## Fitness

Pilates is a systematic exercise method designed to stretch, strengthen and balance the body. It was created by German-born Joseph H. Pilates in the early 1900s and brought to the United States in 1926. Practiced on the mat or on apparatus (such as the Reformer, Chair, Towers or Trapeze) with or without props (resistance bands, magic circle, blocks and light weights), it is for *every* body regardless of age and fitness level. Pilates has been proven invaluable not only as a fitness endeavor, but also as an important adjunct to all types of physical rehabilitation and professional sports training. Develop core strength, improve balance, flexibility, joint stability, bone density, coordination and body awareness through this gentle yet invigorating and challenging practice that emphasizes quality of movement over quantity, proper alignment and breath. Classes are held at Essence Pilates in Silver Creek 597 Parkway Drive, Suite C (upstairs) at Wasatch Physical Therapy.

## Splats: Code in Motion

(Grades K - 5)

Join the Movement! Kids code their active games and play them with classmates. This makes computer science collaborative and social. What are the splats? They are programmable and floor buttons that can be used to play games. The splats light up, make sounds, keep score and so much more. Each splat has four feet on the bottom that sense when they are stomped on. Stomping on the splats enables us to create physically active games that get kids out of their seats and moving, making coding accessible to all four learning styles. Each class begins with an engaging activity. Kids then have the opportunity to code their own game using a visual programming language in groups of 3 to 5 children. They then play the game and make any necessary modifications. The good news is that kids do not spend a lot time sitting at a computer. All equipment provided. Cost is \$135.
