TUFSD RFP 2026-01 New Glycol Feed Equipment for the Hot Water and Chilled Water Systems at Sleepy Hollow Middle and High School

ADDENDUM NO. 4

This Addendum contains clarifications and/or changes to the requirements of the contract and/or proposal specifications. Such clarifications/changes shall be incorporated into the contract/proposal documents and shall apply with the same meaning and force as if they had been included in the original documents. Wherever this Addendum modifies a portion of a paragraph of the contract or any portion of the proposal documents, the remainder of the paragraph affected shall remain in force.

CLARIFICATION

Q2. Please provide the amount of gallons contained in both the heating and cooling systems. The MBH and cooling system tonnage is not enough information for estimating the required amount of glycol.

A2. The exact system volumes are not available. The bid form will be revised to include a unit price for the glycol filling scope including all associated materials and labor (in \$/gallons of pure glycol, not mixture). Contractor will be responsible for temporarily installing a water meter and providing the district with access.

******There is NO formal bid form as this is an RFP. Proposers should clearly price the components and the labor on their proposals.******
