

Quick Tips for Successful Remote Learning

2

Live Lessons

Your teacher will be live with you on Teams to guide you through your lesson. Please remember to keep your camera on and your microphone muted, unless you have a question or are called upon. Let's make this a great learning experience!

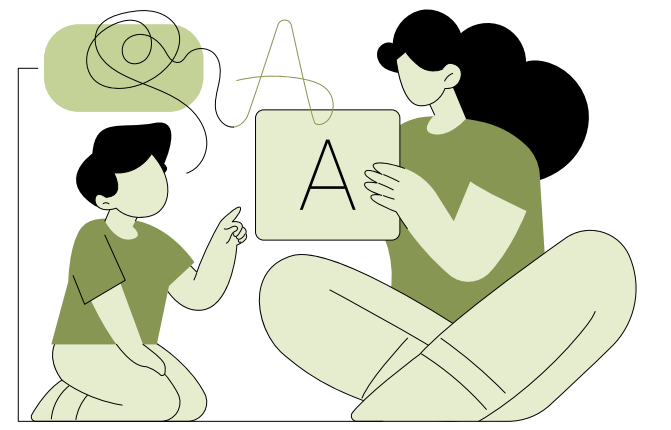

1

2-Hour Delay Schedule

All students will follow their regular 2-hour delay schedule. You can find the updated schedules on our District website: [Moon Area School District](#).

Please remember to charge your school device (iPad or laptop) and have it ready to use! Make sure to log in to your 1st-period, Advisor Base or homeroom class on Teams at your scheduled start time.

3

Participation

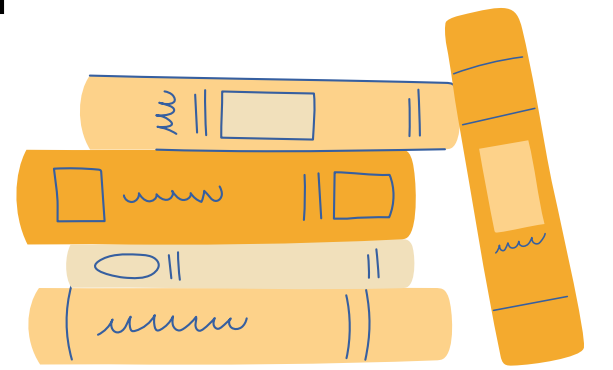

Join in the fun and make the most of your classes! Whether you're answering questions, sharing your thoughts, or cheering on your classmates, your participation matters. Don't be shy—turn on that camera, raise your hand, and let your voice be heard! Let's create an awesome learning experience together!

4

Assignments

Please make sure to complete all assignments as assigned by your teacher. Staying on top of your work helps you succeed!

6

Support for Students

Digital lessons will incorporate modifications and supports from students' individualized education plans (IEPs). After returning from online learning, teachers will review submitted work with students to ensure completion and understanding. Any related services, such as physical or speech therapy, missed during the closure will be rescheduled according to the IEP requirements.
