

Artificial Intelligence & Language Development

READY, SET, GENERATE!

AI Tools to Supercharge Your Teaching

In this hands-on workshop, participants will explore how artificial intelligence can transform the Language Classroom and will learn to:

- Build interactive language practice opportunities
- Use AI as a thought partner to design universally accessible materials
- Enhance and improve feedback on student work
- Design personalized learning experiences
- Implement AI responsibly in educational settings

This session will include demonstrations of AI tools and provide opportunities to critically examine their use with a focus on protecting student privacy.

Audience

TK-12 educators, instructional leaders and administrators that support:

- World Languages
- Dual Language Immersion
- Designated ELD
- Newcomers
- Artificial Intelligence
