Rahat Khren
Claire Hebert

Agenda

6:00-6:20- Welcome
Circle Up and introductions
Powerpoint presentation on RBHS School Report Card results
CREW - what is happening now? IMPACT, Sophomore field work and Ella Stuff a Stocking

6:20-6:45

Protocol to generate discussion on 4 topics for change projects

I. 4 priorities for SIC for 2025/2026

- A. Address student freedoms not used wisely. This includes supporting students with learning how to study wisely and learn critical thinking.
- Mandatory SLT for freshman
 - Academic probation go to SLT
 - Some supports do exist
 - Teach underclassmen students how to study/organize
 - Collaborate with middle school to dedicate time to teaching how to study
 - Continue with teaching different learning strategies during freshman classes (CREW?)

B. Have more focus on non-traditional professional ideas. This goal is to address the 12% who are not meeting college/career readiness standards.

- Work with businesses to find pipeline to pull in for entry level work
- Community college/trade school fair
- Internships/apprenticeships at local businesses
- Identify who falls in the 12% early
- Support beyond school

C. Find ways to reach all families and students who are slipping through the cracks by also including all learning styles.

- Identify at risk students early
- Families can self report this info
- Teachers reach out well in advance of failure to work with families to prevent
- Communicate a lot and often- with all students and student families

D. Further explaining the importance and difference of Dual Enrollment and AP courses in order to better help students make/understand decisions related to their future paths.

- Counselors and school leaders explaining to students starting freshman year about these classes
- Pamphlet with pros/cons of each
- Parent meeting comparing the two
- Flow chart showing how these work in high school and college
- More clarity and end goal for rising 10th graders
- Extend dual credit to all HS students (Lex/Rich 5)
