Investing in Student Success

By the 2027/28 school year, four school communities will come together to strengthen the success of students as part of the Facility Modernization Plan.

- **A Community Commitment Since 2016** – Washoe County voters approved WC-1, a dedicated 0.54% sales tax that funds new school construction, renovations, and upgrades for students across the district.
- **Facility Modernization Plan (FMP)** – Adopted in 2023, the FMP is a 15-year, district-wide effort to reimagine and transform consistent environments. This plan was built with extensive community input and analysis of all 100+ district schools, many more than 50 years old, focused on efficiency and optimal educational opportunity.
- **Veterans Memorial & Corbett Elementary** – After the 2027-2028 school year, both schools will be closed and begin repurposing into spaces that continue serving the community.
- **Booth Elementary** – By 2027–2028, will be modernized with upgraded classrooms, technology, and collaborative spaces to better support teaching and learning.
- **Echo Loder Elementary** – By 2027–2028, will be reconstructed as a brand-new, state-of-the-art campus designed for 600–750 students, with flexible learning environments that foster creativity and connection.
- **Supporting Our Staff** – WCSD is committed to caring for all employees through these transitions. Educators and staff will continue to have opportunity within the district, ensuring continuity and stability for students and families.
- **Honoring Our Legacy, Building Our Future** – Together, we're honoring our past, strengthening our schools, and building brighter futures for every child in Washoe County.
