SLP BLAINE | FRIDLEY SPRING LAKE PARK
SPRING LAKE PARK SCHOOLS

Explore Career and College Pathways

Career exploration is an important component of a student's experience at Spring Lake Park Schools. Beginning in high school, students can select courses within three Career Pathways that each align with areas of job growth. Courses provide students an opportunity to gain real-world experience, determine if a career path aligns with their interests, and earn college-level credit.

Students can sample courses in many pathways and/or take all the courses within a single pathway. Pathways courses help students prepare for additional post-secondary education, training or work opportunities after high school.

12x12 **The 12x12 symbol** indicates if college credit is available.

Business and Entrepreneurship

Exposure to marketing, finance, leadership, business management and other sectors.
