SGC Minutes

Wednesday, 11/19/2025

8:00 am, Counseling Conference Suite

All members are present in person or on TEAMS.

Ms. Cerasoli shared that FCS was highlighting Mr. Rippy's successful Business Partners program. He has developed a highly successful program that has created partnerships that are directly impacting our school and students. He continues to grow these partnerships, and we are appreciative of his ongoing commitments to growing this program.

We discussed all SGC grants applications and voted on funding those initiatives.

Ms. Cerasoli indicated that the previously approved building enhancements were in the process of occurring and will continue as we move forward. The painting of the atrium is complete, and we are doing some trials with some new furniture options that may work well in the atrium for cafeteria guests. Branding for the atrium is on the way as well as signage for each classroom in the building. The signs will have the ability to have the names changed if teachers/staff change rooms.

We are at capacity in the building – rooms are being used by multiple teachers and even after school programs. We discussed the need to respect those spaces and ensure that kids are doing the same when they are in the rooms.

Beyond facility improvements, Mr. Hostetter facilitated a conversation related to what initiatives the SGC wanted to focus on related to student impact. He shared that worldwide public-school enrollment is down - this is not a problem unique to FCS. Families are looking for schools that set themselves apart and have unique offerings that meet the interests of their children. FC does have the COSA program, which allows students to attend schools outside of their zone – if there are open seats. Wilson Creek is not on the list for COSA for the year 2026- 27, but we discussed ways in which we might continue to remain desirable for our community and add value. To that end, SGC approved up to $1,000 per grade level for 2nd semester that will give each grade level an opportunity to have one additional "experience" – grade levels may choose to use this toward an additional field trip, buses, a virtual experience /visit, may pair up with another grade level to provide something unique for their students.

Parents within our school may have professions and talents that would be helpful in "adding" to the Wilson Creek experience. Ms. Forney will refer to a previous MS Form that

was created to ask parents about their professions/unique skills and see if it can be updated to survey the parents of our currently enrolled students.

Ms. Cerasoli shared a presentation and current scheduling information related to the Opt-In Waiver that is available FY2026-27 year. Once allotments for 2026-27 are given, it will be determined if we will use the waiver for scheduling/staffing - we can stay status quo or use the waiver.

Meeting was adjourned at 8:08 am.
