

THE WATER THIEVES

LED BY
ANDY SOCCODATO

Across four days, students will learn proven tactics to maximize fire flow in both rural drafting scenarios and hydrant-supplied operations. The class builds efficiency, confidence, and functional skills. Designed to ensure students can achieve reliable, high volume water on any scene.

SOME OF THE TOPICS:

- The "Fast Water" process
- Dealing with blocked hydrants
- Tactics for maximizing fire flow
- Challenges of the rural setting
- Proper intake selection

COST: \$675 PER STUDENT

DATE: MAY 12-15, 2026

TIME: 0900 - 1700
