[Dr. Sandoz] Family medicine to me is still the old definition from its inception back in 1970. It was defined as a doctor who could take care of a person, with full, full continuity, whether it be in the emergency setting, the hospital setting or the clinic setting. It's a one doctor who can fill all of those roles. I chose family medicine because in four years of medical school, you learn all forms of medicine. And family medicine allows you to keep that knowledge. Use it and make it a lot better.	Young male doctor with fair complexion and short cropped blonde hair wearing blue scrubs and a white lab coat standing in a modern clinic corridor with computer stations lining the walls between exam rooms Text: Jacob Sandoz, M D Family Medicine Graduate
[Dr. Tse] One of the things I love about being a family medicine resident is the ability to treat patients of all ages. We treat children. We treat pregnant women. We treat grandparents when they're sick and when they're healthy. Everybody is family to us.	Young female doctor with medium complexion and long dark hair, wearing blue scrubs and a white lab coat as she stands in a modern clinic corridor with computer stations lining the walls between exam rooms Text: Amanda Tse, M D Family Medicine Graduate
