

RFP 26_06 questions

In RFP 26_06 under Scope of Work in the Districts eligible Switch Equipment list, the BOM calls out Qty 8 PWR-C4-950WAC-R. Only Qty 4 PWR-C4-950WAC-R can be quoted as this is the included power supply for each switch. The remaining Qty 4 PWR-C4-950WAC-R would have to be either PWR-C4-950WAC-R/2 or PWR-C4-950WAC-R=. Which is preferred?

The PWR-C4-950WAC-R/2 is an acceptable replacement for the 4 remaining quantities.

RFP doesn't request Optics for the switches. Will district provide the Optics and fiber patch cables for the new switches?

The devices are being ordered as part of a refresh to replace existing gear which has currently operational patch cables and optics. The district has verified compatibility of these optics and patch cables with the requested equipment and requests these items be migrated to the new equipment upon installation.
