

NTI

Day 1

3rd Grade: NTI STANDARDS DAY 1 KENTUCKY ACADEMIC STANDARDS

Reading: RI.3.2 Identify and cite relevant implicit and explicit information from a summary to determine the central idea of a text.

Science: 3-LS2-1. Construct an argument that some animals form groups that help members survive

MATH:

KY.3.OA.1 Interpret and demonstrate products of whole numbers.

3rd grade reading day 1

1. Read the text about giant tortoises.

The Galápagos Islands in the Pacific Ocean are home to the giant tortoise. These tortoises are massive, weighing nearly five hundred pounds. However, giant tortoises do not use much energy.

They often rest for up to sixteen hours a day. And when there is little water, giant tortoises might sleep for weeks at a time. This helps them save energy. Giant tortoises can live up to a year without food or water if they have to!

Life has not always been easy for giant tortoises, though. When people first arrived at the Galápagos Islands hundreds of years ago, they took many of the tortoises away. And some people hunted the tortoises for food and oil. Few tortoises are left on the island today. Luckily, many groups of people are now working to keep these giant animals safe. Hopefully, giant tortoises can roam the islands for many years to come.

When might a giant tortoise sleep for weeks at a time?

when it is cold outside

when the tortoise is growing quickly

when there is not much water

2. Review the text about **giant tortoises**.

The Galápagos Islands in the Pacific Ocean are home to the giant tortoise. These tortoises are massive, weighing nearly five hundred pounds. However, giant tortoises do not use much energy.

They often rest for up to sixteen hours a day. And when there is little water, giant tortoises might sleep for weeks at a time. This helps them save energy. Giant tortoises can live up to a year without food or water if they have to!

Life has not always been easy for giant tortoises, though. When people first arrived at the Galápagos Islands hundreds of years ago, they took many of the tortoises away. And some people hunted the tortoises for food and oil. Few tortoises are left on the island today. Luckily, many groups of people are now working to keep these giant animals safe. Hopefully, giant tortoises can roam the islands for many years to come.

Based on the text, what happened to many of the giant tortoises?

They were kept in zoos on the Galápagos Islands.

They were hunted or taken off the island.

They didn't have enough food to live.
