

As required by law, the Board of Education establishes the following wellness policy for the Hillsboro City School District as a part of a comprehensive wellness initiative.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research suggests that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

Schools alone, however, cannot develop in students healthy behaviors and habits with regard to eating and exercise. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

A. With regard to nutrition education, the District shall:

1. Nutrition education shall be included in the Health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
2. Nutrition education posters, such as the Food Pyramid Guide, will be displayed in the cafeteria.
3. The school cafeteria shall serve as a learning lab by allowing students to make choices at mealtime.
4. The District shall provide information to parents that is designed to encourage them to reinforce at home the standards and benchmarks being taught in the classroom.

B. With regard to physical activity, the District shall:

1. Physical Education

- a. The sequential, comprehensive physical education curriculum shall provide students with opportunities to learn, practice, and be assessed on developmentally appropriate knowledge, attitudes, and skills necessary to engage in lifelong, health-enhancing physical activity.
- b. Planned instruction in physical education shall promote participation in physical activity outside the regular school day (i.e. Fuel Up to Play 60)

- c. The physical education curriculum shall provide sequential instruction related to the knowledge, attitudes, and skills necessary to participate in lifelong, health-enhancing physical activity.
- d. On an annual basis, all teachers physical education teachers shall review and affirm receipt of the Ohio Department of Health's concussion information sheet.
- e. Physical Education teachers shall remove from class participation any student who exhibits signs, symptoms, or behaviors consistent with having sustained a concussion or head injury. The Principal and/or teacher shall notify parents or guardians about the possible concussion or head injury.

2. Physical Activity

- a. Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.
- b. Schools shall encourage families to provide physical activity outside the regular school day, such as outdoor play at home, participation in sports sponsored by community agencies or organizations, and in lifelong physical activities like bowling, swimming, or tennis.
- c. The school shall provide information to families to encourage and assist them in their efforts to incorporate physical activity into their children's daily lives (i.e. Fuel Up to Play 60).

C. With regard to other school-based activities :

Free drinking water shall be available to students during designated meal times and may be available throughout the school day.

- 1. The school shall provide attractive, clean environments inside the school buildings, where the students eat.
- 2. Students, parents, and other community members shall have access to the school's outdoor physical activity facilities outside the normal school day. (Dusk to Dawn)
- 3. Schools in our system utilize electronic identification and payment systems, therefore, eliminating any stigma or identification of students eligible to receive free and/or reduced meals.

D. With regard to nutrition promotion, any foods and beverages marketed or promoted to students on the school campus, during the school day, will meet or exceed the USDA Smart Snacks in School nutrition standards.

E.

Additionally, the District shall:

1. encourage students to increase their consumption of healthful foods during the school day;
2. create an environment that reinforces the development of healthy eating habits, including offering healthy foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards.

The District nutrition department will promote and encourage Farm-to-school efforts in order to provide healthy foods.

Rewarding children in the classroom should not involve candy and other foods that can undermine children's diets and health and reinforce unhealthy eating habits. A wide variety of alternative rewards can be used to provide positive reinforcement for children's behavior and academic performance.

Furthermore, with the objectives of enhancing student health and well-being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy 8500, entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages, including but not limited to the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, as well as to the fiscal management of the program.
- B. As set forth in Policy 8531, entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).
The sale of foods of minimal nutritional value in the food service area during the school day is prohibited.
- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.
- D. All foods offered on the school campus during the school day shall comply with the current USDA Dietary Guidelines for Americans, including competitive foods that are available to students a la carte in the dining area, as classroom snacks, from vending machines, for classroom parties, or at holiday celebrations.
- E. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well regardless of unpaid meal balances and without stigma.

The Board designates the Superintendent as the individual charged with operational responsibility for measuring and evaluating the District's implementation and progress under this policy. The Superintendent shall develop administrative guidelines necessary to implement this policy.

The Superintendent shall appoint a District-wide Wellness Committee that meets annually and includes parents, students, representatives of the school food authority, educational staff (including health and physical education teachers), mental health and social services staff, school health professionals, members of the public, and school administrators to oversee development, implementation, evaluation and periodic update of this policy. The Wellness Committee shall be an ad hoc committee with members recruited and appointed annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's Wellness policy;
- C. presentation of the Wellness policy to the Board for approval;
- D. measurement of the implementation of the policy; and
- E. recommendation for the revision of the policy, when necessary.

Before the end of each school year, the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary and/or appropriate. In its review, the Wellness Committee shall consider evidence-based strategies in determining its recommendations.

The Superintendent shall report annually to the Board on the Wellness Committee's progress and on its evaluation of the policy's implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining the policy's goals.

The Superintendent is also responsible for informing the public, including parents, students, and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall post the policy on the District's website, including the Wellness Committee's assessment of the policy's implementation.

The District shall assess the Wellness Policy annually on the extent to which schools in the District are in compliance with the District policy, the extent to which the District policy compares to model wellness policies, and the progress made in attaining the goals of the District Wellness Policy. The assessment shall be made available to the public on the School District's website.
