

NORTHWEST ISD

Facility Naming Recommendation

January 12, 2026

SCHOOL NAMING | POLICY

All school buildings and other District facilities shall be named according to one of the following documented categories:

1. In memory of a **person who has served the District or community**, especially in service to children;
2. In memory of **any person who has made a significant contribution to society and/or education** and his or her name shall lend prestige and status to an institution of learning;
3. A **local residential or geographic area**; or
4. A **District property donor** or his or her family members.

Persons to be so honored by the naming of school buildings and/or facilities shall not be considered while living.

SCHOOL NAMING | COMMITTEE PREFERENCE

In recent years, the Facility Naming Committee has decided to focus primarily on the first criterion for a school or facility name:

In memory of a **person who has served the District or community**, especially in service to children;

We particularly focused on those whose contributions related to education, as we believed we should honor educators who have left a mark in Northwest ISD. As the district continues to grow, committee members want to honor those who have made a positive impact on Northwest ISD.

Most importantly, our goal is to share and honor the **history of Northwest ISD**, especially the **history of supporting children**.

AG. SCIENCE CENTER #2 | BACKGROUND

- **Location:** North Riverside Drive, I-35 & S.H. 170 (Davis High School)
- **Opening:** August 2027
- **Supporting:** Agriculture Students at Davis High School, Eaton High School

RECOMMENDATION | E.C. BROCK

AGRICULTURAL SCIENCE CENTER

E.C. Brock served as a longtime agricultural science and special education teacher in Northwest ISD. For 25 years, he supported district students as well as the local agricultural community. For more than 40 years, he served in the North Texas High School Rodeo Association and helped future rodeo stars get their start in the profession.

Mr. Brock's family has continued to remain active in the agricultural science field and related endeavors, including the NTHSRA.

“

E.C. taught students life lessons plus skills for work. He reached out to all kids, looking for those who were struggling and needed a chance to be acknowledged by an adult. I have worked with hundreds of teachers but never knew another like E.C. Brock. He truly connected and watched out for kids.
