

LHS Course Registration FAQs for 8th Grade Families

Please review our online Course Registration video for comprehensive information about transitioning to Liberty High School

How can I learn more about the classes offered at LHS.

Families can access the Course Catalog on the LHS website. 9th grade students should only select courses from the 9th grade course offering list. The Course Catalog can be found under "Shortcuts" on the homepage. <https://lhs.luhsd.net/>

What Math level should my student sign up for?

In general, most students will take Algebra 1 in their freshman year. If your student is currently taking Algebra 1, their teacher can confirm if they should repeat Algebra 1 or enroll in Geometry. Students should check with their current middle school math teacher to confirm their math placement for next year.

Why is it recommended for freshman to take a Study Hall period? What are the benefits?

Although Study Hall will not earn a student credits, we offer this class to give students a structured setting and time to study, start homework, organize their assignments, prepare for tests etc. It creates a healthy balance of courses for students while they transition to high school and supports student time management with their extracurricular demands outside of school.

My student would like to double up in Math next year or needs a math support period. Is there a process and do I need a recommendation from their current teacher?

Students should talk to their current math teacher for math placement recommendations. Students who want to double up in Math (Algebra 1 and Geometry) or are recommended for a math support class, should use the line next to 'study hall' to identify the additional math class.

My student would like to be enrolled in FFA. How do they get enrolled?

Students interested in our agriculture program (FFA) should request Sustainable Ag Biology as their science class for Freshmen year. Once a student is enrolled in Sustainable Ag Biology, the agriculture teachers will register your student for FFA membership. As an elective option, freshmen are also able to enroll in Ag Mechanics to participate in the FFA program, but it is recommended to have Sustainable Ag Biology as their science class as this will begin this learning in the agriscience pathway.

My student would like to take a class, but we don't see it listed. How do they sign up?

All 9th grade classes are listed on the back of the student course request form. If a specific class is not listed, it is because it is either not a 9th grade class or is not being offered next year. *Exception: Driver's Ed (semester class): Students must be age 15 by August 1st, 2026 to request a Health/Driver's Ed (2700/2830) option for line 5.*

Can my student defer Health to take at a later grade?

Health is accessible to students from grades 9-12. However, because this is mostly a 9th grade class, 10th-12th grade students often feel uncomfortable 'taking a class with all 9th graders' later on. In addition, many 10th-12th grade students find it difficult to 'squeeze' the semester Health class into their schedule once additional class opportunities arise at higher grade levels.

My student plays a sport outside of Liberty, plans to play a Liberty sport or plans to be in Marching Band. Can this count towards their PE graduation requirement next year?

No. Students must take our PE 9 class to satisfy the state's grade 9 PE requirement.

Can students skip ahead and enroll in classes offered to upperclassmen (e.g. Economics)?

Students are not allowed to enroll in courses above their grade level, such as Economics. This is because the sequencing of courses is usually designed to align with the typical progression of students' learning and educational requirements. The courses intended for specific grade levels ensure that students have developed the fundamental skills required to understand the concepts in upperclassmen courses.

How can I learn more about the clubs/activities at Liberty High School?

On the LHS website, we have an Activities tab where families can view the list of clubs and programs available to students.

How can I learn more about athletic programs at Liberty High School?

On the LHS website, we have an Athletics tab where families can view the list of clubs and programs available to students.

My students would like to take a community college course in the summer prior to starting high school.

Students will need to work with their middle schools to complete the community college process for enrolling in a summer course. Courses taken prior to starting with us will not be counted as high school credits. Students who completed a math course at an accredited school/community college can provide us with the official transcript if they would like to advance to the next math level. Students will not be given high school credits for coursework done before starting high school.

How many AP classes can my student take freshman year?

We only offer a limited number of Advanced Placement courses for our incoming freshman. It is important for our freshman to enroll in courses they can handle while acclimating to a new environment and high school expectations.

I would like information regarding transferring into your district.

All information regarding interdistrict transfers can be found here:

<https://www.luhsd.net/departments/administrativestudent-services/inter-district-transfers>

My student is zoned to attend Heritage or Freedom H.S, but we would like to enroll our student at Liberty. What is the process?

All information regarding intradistrict transfers can be found here:

<https://www.luhsd.net/departments/administrativestudent-services/intra-district-transfer-requests>

We are currently enrolled in a private school but are zoned to attend Liberty. Where can I access the information to enroll my student at LHS?

This information is available on the LHS website.

<https://www.luhsd.net/online-enrollment/online-enrollment>
