Subject: Addressing Recent Misinformation About District Curriculum

---

Dear Members of the Montgomery Township School District Community,

I am writing to address recent social media posts that have circulated inaccurate and misleading information about the curriculum at Montgomery High School.

The information being shared online does not accurately reflect the courses the district offers or the content taught in our classrooms. All Montgomery Township School District curricula are aligned with the New Jersey Student Learning Standards and are reviewed regularly to ensure academic rigor, age appropriateness, and transparency. Instruction across all subject areas is focused on building students' knowledge, critical thinking skills, and preparedness for college, careers, and responsible citizenship. To ensure full transparency, our complete K-12 curriculum guides are available for public review on our **District Curriculum Website**.

As a public school district, we are committed to providing a safe, respectful, and supportive learning environment for all students. While we value diverse perspectives and encourage thoughtful discussion, our instructional practices remain grounded in approved standards and established educational goals.

I recognize that misinformation can spread quickly and may raise questions or concerns. I encourage families and community members to rely on official district communications and to reach out directly to school or district administrators with any questions about our programs or instructional practices. We are always available to provide accurate information and engage in open, respectful dialogue.

Thank you for your continued partnership and support of the Montgomery Township School District. Our shared priorities remain providing a safe environment and a high-quality education for all students.

Sincerely,

Mary E. McLoughlin
Superintendent of Schools
