

SUBJECT LEARNING JOURNEY

Geography

Curriculum Intent:

We aim to equip all students with the geographical knowledge, skills, and curiosity to understand the complexities of the world around them. Our curriculum empowers students to think critically about place, space, and environment; to understand interactions between physical and human processes; and to consider sustainable futures. Through challenging and engaging topics at both KS3 and KS4, students develop as global citizens, able to evaluate issues, appreciate diverse perspectives, and make informed decisions about the world they live in.

Implementation & Impact

Procedural Knowledge & Assessment

Students develop and apply enquiry skills across KS3 and KS4: describing patterns and processes, using maps and data, conducting fieldwork, interpreting sources, evaluating issues, and justifying conclusions with place-based evidence.

GCSE AOs (AQA 8035):

- **AO1:** Knowledge of places, processes & scales
- **AO2:** Understanding of concepts & interconnections
- **AO3:** Analyse, interpret & evaluate evidence
- **AO4:** Apply skills to investigate & communicate findings

Careers: Lawyer, Ecologist, Volcanologist, Geologist, Meteorologist, Explorer, Environmentalist, Engineer.
