

1/9/26

Dear Delaware Valley Families,

As we prepare for our Flexible Instruction Days (FIDs), the district would like to offer families the option for students to use a home device instead of their school issued Chromebook. Please note that on FIDs, students must be able to access their online learning platform, district-approved programs (Google, Schoology etc.), and Zoom links as directed by their teachers. This will require a reliable internet connection and a device capable of running a modern web browser. Please see specific system requirements on the back of this letter.

If you choose to have your child use a home device on an FID, please note:

- Students must have access to the same device for the entire school day. They will be expected to go on and offline, join meetings, complete and submit assignments.
- Students may not share a device with siblings or other family members due to the above expectations.
- Using a home device will reduce the risk of damage, loss or technical issues related to travel.
- The district will have limited ability to provide technical support.

Thank you for your support as we work together to provide an effective learning experience for all Delaware Valley students during our FIDs.

If you would like your child to use a home device, please complete and return the permission section below **by Friday, January 16th, 2026.**

-- I give permission for my child to use a personal/home device for Flexible Instruction Days in place of a school-issued device, and I understand the expectations in this letter. By signing this, I understand my child will not be bringing home their school issued Chromebook for an FID.

Parent/Guardian Name (print): _____

Parent/Guardian Signature: _____

Date: _____

Technology requirements for home devices:

Schoology System Requirements:

iOS: iOS 13 or above
Android: Android 8.0 or above
