle Tune Up Day:** Castilleja hosts one to two free events during the school year with a local bicycle shop or mobile service to provide free bicycle mini-tune-up or maintenance checks for all students, faculty, and staff. Tune-up events help promote the Bike-to School Days campaign.

- **Bicycle Safety Education:** Castilleja hosts a bicycle safety education class taught by staff or a local bicycle advocacy organization twice per year. The bike safety workshop will review bike riding basics, family biking tips, and general bike mechanics.

- **On-Campus Bikeshare:** Castilleja currently has two school-owned bicycles for employees to use for lunchtime recreation or daytime errands.

- **Walking or Biking to Campus Guidelines**: Castilleja provides safe route mapping for biking and walking to school to students and employees. According to WalkScore.com, Castilleja rates a 72 out of 100 as a "very walkable" location.

TRANSIT, VAN, AND SHUTTLES.

- **Free School Bus and Van Service:** Castilleja offers free school bus and van service from Burlingame, San Carlos, Woodside, Portola Valley, the Los Altos region, East Palo Alto, and Menlo Park. This free service is available to students and employees. The school bus routes are listed on the Castilleja internal transportation resource portal, https://www.castilleja.org/transportation-and-parking/schedules.

- **Caltrain Shuttle Van:** Castilleja operates four to five last-mile van pick-up services for students and employees traveling to and from school via Caltrain. The van picks students and employees up at the Palo Alto University Avenue Caltrain Station in the morning and provides return service to the station after school. The Caltrain shuttle schedule can be found on our internal transportation portal https://www.castilleja.org/transportation-and-parking/schedules.

- **Student Parent/Guardian Incentive Program**: We currently offer our school bus/van and shuttle services free of charge to our students and employees. We routinely monitor

our current routes and look for opportunities to add or alter routes as needed.

Communication and Education

Castilleja TDM Resource Portal Webpage

- **Castilleja Commuter Resource Webpage (Portal):** Castilleja maintains web pages containing transportation resources and policy information for parents/guardians, students, and employees. Traffic reduction is a priority for the school. All school community members must abide by the school's TDM plan, posted on the Employee, and Parent/Guardian portals. The portals include instructions regarding all parking, car registration, and traffic circulation guidelines and the expectations that students, parents, and employees make every effort to reduce their transportation impact.

- **Employee Portal TDM Webpage:** Our employee transportation and parking TDM webpage contains some of the following information:
  - Parking requirements for employees who bring a car to campus
  - Information about our loaner bicycles
  - TDM pledge and trip reduction policy
  - Describes our 2025/26 employee incentive program
  - Links to: Bus/Van/Shuttle Schedules and Vehicle Registration

- **Parent/Guardian Portal Transportation Webpage:** Our parent/guardian transportation portal page contains some of the following information:
  - Traffic and trip reduction policy
  - Parking guidelines
  - Who can drive to campus (Seniors only)
  - Our van/bus shuttle program and links to the schedule
  - Link to our vehicle registration form

Student Parent TDM Communications

- **Student TDM Communications:** At the start of each semester Castilleja will remind Seniors that they must register all cars that will be driven to campus and/or our satellite parking lot and review the traffic and parking policies. For the 2025/26 school year we have started issuing yellow stickers to our students to easily identify our Senior drivers. In addition we have linked the process for issuing Senior driver car stickers to our “Senior

Privileges" to better incentivize drivers to register their vehicles.

- **Student & Parent/Guardian School TDM Communications:** Castilleja sends out emails and our weekly newsletter communications to inform students and parents/guardians of the following:
  - Commuter policies
  - Transportation & free bus/shuttle services
  - Parking updates and information
  - School traffic TDM requirements
  - Alternative options to consider such as biking, walking, carpooling or using the free bus/shuttle service

- **Student & Parent/Guardian Traffic Reduction Policy:** At the start of each school year and the second semester families receive communication about the importance of limiting the school's traffic impact on the surrounding neighborhood through transportation marketing materials, the handbook, and our TDM Transportation portal page. All students and parents are encouraged to carpool, ride Caltrain, and use the school's buses and shuttles. Students who live near campus are encouraged to walk or ride a bike to school.

- **Student & Parent/Guardian Handbook TDM Information**: At the start of each school year students and parents/guardians are provided a handbook with our traffic rules and consequences for non-compliance. All students and parents/guardians are required to sign a form attesting that they have received and read the handbook.

CASTILLEJA NEWS TRANSPORTATION SECTION NEWSLETTER

- **Castilleja's Weekly Newsletter:** CastiNews is Castilleja's weekly newsletter and includes information about events, parking, and traffic minimization. CastiNews goes to parents/guardians and employees and includes a transportation and parking section. This section is used to provide traffic and parking updates for special events or any general updates as needed.

Traffic and Parking Management

Parking Restrictions

- **Restrict Student Driving and Parking on Campus**: Juniors are prohibited from driving and parking on or around campus.

- **Campus Parking:** Students, parents/guardians, visitors and employees are informed that they may only park on campus, in the schools remote lots, and on the school side of the street around campus.

- **Designated Student and Employee Parking Program:** The school has created dedicated senior student parking at First Presbyterian Church and employee parking in the Kellogg/Emmerson lot. In addition, Castilleja has reserved EV Parking for employees that carpool and drive an Electric Vehicle. All visitors to campus are instructed to use the visitor spots in the Bryant Driveway.

- **Visitor Parking Lot:** Designated visitor spots are located in the Bryant Driveway. All visitors to campus are instructed to use those parking spaces or park on the school side of the street.

Off-Campus Parking

- **Remote Parking Facilities:** Castilleja currently leases 25 parking spaces at First Presbyterian Church for use by seniors allowing them to park and walk to campus. Castilleja also currently leases 20 parking spaces at University AME Zion Church for

students and employees. There is a shuttle that runs between AME church and the school in the morning and in the afternoon.

- **Rules for parking at the off-campus lots:**

First Presbyterian Church

- ❖ Parking is allowed 6:00 a.m. - 6:00 p.m.
- ❖ No moving your car to campus during the school day
- ❖ Be respectful of the neighborhood: Keep quiet when returning to your car.

Zion Church

- ❖ Parking is allowed 6:00 a.m. – 8:00 p.m.
- ❖ Sign up to schedule shuttle service
- ❖ Be respectful of the neighborhood: Keep quiet when returning to your car or waiting for the shuttle.

SPECIAL EVENT PARKING MANAGEMENT

- **Special Event Parking and Traffic Management:** Castilleja will review the parking and traffic requirements for each special event included in our special event list provided to the City at the start of the school year.

Castilleja will implement special event parking management mitigation measures (listed below) for events that fall into the following categories:

- Major Events
- Special Events taking place 8:45 a.m. - 3:30 p.m, with greater than 80 guests
- Special Event taking place outside of instruction hours with greater than 160 guests.

- **Special Event Parking Mitigation Measures:**

✓ Provide traffic monitors to make sure that all vehicles park legally and safely.

✓ Provide shuttles to Caltrain and publish the shuttle schedule in CastiNews.

✓ Make every effort to arrange off-site parking with nearby parking lots and provide shuttle service to and from the parking locations.

- A Castilleja employee is on premises weekdays until 10 pm and Saturdays until 4 pm. A contact sheet is provided to employees should an unforeseen disruption occur outside of those hours.

- **Parking for School Committee Meetings:** For school committee meetings Castilleja will coordinate a parking plan and shuttle schedule when needed. The parking plan and shuttle schedule will be communicated via CastiNews and/or included in committee member communications. At the start of these meetings leaders will be instructed to remind guests of our parking policies and ask guests that are not parked in an approved location to move their cars.

Summer Camp Parking and Traffic Management

- **Summer Camp Parking Mitigation Measures:** Summer camp drop-off and pick-up will be conducted on campus. Camp employees will facilitate getting campers into vehicles and ensure all parking/traffic policies are being followed. It will be the responsibility of the Director of Summer Camp to enforce the policies with parents.

Traffic Rules, Enforcement, Monitoring and Management

- **Daily Traffic Management:** Castilleja uses school employees and security guards to help enforce all of our traffic rules. Castilleja traffic monitors will be identified by wearing a highly visible safety vest. During peak traffic times in the morning and afternoon Castilleja uses attendants to enforce the following rules and safety measures:
  - Right turn only rule into and out of campus driveways and parking lots
  - Make sure cars do not back up on Kellogg, Bryant, Emerson or Embarcadero
  - No double parking in the neighborhood
  - No drop-off/pick-up of students outside of approved drop-off locations

- No blocking the neighbor driveways at any time.
- Maintain traffic flow in driveways. Drivers are directed to circle the block and return if their student is not at the pick-up location.
- Monitor the exit onto Bryant street to assure that the bike route is kept safe upon exiting.

• **Traffic Monitor Training:** At the beginning of the school year school traffic monitors are trained on the above procedures as well as being instructed to report any excessive vehicle queues, safety concerns, or other concerns or recommendations to improve safety and circulation.

• **Daily Onsite and Surrounding Public Street Parking Oversight:** At least once per day traffic attendants will monitor parking onsite and on surrounding public streets. Any offenders are notified to move their car and added to our violation list for follow up if necessary.

• **Student Drop-off and Pick Up Distribution:** Castilleja has multiple drop-off and pick up locations. Morning drop-offs and afternoon pick-ups are positioned in separate locations depending on grade level, carpool, and multi grade level families. Families who carpool use the priority loading area in the Employee Lot located by the pool. Castilleja attempts to distribute a portion of users at drop-off/pick-up areas (43% Bryant St, 30% Kellogg Ave, and 27% Bryant St. onto Emerson St.) to manage peak-hour traffic more efficiently. Castilleja will routinely monitor and reassess the drop-off/pick-up assignments to balance traffic flow and mitigate any back up onto the surrounding streets.

School Operations

Transportation Coordinators: Castilleja has designated two staff members to support the school's transportation facilities and programs. One staff person has a primary responsibility to oversee and manage transportation programs for the school. A second staff member aids and supports the transportation coordinator.

Vehicle Registration and Permitting: Vehicle registration and permitting are required for all students, parents/guardians, and employees. The Transportation Portal houses the link to the Vehicle Registration form. Once the form is completed, the School will issue a parking sticker, which must be affixed to the lower right-hand corner of the car's windshield.

EMPLOYEE TDM POLICY

- **Start of School Year Employee TDM Communication:** At the start of each semester Castilleja sets aside time for employees to register their cars, receive their I.D. tags and review the traffic and parking policies.

- **Employee TDM Handbook:** At the beginning of each school year, all Castilleja employees receive an Employee Policy Handbook. The handbook contains a section that describes the TDM rules employees are expected to follow to comply with the TDM related COA's and Mitigation Measures. All employees are encouraged to walk, ride a bike, carpool, take the train, or use the various Castilleja shuttles to campus and abide by all transportation demand programs outlined in the Transportation Section of our Employee Portal and Employee Handbook.

- **Employee TDM Reduction Pledge – Mandatory Participation:** For the 2025-26 school year we are asking all employees to commit to doing one of the following, at least four times a week:

1. Commute by means other than a car (walk, bike, take the train, or use Castilleja van/bus transportation)
2. Carpool with two or more non-family members
3. Park in one of the remote parking lots

Employees who cannot fulfill one of the options above at least four days a week are required to sign up to help with traffic duty on days when they need to park on campus.

- **Employee Transportation Survey:** Employees receive a transportation survey each morning where they are asked a question regarding their mode of transportation for that day. We use this information to monitor TDM compliance and to calculate incentives for using alternative forms of transportation.

- **New Employee TDM Orientation Packet:** As new employees arrive at Castilleja, they are taken through a TDM Orientation Presentation. This presentation covers commuting to campus, preferred transport modes, commuting by car limitations, TDM monitoring and

participation, and the importance of the TDM Requirements.

- **Employee Transit Benefits:** Employees can elect Commuter Transit benefits. Castilleja will provide employees up to $315 a month towards their commute costs when they use public transportation to commute to and from Castilleja at least 4 days a week. Funds are issued through an FSA and spending deemed to be commuter funds would be limited to the purchase of a Clipper Card, or SamTrans or BART passes or transit parking.

- **Employee Incentive Program:** Castilleja actively encourages carpooling and alternative means of transportation to school. Employees earn $2.50 for each day they bike, walk, park remotely, carpool, or take public transportation. Employees must record their daily mode of transportation via a transportation survey through email or text message. We use this data to calculate our TDM incentives and for TDM Plan Reporting.

- **Employee TDM Expense Reimbursement:** Employees are eligible for a $50 annual employee reimbursement to defray the cost of their TDM compliance. The reimbursement covers bike tires, inner tubes, rain boots, helmets, bike gear, bike tune ups, transit costs, walking shoes, or fuel costs for carpool or vanpools.

Monitoring and Reporting

- **Permanent Vehicle Counter Devices:** Castilleja installed permanent vehicle counter devices at the entrances and exits of drop-off locations, surface parking lots, and garages. Castilleja will monitor the number of vehicle trips to and from campus during the peak morning hours.

- **Temporary Vehicle Counter Devices:** From time to time, Castilleja will install temporary vehicle counter devices in the public right of way at locations determined by the City Planning Director.

- **Monitoring Report:** Compiled TDM and travel data will generate a descriptive monitoring report for the City three times for the 2025/2026 school year.

Appendix I: 2025-2026 Transportation and Parking Handbook Section

Transportation and Parking

Traffic reduction is a priority for the School. All members of the School community abide by our Transportation Demand Management (TDM) plan, which is posted on the MS, US, and Parent Portals. Please familiarize yourself with all parking, car registration, and traffic circulation guidelines, and make every effort to reduce your family's transportation impact.

Please note: Castilleja parents/guardians, employees, and students are prohibited from stopping or parking in front of neighbors' houses for any reason at any time except for major events as announced in advance in CastiNews.

Ideas, questions, and comments are welcome. Please email transportation@castilleja.org .

Traffic and Parking Policies

Castilleja's Conditional Use Permit to operate a school in a residential neighborhood requires us to take responsibility for traffic and parking mitigation measures on the streets surrounding the School. Castilleja must be responsible in this regard, and the School has made an agreement with the City of Palo Alto to enforce the following traffic/parking policies. These traffic policies are as important to the School as all other policies; they are policies that students and parents/guardians agree to abide by as part of enrolling at Castilleja.

Those who live within two miles of the School are expected to make every effort to walk or ride a bike to get to campus.

Bicycles

Students are encouraged to ride their bikes to school. Racks for bicycles are provided on campus adjacent to the Joan Z. Lonergan Fitness and Athletic Center and the Arrillaga Family Campus Center; bikes should be locked and parked away from sidewalk areas A map of bicycle routes to campus is available on the Portal.

School Bus and Shuttle Service

Riding the School bus and shuttle is a privilege, and students are expected to conduct themselves in a manner that ensures the safety and comfort of all passengers. The following guidelines must be followed at all times:

- Be Respectful: Treat the bus driver and fellow students with respect. Follow the bus driver's instructions at all times.
- Stay Seated: Remain in your seat while the bus is in motion. Keep the aisles clear of belongings.
- Speak Quietly: Use quiet voices so as not to distract the driver. No shouting, loud talking, or using inappropriate language.
- Keep Hands and Feet to Yourself: Refrain from pushing, shoving, or hitting. Keep your hands, feet, and belongings to yourself and inside the bus.

- No Eating or Drinking: Eating and drinking are not allowed on the bus to ensure cleanliness and safety.
- Respect Property: Do not damage or deface the bus. Do not throw garbage or anything out of the bus. Report any damage to the bus driver immediately.
- Safety First: Follow all safety procedures and emergency protocols as instructed by the bus driver.

Morning School Bus Service

Castilleja provides morning shuttle service to school each morning and return service in the afternoon. Please refer to the transportation portal for updated information and schedules.

Shuttle Service to and from the Train Station

Students taking Caltrain to commute to school will be transported to and from the Palo Alto University Avenue Caltrain Station in school vans in the mornings and after school.

In addition, at the end of the school day there will be five scheduled van runs from Castilleja to the Palo Alto Caltrain Station.

If Calrain's scheduled departure times unexpectedly change, the Castilleja van service will try to accommodate the changes or delays. Each van can seat nine passengers, excluding the driver. If more than nine students sign up to ride on any day, additional vans will be put into service to accommodate all riders.

Van riders can sign up on the Transportation Portal to ride the morning and afternoon Caltrain van shuttles. You can also view the scheduled morning pickup time and the afternoon departure times. For more information, contact transportation@castilleja.org .

Shuttle Service to and from East Palo Alto

Castilleja provides shuttle service for students commuting from East Palo Alto each school day. There are currently three stops, the EPA library, the Boys and Girls Club and University Circle. Each van can seat nine passengers, excluding the driver. If more than nine students sign up to ride on any day, additional vans will be put into service to accommodate all riders. Riders can sign up on the Transportation Portal to ride the morning and afternoon shuttles. You can also view the scheduled morning pick-up time and the afternoon departure times. For more information contact transportation@castilleja.org .

Carpools

Carpooling is the best way to reduce traffic and parking around the School. All carpools (two or more students, including siblings) must use the Employee Parking Lot driveway at Emerson and Kellogg for drop-off and pick-up. The carpool lane is used for dropping off large objects such as boxes, golf bags, etc. The carpool lane is also used for changing drivers at drop-off or pick-up times.

In support of our carpooling efforts, Castilleja is participating in the Casti Carpool Program found on the Transportation Portal.

Drop-Off and Pick-Up

General Drop-Off and Pick-Up

Any car driving to campus must be registered via the Vehicle Registration Form and have a parking sticker affixed to the lower right hand corner of the windshield.

- **Middle School:** Drop-off and pick-up for the Middle School will be on Bryant Street
  - For families with students across both divisions, use Kellogg Street
- **Upper School:** Drop-off and pick-up for the Upper School will be on Kellogg Street
- **Carpools:** Please use the Employee lot, entering on Kellogg Street and exiting on Emerson Street.

No left turns are allowed into or out of the driveways at any time. Please pull into the driveway to allow room for cars to enter behind you. **No queuing is allowed in the street at any time.** If the driveway is full, parents must circle the campus and come through again. **Please follow all traffic monitor instructions.** ***Students with learner's permits may drive through the Carpool Lane.*** **The Carpool Lane is the only location used for changing drivers at drop-off or pick-up times.**

Helpful Reminders

In addition, please observe the following:

- Bryant Street is an official bike route which sees high bike traffic throughout the day. Please drive carefully and look both ways several times before entering Bryant Street.
- Make sure your student is ready to get out of the car quickly by keeping her backpack and personal belongings in the seat next to her, as opposed to the trunk or other difficult-to-access places.
- For your child's safety, do not let children off across the street and have them cross in the middle of the block.
- Stopping in front of neighbors' houses across the street to wait for your student is prohibited.
- **Do not block the street** for any reason at any time. Traffic must be able to flow on Kellogg, Bryant, and Emerson at all times.
- **Do not block the driveways.** If your student is not ready to enter the car, you must pull out of the driveway and drive around the block so that others can circulate through the driveway.
- No double parking is permitted at any time.
- Arrive at school a few minutes earlier in the morning or arrive later in the afternoon when there is less congestion.
- Always be mindful of traffic and be courteous.

Late Pick-Up Safety

- The Bryant Street "Carved/Green Doors" at the semi-circular driveway are locked at 4:00pm. After 4:00pm, parents/guardians must pick up their students at the Kellogg Avenue doors at the Arrillaga Family Campus Center, where students can wait inside the lobby or work in the library. The Kellogg Avenue doors are also locked for entry at 4:00pm, but students may exit when their parents/guardians arrive in the Kellogg Avenue driveway for pick-up.
- At 6:00pm the Arrillaga Family Campus Center is closed and all students should have been picked up from regular school activities.
- Specific pick up information will be provided for afterschool activities that end after 6:00pm.
- Students are instructed not to open locked doors for unknown individuals. Please wear your name badge when on or entering campus.

Vehicle Registration and Parking

Driving a car to school and parking at school are considered privileges, and only seniors may drive to school.

Any senior who drives to school must agree to abide by all the traffic/parking policies or **they will have their privilege of bringing a car to campus revoked.** All students and employees who drive to school and whose license allows are encouraged to carpool with others.

Parking or pickup infractions by parents or students will come to the attention of the division heads, who will manage the associated consequences outlined below in the Traffic/Parking Infractions on Campus section.

All vehicles brought or driven to school by parents and students must be registered through the transportation portal.

- A school-issued parking sticker must be affixed to the lower corner of the passenger-side front windshield of any car parked on or around the School campus.
- A family should register any vehicle that may be driven to campus.
- Students who do not have a parking sticker attached to the windshield may not park in any parking lots or on the school side of the street.

School-associated vehicles, including those driven by parents/guardians and students, must abide by the following parking policies:

- Vehicles may park ONLY in school parking lots and on the school side of the street on the blocks of Bryant, Kellogg, and Emerson which immediately surround the School. Parking is not allowed anywhere else in the neighborhood.
- Vehicles must never block neighbors' or school driveways.
- Vehicles should park close together, leaving minimal space between vehicles.

Traffic/Parking Infractions on Campus

Castilleja considers violations of traffic/parking guidelines to be serious infractions of school policy.

Castilleja has sole discretion in determining what conduct violates its expectations and the appropriate consequences for traffic/parking violations. Generally, the process for traffic/parking infractions for Upper School students and parents is described below, though the school may respond as it deems appropriate under the circumstances, including deciding not to follow all or any of these steps before revoking privileges in situations where Castilleja determines a serious violation occurred.

The process for traffic/parking infractions for Upper School students:

- *First Warning:* The Director of Campus Operations and Compliance will ask the student to correct the traffic/ parking infraction.
- *Second Warning* The Director of Campus Operations and Compliance will ask the student to correct the traffic/ parking infraction and remind them of the school's parking rules. The student will be informed that a third offense will result in escalation to the US Dean of Students.
- *Third Warning* The US Dean of Students will meet with the student and notify their parents/ guardians of the repeated infractions. Together, the US Dean of Students and the student will determine appropriate consequences.
- *Fourth Warning* The US Dean of Students will meet with the student and their parents/ guardians. Senior privileges will be suspended for two weeks, while juniors will be required to attend supervised study hall and may lose their second semester privileges.
- *Fifth Warning* The Head of Upper School will meet with the student and their parents/ guardians to discuss further consequences. Senior privileges will be suspended for the remainder of the semester and juniors will lose their second semester privileges.

The process for traffic/ parking infractions for parents/ guardians:

- *First Warning* The parent/ guardian receives an email explaining drop-off and pick-up procedures and rules.
- *Second Infraction* The parent/ guardian receives a written warning and is notified that the next infraction will come with a fine.
- *Third Infraction*: The parent/ guardian meets with the division head and the parent receives a $50 fine from the school.
