

CONTRACTOR INSURANCE

This district's liability insurance carrier requires that any firm, company, or individual performing contract work of any kind for the district must possess liability insurance.

Therefore, it is the policy of this district to require proof of insurance before any contract for labor will be executed by the district. In those instances where the need for liability insurance under this policy may not be clear, the superintendent is delegated the authority to make a determination. Occasionally, facts and circumstances may negate the requirement of liability insurance. In that event, the superintendent is delegated the authority to waive the liability insurance requirement. The superintendent will report to the school board at its next meeting any instance in which such delegated authority has been exercised.

The attached Certificate of Insurance will be executed by any entity before any contract is awarded to such entity.

(NOTE: School districts should attach the Certificate of Insurance form provided by their insurance carrier.)

REVIEW NOTE: The existing policy manual does not contain the referenced certificate of insurance form.
