Marshfield R-1 School District

10-Year Long Range Facilities Plan

Lead ~ Learn ~ Inspire ~ Serve

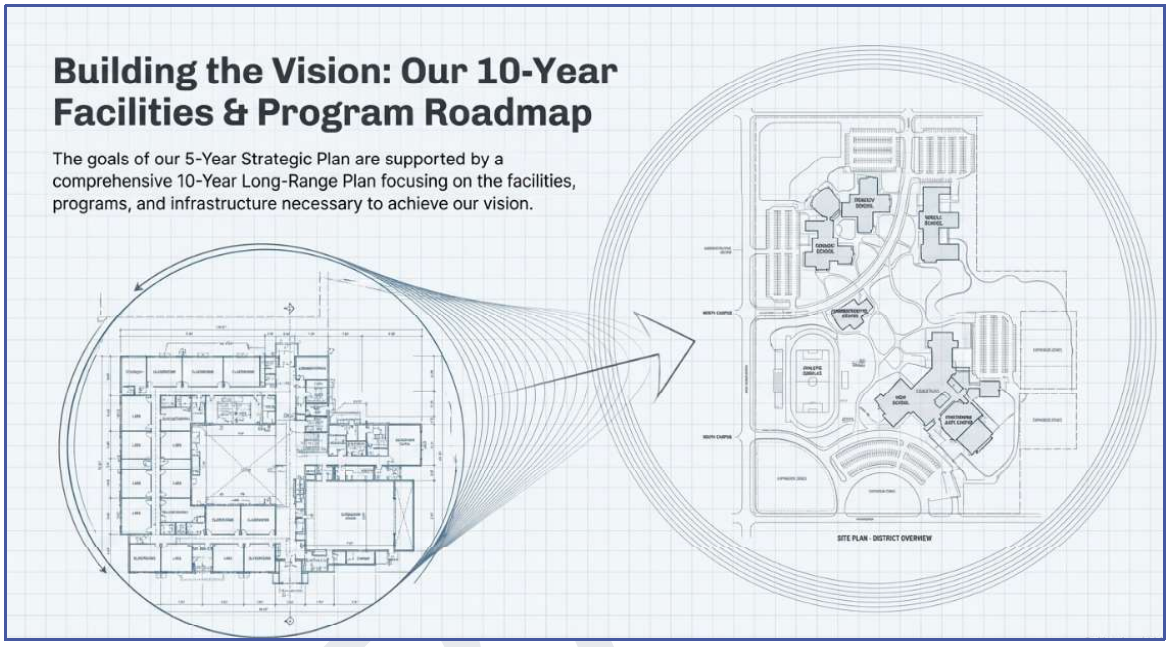
2026-2036

Prepared for the Marshfield R-I Board of Education

DRAFT

Introduction

This long-range plan provides a roadmap for the Marshfield R-I School District from 2026 to 2036. It reflects our district's collective commitment to providing exceptional educational opportunities and preparing students for lifelong success. The purpose of the district's long-range plan is to supplement the district's CSIP and focus on the financial, facilities, and programs aspects of the district for the future.



Mission

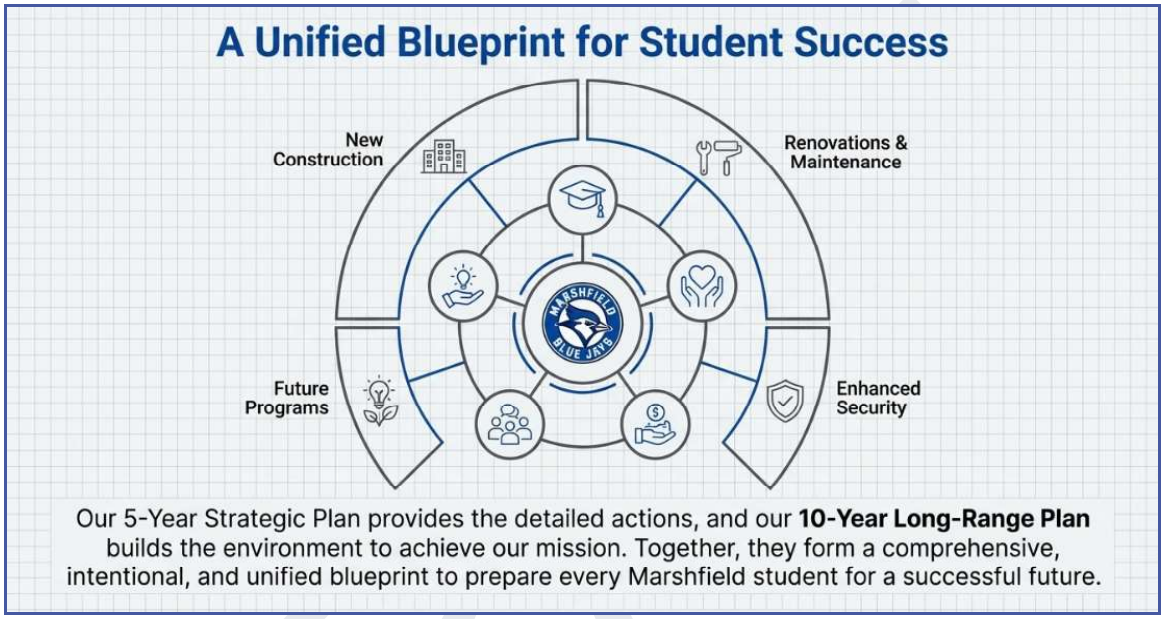
The Marshfield R-1 School District will prepare each student for a successful future.

Vision

A collaborative and innovative school system, united with families and the community in a shared purpose to provide excellence in education for every student.

Strategic Priorities

The district's priorities are organized around six strategic focus areas related to the district's facilities and operation. Each area connects to measurable goals and strategies that build Marshfield's legacy of excellence.



Priority Areas

- New Buildings & Major construction
- District renovations
- District maintenance
- District Security
- New programs/Program expansion
- Other Long-range focuses

Priority Area: New Buildings/Construction

Projects	Description	Reasoning	Possible Funding	Possible Timeline
New Hubble Building	A new elementary building to replace our oldest building in the district.	Hubble Elementary, built in the 1960s, was not built for today's electrical needs. It has many infrastructural needs that need to be improved. There is also a significant traffic issue in our district. Part of the reason for this is due to the proximity of the buildings to one another. Building a new "Hubble" in another site would help traffic flow.	Bond Funds	Year 4–6
Webster & Junior High Multipurpose Space	This would be an open gym type of space for both buildings' students to use.	This space would allow separation of boys/girls for JH. It would increase physical activity during inclement weather and would increase space for after school practices and evening events.		
Football/Track Locker Room	Changing area and bathrooms for Football/Track athletes and coaches.	Currently, this type of space does not exist. It would be ideal to have these types of spaces for our student-athletes at events and during practices.		
Bus Barn	New or renovated bus barn.	Our current bus barn is not big enough to handle our newest bus. Additionally, the district would like to have a lift to work on buses.		
Shook Parking Lot	Additional parking at Shook.	During any Shook event or activity, our current parking is not enough for the building.		
Early Learning Center (ELC) Parking Lot	Additional parking at ELC	During construction, the district did not build all of the designated parking in order to be fiscally responsible with bond dollars. Additional parking would be a welcomed addition.		
Board Room	A space created for board meetings and district meetings.	Currently, the MHS library is used for board meetings. This can create conflicts when the space is being used for other events. Additionally, the space is not ideal for sound, presentation, and seating.		

DRAFT

Working Barn/Ag Addition	A continued expansion of the agriculture department to include a "working" barn to work with animals.	The long-range plan for our agriculture department includes the addition of this component.		
Football/Track Storage	The space under the bleachers has been identified as an area that could be used for a significant amount of storage.	Space will always be a premium for our district. Using the space that already exists for storage.		

Priority Area: Renovations

Projects	Description	Reasoning	Possible Funding	Possible Timeline
MHS Cafeteria Bathrooms	Updated bathrooms in our MHS cafeteria	These bathrooms are our most used bathrooms due to ball games and public events.		Year 1–5
Softball Turf	Artificial turf on the softball field.	This is the last field at the east complex to get a turf upgrade		
ELC Drop Off Covering	A covered area for drop off/pick up.	Our youngest Blue Jays do not have a covered area in bad weather for loading/unloading and need a little more time than just getting in the vehicle.		
Auditorium Lobby	The auditorium lobby is now pushing 25 years old and could use an update.	This is a major area for the public to see. It would be great to have an updated look.		
High School Activity/Event Entrance	A covered and finished space outside of the cafeteria doors.	This is a major public area for people to see on a regular basis.		
Increased changing areas for theater	Larger changing area for theater/music	This space can be a challenge when a production is particularly large.		
Playground Upgrades w/ accessibility	Updated playgrounds with new equipment and improved accessibility	Our playgrounds have not received a major upgrade in awhile. We also have accessibility issues at some of our playgrounds		
Expanded High School Weight Room	Increased square footage in the HS weight room.	HS weights classes are very large and it would be great to have more square footage to allow higher occupation and safer lifting.		

DRAFT

Updated and Refreshed Spaces	Continue to update/improve spaces as the need and funds are available.			

Priority Areas: Maintenance

Projects	Description	Reasoning	Possible Funding	Possible Timeline
High Efficiency Upgrades	Windows, HVAC, General energy efficiencies	Energy efficiency opportunities are a great way to improve operations and save money.	Define performance metrics	Year 1–5
Continued Maintenance	Major maintenance will be roofing, HVAC, asphalt, masonry	The district will continue to respond to maintenance needs as the needs arise and funding allows.		
Webster Infrastructure Upgrade	Improve sewer and water issues at Webster Elementary	There are frequent sewer issues at Webster because of the age of the line (and trees) that has to be cleared.		

Priority Area: Security

Projects	Description	Reasoning	Possible Funding	Possible Timeline
Additional School Resource Officer	3rd district SRO	A 3rd SRO would allow each SRO to have 2 buildings to focus on and provide more evening coverage for events as well.	District	Year 1–3
Alarm Systems	Improve/update building alarm systems			
Security & Surveillance	Improve/update building security & surveillance			
Webster Door Removal	Close in an “extra” door that is in a hallway at Webster.			
New Doors w/ Fobs	Continue to add electronic fobs at more doors throughout the district.			

DRAFT

Priority Area: Programs

Projects	Description	Reasoning	Possible Funding	Possible Timeline
Additional all day Pre-Kindergarten Classes	More all-day PK opportunities	½ day PK makes it a challenge for some families to arrange transportation.		
Career/Tech. Center	Continue to find ways to offer more certification/job-related skills	Career/Tech centers have a tremendous purpose to prepare students for careers not requiring 4 year college degrees.		
Expanded fine arts opportunities	Continue to improve/expand fine arts opportunities throughout the district.			
Magnet school	Continue exploring possibilities to create a magnet school in the district that has a focus area to attract/retain students.	Magnet schools are a way to increase engagement and attract/retain students.		

Other Long-Range Planning Focuses

Projects	Description	Reasoning	Possible Funding	Possible Timeline
Monitor student: teacher ratios				
Monitor space needed				
Extension center/ alt school growth				
Bus dismissal efficiencies				
Drop off/pick up efficiencies				
Continued traffic improvements				
Real-world learning applications
