Voluntary Student Drug Testing	FNF(R1)

The District's voluntary student drug testing program, established in Policy FNF(Local), is intended to prevent injury, illness, and harm resulting from the use of illegal and performance-enhancing drugs and alcohol; help enforce a drug-free educational environment; deter student use of illegal and performance-enhancing drugs or alcohol; and educate students regarding the harm caused by the use of illegal and performance-enhancing drugs and alcohol.

The program is not meant to be punitive in nature and, therefore, there are no disciplinary consequences associated with positive drug tests. A student may not be punished academically, in extra-curricular activities, or under the Student Code of Conduct because of positive drug test results through this program. Please note, though, that independent violations of the Code of Conduct or expectations in extra-curricular activities (e.g. possession of drugs on campus) may result in disciplinary action and other appropriate consequences.

Student resource officers (SROs), security officers and other law enforcement personnel are not to be involved with the administration of the program.

There are specific roles that the designated Assistant Principal and the designated Counselor play on each campus.

Assistant Principal:

- Receives email from Pinnacle lab 48 hours in advance with the random selection of students to be tested on their campus
- Serves as contact person for Pinnacle Lab when they arrive on campus
- Facilitates getting students to designated testing site on campus
- Available for questions during testing period and address student issues.
- If it is determined by the campus that drug testing cannot take place on the designated day, the Assistant Principal or designee shall contact the Drug and Alcohol Abuse Prevention Coordinator.

Counselor :

- Maintains RSDT records for the campus (receives consent forms, enrolls students into pool through Pinnacle website, secures forms in a binder in office, removes students from campus pool through Pinnacle website if parent revokes consent in writing, student graduates or leaves district
- Serves as the only contact for Pinnacle in the event of a positive drug result of any student on your campus
- Completes SASSI (Substance Abuse Subtle Screening Inventory)
- Schedules meeting with parent and student to address needs, intervene, provide referrals and follow-up
- Transfers consent forms to another campus when student transitions

Each role is distinct and should not be mixed or to others on campus.

Drug test results from this program are strictly confidential and will not be shared with anyone other than the student, student's guardians, and designated District officials who need the information in order to administer the drug-testing program or other legitimate District needs. In most cases, campus administration, teachers, coaches, and other staff will have no knowledge of the drug test results.

The program is strictly voluntary and no employee may require or put undue pressure on a student to participate in the program. Employees will support the student drug testing program by allowing students to leave class for the purpose of being tested and assisting the student in making up any work missed because of the time spent testing.

The drugs to be detected through the voluntary student drug-testing program will be established in conjunction with the contracted lab and reflected in the agreement executed with the lab.
