Governing Student Success: Arlington Heights School District 25

District 25 Proficiency Over Time (Grades 3 -8)

Illinois Proficiency Over Time (Grades 3-8)

Understanding the Difference Between “Proficiency” and “At Grade Level”

Proficiency is a policy construct that compares a student’s academic achievement to a fixed aspirational standard.

At Grade Level is a normative construct that compares a student’s academic achievement to what is typical at a particular grade level.

Guidance

1. Do not interpret increases in 2025 student proficiency compared to prior years as evidence of improvement.
2. Do not compare student proficiency between grades or subjects.
3. When interpreting proficiency, report a state or national percentile alongside the percent proficient metric for context.
4. When evaluating district, school, or program performance, use student growth, not proficiency. Student growth is the most meaningful school improvement metric.

Guiding Questions to Govern Academic Progress

1. How do we compete?
2. How are we improving?

How does the district compete?

How is the district improving?

A Projected Versus Actual Framework

A Simple and Scientific Approach to Measuring Impact

Statistical Test	Effect Size Thresholds	Impact
Not Significant	Any	Expected 
Significant*	Effect Size is +0.30 or above	Higher than Expected 
	Effect Size from -0.29 to + 0.29	Expected 
	Effect Size from -0.30 to -0.59	Lower than Expected 
	Effect Size is -0.60 or below	Unsatisfactory 

An Action -Oriented Framework

Effect Size	Impact on Student Growth	Actions
Effect Size is +0.30 or above	 Higher than Expected	Scale what is proven to work
Effect Size from -0.29 to + 0.29	 Expected	Improve what can be better
Effect Size from -0.30 to -0.59	 Lower than Expected	Consider re-investing in more proven approaches
Effect Size is -0.60 or below	 Unsatisfactory	Cut or significantly alter approach
