| **Prerequisite(s):** | N/A | | |
| **Course Description:**<br>*Program of Studies* | United States History provides students with an exploration of the issues, events, personalities, and concepts that have shaped our nation from the colonial era to the modern era. The curriculum is based on compelling questions that require students to think critically, analyze, and synthesize information. They will make connections across time periods while investigating issues from multiple perspectives. Recurring themes serve as the foundation of the study. These include the development and refinement of democratic governance, the quest for equality, economic and technological change, effective citizenship, and the changing role of the United States on the world stage. Students will examine pivotal topics such as the American Revolution, the Civil War and Reconstruction, industrialization and the Progressive Era, the Great Depression, World Wars I and II, the Civil Rights Movement, and contemporary issues shaping the United States today. Through the study of these key events, students will gain deeper insight into the people, policies, and movements that have influenced the nation's development. As students explore the larger concepts and themes of United States history, they will continue to develop the intellectual skills of social studies, including critical reading, document analysis, research, and writing skills. | | |
| **Course Essential Questions:** | ● How has the ongoing struggle to define and expand democracy shaped American identity and the evolving rights of its citizens? | | |

| | | |
|---|---|---|
| | • How does America balance economic growth and innovation with social justice and equality, and what role (if any) should the government play in this process?<br>• What challenges and obstacles have different social movements faced in their pursuit of change, and to what extent did the movements achieve their goals?<br>• How does America justify and reconcile global ambitions with its founding principles?<br>• How have patterns of migration and immigration shaped American society, culture, and identity, and what do they reveal about evolving American values regarding opportunity and the environment? | |
| **Course Enduring Understandings:** | • The evolution of American democracy is an ongoing process of expanding rights, participation, and inclusion, driven by the continuous struggle of diverse groups to fully realize the nation's founding ideals.<br>• Economic changes and new technologies have helped America grow, but have also created new problems and inequalities.<br>• American society has been continually reshaped by evolving cultural and intellectual paradigms, driving progress towards greater equality and justice, while challenging and redefining national identity and values.<br>• America's evolving role on the world stage has shaped both its national identity and the international order, reflecting a continuous tension between isolationist tendencies and global leadership.<br>• Patterns of migration and immigration have shaped American society, culture, and identity, leading to a change in American values regarding opportunity and the environment over time. | |

| **Duration:** | ~8-10 weeks |
| **Resource(s):** | McGraw-Hill, *United States History: The Full Survey* |
| **Unit Overview:** | In this unit, students will investigate the foundations of American Identity by examining the political, social, and economic forces that shaped the United States between the 1600s and 1840. They will analyze how perspectives on national identity developed during and after the American Revolution. They will explore the role of slavery and the institutionalization of socio-economic hierarchies in the nation's early laws and founding documents. Students will evaluate the extent to which the Constitution and Bill of Rights reflected the ideals outlined in the Declaration of Independence and consider how democratic principles influenced early acts of dissent and resistance. In addition, students will assess the impact of U.S. expansion policies on Native nations and the broader effects of industrialization and westward expansion on economic growth and global trade. |

| **Duration:** | ~8-10 weeks |
| **Resource(s):** | McGraw-Hill, *United States History: The Full Survey* |
| **Unit Overview:** | Between 1840 and 1920, the United States underwent significant political, economic, and social changes. In this unit, students will examine how individuals and groups sustained, challenged, or sought to reform major American institutions during the Antebellum Period, the Civil War, Reconstruction, and the rise of industrialization. Students will evaluate the causes of secession, the impact of Reconstruction, and the transition from an agricultural to an industrial economy, including its effects on different populations. Students will analyze the rise of nativism, the debates surrounding American imperialism, and the complex factors that shaped immigration, reform movements, and U.S. involvement in World War I and its growing global influence. |

| **Duration:** | ~8-10 weeks |
| **Resource(s):** | McGraw-Hill, *United States History: The Full Survey* |
| **Unit Overview:** | Between 1920 and 1965, the United States underwent major social, political, and global transformations that tested its founding ideals. Students will explore the socio-economic and cultural impacts of the 1920s. Students will investigate the causes and consequences of the Great Depression, analyze the impact of New Deal policies on American society, and examine how economic hardship reshaped the roles of government and citizenship. Students will also explore the rise of nativism, the challenges to civil liberties during wartime, and the contributions of diverse groups during World War II. Students will evaluate how the Cold War and the nuclear age influenced foreign policy, military intervention, and domestic life. Additionally, students will assess how claims of internal threats to democracy fueled civil rights violations and explore the growing movements for civil rights and justice across American society. Through a study of key legislative and judicial actions, students will trace the ongoing struggle to expand, and sometimes restrict, civil liberties and democratic participation. |
