

BETHEL HIGH SCHOOL CONCURRENT TO HIGH SCHOOL EQUIVALENCIES:

Dual enrollment credit is earned by high school students attending classes with other college students on the college campus. It is also sometimes earned by taking special classes at their high school sanctioned by the college to qualify for credit. When students who have earned dual enrollment credit graduate high school, they also come with a transcript from the college with all of their earned credits. Concurrent enrollment policies should be designed to create as many higher education pathways as possible for students. This chart includes commonly taken college courses and provides the high school unit equivalence. This guidance was created as a collaboration by the Oklahoma State Department of Education and the Oklahoma Regents for Higher Education. The course codes and units earned for high school credit reflect careful consideration of Oklahoma Academic Standards (OAS) and alignment to Oklahoma graduation requirements.
