Helping Students Pave the Road to Life After Graduation

Planning for life after high school doesn't start senior year – it starts now. Broward County Public Schools (BCPS) helps students explore their interests throughout their educational journey and build a strong foundation for college, career and beyond.

Start Early
Elementary and middle school experiences matter. Classes and programs, including those focused on Science, Technology, Engineering and Mathematics (STEM); Advanced Coursework, Debate, and Cambridge and International Baccalaureate opportunities begin as early as elementary grades. By the time students reach high school, they can deepen their learning in these areas or explore new options - all designed to provide structured, hands-on experiences.

No matter the goal – a two- or four-year college degree, a technical certification or a direct entry into the workforce – BCPS offers high-quality options to ignite students' excitement and help them plan for their future.

Save Time and Money Through Dual Enrollment
Dual Enrollment allows students to take college courses, at no cost, to earn both college and high school credits at the same time. It is available at all BCPS high schools, with many offering classes right on campus.

Additional specialized programs include:

- **The College Academy @ Broward College** – Students graduate with a high school diploma and an Associate of Arts (AA) degree. Classes take place at Broward College.
- **Millennium 6-12 College Academy & Pines 6-12 Collegiate Academy** – Begin college-level classes in 9th grade and graduate with both a high school diploma and an AA degree.
- **Early Admission** – Students attend college full-time during their senior year of high school.

Advanced Academics & Scholarships
Students can earn college credits and qualify for a full Florida Bright Futures scholarship (100% tuition paid) through:

- **Advanced Placement (AP)** – College-level courses and exams, plus the AP Capstone Diploma.
- **Cambridge Advanced International Certificate of Education (AICE)** – An internationally recognized program offering college credit and the AICE diploma.
- **International Baccalaureate (IB)** – A globally focused program offering college credit and IB diploma.

Career, Technical, Adult & Community Education (CTACE)
BCPS offers hands-on programs in middle and high schools that lead to industry certifications and high-demand careers. High schools also provide Workforce Dual Enrollment opportunities that allow students to begin earning college credit while still in high school. These pathways build real-world skills, while technical colleges provide credentials and licenses for both students and adult learners.

We are proud to provide multiple pathways for students to achieve their dreams. This is **The BCPS Advantage** – the District where innovation, equity and opportunity come together to empower every learner to reach new heights. To learn more, visit browardschools.com/advanced-academics.
