

The APS course list includes all courses that are eligible for APS for 2025 graduates and beyond. If a course is *italicized*, it means the course is no longer an active course. The date in the "inactive dates" column identifies the date when the course became inactive. An inactive course will count for APS as long as the course is taken prior to the inactive date.

---

## APS Course Lists for 2025 Graduates and Beyond

1. There are three types of courses:
  - i. Courses covered by the name of the course in the category referred to as “**APS Course by Subject**” (e.g., Biology, Chemistry)
  - ii. Courses that are equivalent to the courses covered by the name referred to as “**Counts for Subject as an Equivalent Course**” (e.g., Physical Science—Integrated Science 9 1st semester)
  - iii. Courses that are listed as “**additional**” courses because they do not fall under the identified categories or equivalents (e.g., Botany)
2. Each of the three types of courses (APS Course by Subject, Counts for Subject as an Equivalent Course, and Additional) are divided into two groups—“active courses” and “inactive courses.” All of the inactive courses list the dates of when the course became inactive.
3. All courses used for APS for 2025 graduates and beyond must be on the high school transcript, graded, and count towards the student’s GPA. There are exceptions due to extenuating circumstances and students are encouraged to check with their guidance counselor if they have any questions.
4. Please note that not all courses taught under a subject (e.g., English 9, Algebra I, Integrated Science 9, Alaska Studies) meet the rigor of APS.
5. Students may have more than one credit in a specific category (e.g., English 9 and AP Lit & Comp under the World Literature category, or Biology and AP Biology under the Biology category).
6. Option A
  - i. Substitution of an approved “additional” course is limited to one unit of math, two units of science, one unit of language arts, and two units of social studies.
  - ii. This means that for the **math** requirement, students can have up to one credit of courses from the “additional” list and the other three credits have to come from courses under the categories which includes equivalent courses.
  - iii. This means that for the **science** requirement, students can have up to two credits of science from the “additional” list and the other two credits have to come from courses under the categories which includes equivalent courses.
  - iv. This means that for the **language arts** requirement, students can have up to one credit of courses from the “additional” list and the other three credits have to come from courses under the categories which includes equivalent courses.
  - v. This means that for the **social studies** requirement, students can have up to two units of social studies from the “additional” list and the other two credits have to come from courses under the categories which includes equivalent courses.
  - vi. Because ASD requires four units of social studies for graduation, the substitution of fine arts or world language is only used under this option when the one semester of social studies elective used to meet ASD graduation requirements is not an approved APS course.
7. Options B & C
  - i. Except for the "Other" credits, Options B & C have the same requirements.
  - ii. Substitution of an approved “additional” course is limited to one unit of math, science, language arts, or social studies.
  - iii. This means that for the **math** requirement, students can have up to one credit of courses from the “additional” list and the other

The APS course list includes all courses that are eligible for APS for 2025 graduates and beyond. If a course is *italicized*, it means the course is no longer an active course. two credits have to come from courses under the categories which includes equivalent courses.

- iv. This means that for the **science** requirement, students can have up to one credit of courses from the “additional” list and the other two credits have to come from courses under the categories which includes equivalent courses.
  - v. This means that for the **language arts** requirement, students can have up to one credit of courses from the “additional” list and the other three credits have to come from courses under the categories which includes equivalent courses.
  - vi. This means that for the **social studies** requirement, students can have up to one credit of courses from the “additional” list and the other three credits have to come from courses under the categories which includes equivalent courses.
  - vii. For the Option A "Other" credit requirement, both credits have to be in the same language or CTE Pathway. American Sign Language is included as a world language for APS.
  - viii. For the Option B "Other" credit requirement, both credits can count from any Language or CTE Pathway. American Sign Language is included as a world language for APS.

## Anchorage School District

The APS course list includes all courses that are eligible for APS for 2025 graduates and beyond. If a course is *italicized*, it means the course is no longer an active course. The date in the "inactive dates" column identifies the date when the course became inactive. An inactive course will count for APS as long as the course is taken prior to the inactive date.

## Anchorage School District

The APS course list includes all courses that are eligible for APS for 2025 graduates and beyond. If a course is *italicized*, it means the course is no longer an active course. The date in the "inactive dates" column identifies the date when the course became inactive. An inactive course will count for APS as long as the course is taken prior to the inactive date.

## Anchorage School District

The APS course list includes all courses that are eligible for APS for 2025 graduates and beyond. If a course is *italicized*, it means the course is no longer an active course. The date in the "inactive dates" column identifies the date when the course became inactive. An inactive course will count for APS as long as the course is taken prior to the inactive date.
