

GRADUATION

IN WICHITA PUBLIC SCHOOLS

Wichita Public Schools' mission is to prepare each student to achieve readiness for life, college and career through an innovative and impactful educational experience. One of three student success outcomes in the 2024–2029 **Every Student Future Ready** strategic plan is to increase academic achievement and graduation rate. Specifically, we will increase our high school graduation rate from 79.2% to 85% by 2029.

Through investment and focus on infrastructure, systems and supports aimed at achieving this goal, WPS is proud to celebrate a 2025 graduation rate of 85.1%!

Additionally, the gains we've made in closing the success gap between many sub-groups of students is noteworthy. Please note that all percentage point changes are in comparison to 2023 graduation rates unless otherwise noted.
