Dear Timber Creek Regional High School Community:

We are writing to extend our sincere thanks for your patience and understanding regarding the recent unforeseen HVAC mechanical issue in the Timber Creek Regional High School gymnasium. The water damage was caused by a leaking condenser in one of the HVAC units hanging above the gymnasium floor. Please know that the HVAC units will be reviewed and any mechanical issues addressed to increase the probability that this will not happen again.

We fully recognize the significant inconvenience this unexpected disruption caused, especially since it is the second consecutive year that one of the HVAC units has had a failure and caused irreparable damage to the gymnasium floor. The closure of the gymnasium not only displaced our athletic programs, physical education classes, and community events but also created considerable difficulties for coaches, parents, and participants whose schedules rely on the consistent use of this vital facility.

We understand that these last-minute changes to physical education classes, athletic schedules and venue adjustments have been frustrating, and we deeply regret the disruption to our community's routines.

Despite these challenges, the response from our community has been overwhelmingly positive and flexible. Your adaptability, collaboration, and willingness to accommodate temporary alternative arrangements and revised schedules have been invaluable. We will navigate this difficult situation while continuing to prioritize the needs of our students and program participants.

Thank you for your understanding and for demonstrating the resilience that makes our community so strong. We appreciate your continued support of our athletic programs and facilities.

Sincerely,

Dr. Brian Repici
