

TBS Science Fair FAQs

What is the cost to participate in the Science Fair?

There is no cost to participate. Registration is free.

Can my child work with someone?

Students can work either alone or with a partner.

Who can partner with my child?

Any student who is in grade K-3 at TBS can partner with your child.

Where can I get ideas of an appropriate project?

Please refer to resources provided on the Science Fair website.

What should my child bring to the Science Fair?

Students will bring their display boards as well as any other artifacts that tell the story of the child's investigation or invention. Artifacts may include prototypes, models, working models, natural objects, an invention, experimental results, or equipment used.

When should my child bring his or her project to the Science Fair?

Kindergarten and Grade 1 students will bring their projects on Monday, February 23rd at the session time that was indicated in the registration form and set up their display upon arrival. Doors will open at 5:15.

Grades 2 and 3 students will bring their projects on Tuesday, February 24th at the session time that was indicated in the registration form and set up their display upon arrival. Doors will open at 5:15.

Please **do not** have your child bring his or her project to class on the morning of the fair as we have limited space to store projects.

What should I expect during the Science Fair?

The Science Fair will be lowkey and casual. The children will stand near their project and explain it to observers who come by their display. There is no formal presentation required. Children should be able to tell about what they did and learned independently.

Does my child's model have to be a working model?

The model does not need to be a working model as long as students can explain the function of each part. Of course, a working model would be great too! Please note: **no projects with flames, open fire, and/or dangerous chemicals.**

Are there any awards or recognitions?

We will have a ribbon ceremony at the end for all participants. Students will bring their projects home afterward.
