

Eden Hall Upper Elementary

Let Learning Take Flight!

Literature Connection

Greetings, EHUE Families,

We are approaching the end of Quarter 2 and we have had a wonderful few months of learning taking flight at Eden Hall! Guided by our school theme, Let Learning Take Flight, our students continue to soar as curious thinkers and problem solvers. Inspired by *Rosie Revere, Engineer* by Andrea Beaty, students embrace challenges with creativity, curiosity, and perseverance, just like Rosie herself. We have so much to celebrate as our journey of learning continues!

RAMS WAY

Our students proudly celebrated their RAMS Way positive behaviors in October during our school-wide assemblies! We recognized top Dojo Point earners, weekly winners, and the biomes with the highest totals. Students and staff also joined in on fun, participating in interactive games that reinforced our RAMS Way expectations. It was a wonderful celebration of teamwork, positivity, and school spirit! Our student H.E.R.D. and Rams Way committees are busy at work planning our next celebration in February! We look forward to our sustainable paper party!

SAFETY

Over the next two months, students will practice the Standard Response Protocol (SRP) for Lockdown drills in the cafeteria so they know what to do in the unlikely event of a safety concern inside the building. Students will practice calmly moving out of sight, staying quiet, and following staff directions until an "All Clear" is announced. The drill will be conducted in a calm, age-appropriate manner and is not meant to be scary. Our goal is to help students feel confident, prepared, and supported.

During the month of October, we celebrated Bus Safety Week! Students were reminded how to demonstrate the RAMS Way while riding the bus, and they showcased their creativity by designing posters for our Bus Safety Poster Contest, all while tying in our Word of the Week!

HOLIDAY PARTIES

Thank you to all of our parent volunteers, as well as the PTO, for organizing Halloween and Winter parties for each grade level. Our students had a blast rotating stations, engaging in games/crafts with their peers and wrapping up 2025 in a positive way!

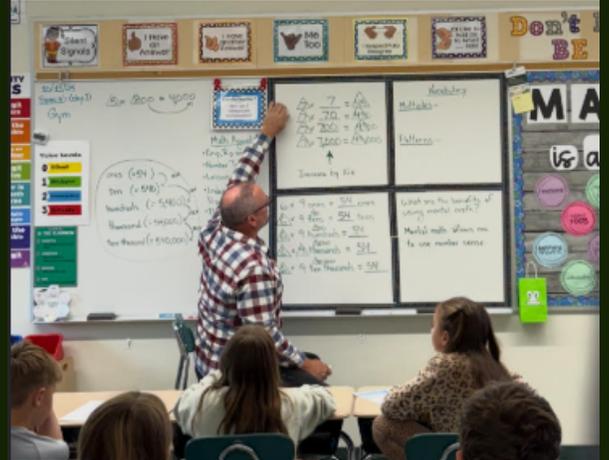

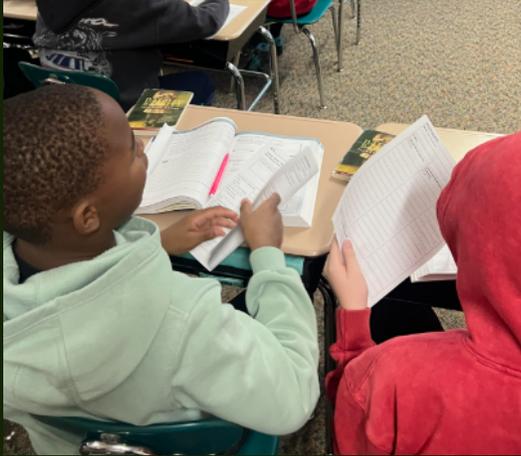

SUSTAINABILITY

Our Sustainability Committee partnered with a subcommittee of the 6th Grade Leadership Council to plan and prepare our Greywater system and Indoor Planting Projects. As a result of this collaboration, our school has implemented a cafeteria recycling program, greywater collection and established a light table where students actively care for and grow plants. In addition, members of the Sustainability Committee have visited classrooms to facilitate planting projects, with student-grown plants later added to the light table. We look forward to continuing our sustainability efforts by partnering with the PTO to plan the Pavilion Project above our outdoor classroom and beautify the grounds of Eden Hall.

CONCERT SEASON

Concert season kicked off in November, and we have loved watching our students take flight in their ensemble performances! Our students and teachers have dedicated countless hours to developing musical skills, learning new pieces, practicing performance techniques, and growing as musicians. We are incredibly proud of our music educators for guiding students to perform with confidence and mastery. Every concert has been truly remarkable, and we eagerly look forward to even more inspiring performances in January!

Students in Grades 4–6 have been actively engaged in developing their Text-Dependent Analysis skills through the PEAL approach, ensuring strong alignment and continuity across Grades 4–8.

Students have been actively building their problem-solving skills by engaging in the 8 Standards for Mathematical Practice, using strategies such as recognizing patterns and structure to make sense and solve problems.

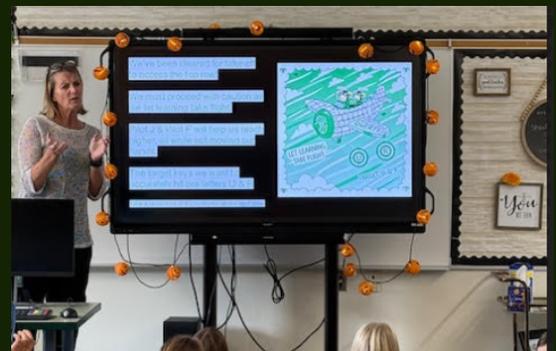

AFJROTC cadets from Pine-Richland High School presented about Veteran’s Day to a Fourth Grade biome!

Mrs. Piroth led a strings ensemble at the PTO meeting, and the students delivered an impressive performance!

Grade 4 recently completed their art unit on terrariums, making a wonderful connection between science and art.

Students have been strengthening their keyboarding skills through touch-typing with a focus on accuracy and proper technique before speed.

Upcoming Events - Our school calendar is available on the Pine-Richland School District website!

January 19 - MLK Day No School
January 21- Grade 4 Band Concert
January 28 - Grade 4 Orchestra Concert
January 30 - PTO Grade 6 Dance
February 3 - We are Music Makers Concert 6-12 Chorus 7:00 PM
February 13 - PTO Valentine's Day Parties
February 16 - No School
February 17 - 20- Random Acts of Kindness Week
February 26 - Grade 4 Battle of the Books
March 2- 6 Read Across America Week
March 4 - Grade 5 Battle of the Books
March 16 - Grade 4 Open House/ Spring Book Fair
March 17 - Grade 5 Open House/ Spring Book Fair
March 18 - Grade 6 Open House / Spring Book Fair

We look forward to another great quarter of learning taking flight!

Mrs. Berezo, Principal

Mr. Rose, Assistant Principal
