Sayville, New York 11782

Re: **Lead Testing in School Drinking Water  
Remedial Action Plan  
2025 Compliance 10 NYCRR Subpart 67-4**

JCB#: **23-56287**

Dear Mr. Castellano:

J.C. Broderick & Associates, Inc. (JCB) was retained to perform lead testing and analysis of the outlets which service the above referenced school district in accordance with 10 NYCRR Subpart 67-4 (Subpart 67-4).

The outlets servicing each of the school buildings were inventoried and assigned unique identification numbers. The use and location of each outlet was reviewed to determine its applicability for testing under Subpart 67-4.

An initial first-draw sample was collected from each applicable outlet after the minimum 8-hour stagnation period. Samples were logged into a chain of custody document and delivered to an Environmental Laboratory Approval Program (ELAP) accredited laboratory for analysis.

Results from the laboratory analysis were compared with the Action Level as defined by Subpart 67-4 of 5 parts per billion (ppb). Any outlet which exceeded this level requires a remediation action plan be implemented (i.e. removal from service, placarding for non-drinking uses). Outlets which did not exceed the action level do not require further testing or remediation.

Please see the following attachments which detail the sampling and analysis performed and remediation actions taken to date.

- Attachment 1: Lead in Water Remediation Plan
- Attachment 2: Outlet Inventory and Lead Testing Results
- Attachment 3: Laboratory Analytical Reports
- Attachment 4: Laboratory Certifications

If you have any questions, or if more information is needed, please contact our office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Erin Todzia', is written above the printed name.

Erin Todzia  
J C Broderick & Associates, Inc.

# Lead in Water Remediation Plan

Section 67-4.4 Response of the New York State Department of Health (NYS DOH) Title 10 of the Official Compilation of the Codes, Rules and Regulations of the State of New York requires:

*If the lead concentration of water at an outlet exceeds the action level, the school shall:*

*(a) prohibit use of the outlet until:*

- (1) a lead remediation plan is implemented to mitigate the lead level of such outlet; and*
- (2) test results indicate that the lead levels are at or below the action level;*

As historical sampling results have indicated, the concentrations of lead are more likely attributable to the individual fixtures and/or their immediately adjoining plumbing, and not with the building-wide plumbing. Based upon this information, the following remedial steps are recommended:

## **Step 1A: Potable Outlets** (Outlets intended to be used for drinking/cooking)

Immediately remove the fixture from service. If necessary, provide an adequate supply of potable water for drinking/cooking to this location at no cost to the occupants. If an outlet is seldomly used or is unnecessary, the district may consider permanent removal of the outlet and capping of its supply line.

## **Step 1B: Non-Potable Outlets** (Outlets not intended for drinking/cooking)

See Step 1A OR Placard the outlet for non-drinking use. Signs must be clearly visible and in close proximity to the affected outlet. Example signage is provided at: [https://www.health.ny.gov/environmental/water/drinking/lead/docs/donotdrinksigns\\_lead .pdf](https://www.health.ny.gov/environmental/water/drinking/lead/docs/donotdrinksigns_lead.pdf).

Do not use for drinking

Hand washing only

## **Step 2: Service & Repair or Outlet Replacement**

The school district's plumber should evaluate the outlet to determine if any components require service or repair. Depending on the extent of service/repair necessary, age of the fixture, and or overall costs, the district may consider replacing the outlet entirely. Any newly installed components shall be certified lead free. (i.e. NSF/ANSI 61, NSF/ANSI-273). If servicing involves installing/replacing a point-of-use filtration system, this filter shall be certified for its lead reduction capability (i.e. NSF/ANSI 53). Follow all manufacturer's instructions for all component installations. OUTLET RESTRICTIONS MUST REMAIN IN PLACE UNTIL SATISFACTORY TEST RESULTS ARE RECEIVED. See Step 3.

## **Step 3: Retesting & Return to Service**

Schedule a retest of the outlet. Outlet restrictions must remain in place until lead testing results at or below the action level are received. Once satisfactory results are received, the outlet may be returned to normal service. Note: It is recommended that "Do Not Drink" signage remain in place for all non-potable and non-applicable outlet types.

(Dig)	For metals analysis, sample was digested.
[2C]	Reported from the second channel in dual column analysis.
DF	Dilution Factor
MDL	Method Detection Limit.
ND	Analyte was NOT DETECTED at or above the detection limit.
NR	Spike/Surrogate showed no recovery.
Q	Qualifier
RL	Reporting Limit
Wet	Sample is not dry weight corrected.

Measurement of uncertainty and any applicable definitions of method modifications are available upon request. Per EPA NLLAP policy, sample results are not blank corrected.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted.

**Notes and Definitions**

<b>Item</b>	<b>Definition</b>
(Dig)	For metals analysis, sample was digested.
[2C]	Reported from the second channel in dual column analysis.
DF	Dilution Factor
MDL	Method Detection Limit.
ND	Analyte was NOT DETECTED at or above the detection limit.
NR	Spike/Surrogate showed no recovery.
Q	Qualifier
RL	Reporting Limit
Wet	Sample is not dry weight corrected.

Measurement of uncertainty and any applicable definitions of method modifications are available upon request. Per EPA NLLAP policy, sample results are not blank corrected.

James Han Laboratory Manager or other approved signatory

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted.

**Notes and Definitions**

<b>Item</b>	<b>Definition</b>
(Dig)	For metals analysis, sample was digested.
[2C]	Reported from the second channel in dual column analysis.
DF	Dilution Factor
MDL	Method Detection Limit.
ND	Analyte was NOT DETECTED at or above the detection limit.
NR	Spike/Surrogate showed no recovery.
Q	Qualifier
RL	Reporting Limit
Wet	Sample is not dry weight corrected.

Measurement of uncertainty and any applicable definitions of method modifications are available upon request. Per EPA NLLAP policy, sample results are not blank corrected.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted.
