

MISSION STATEMENT

Bethel Public School considers the total student. This requires careful consideration of each child's emotional, physical, intellectual, social and economic well-being. We further encourage the mastery of learning skills through educational opportunities which include: Accessing and processing information, dealing with change, thinking, reasoning and problem solving, developing creativity, and positive human relationship.

The development of each student's positive self-esteem and attitude toward himself and the work which he must learn to function is an important element of education. Students should have educational experiences that will help them to live productive lives. Students will be provided every opportunity possible to learn in a safe environment. Individual differences will be recognized while assuring equity for all. The development of each child's potential shall be the goal of each teacher, administrator, board member and all others concerned with education in the Bethel Public Schools.

Bethel School will continue to actively involve school district patrons in the educational process.
