

NTI

Day 5

3rd Grade: NTI STANDARDS DAY 5 KENTUCKY ACADEMIC STANDARDS

Reading: RI.3.9 Explain the relationship between information from two or more texts on the same theme or topic

Science: 3-LS3-1. Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.

MATH:

KY.3.NBT.2 Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations and/or the relationship between addition and subtraction.

3rd grade reading NTI day 5

1. Read the passage.

Teamwork

In 1925, dogsled teams worked together to save the people of Nome, Alaska. Some children were ill, and doctors feared the sickness would spread. The medicine the children needed was almost seven hundred miles away. It was winter, and the roads were blocked by snow. The only way to get the medicine to Nome was on wooden sleds pulled by dogs. Twenty dogsled teams took part in the journey. Each team ran for several hours before passing the medicine to the next one. The last team was headed by a dog named Balto. After running all night through heavy snow, Balto's team arrived in Nome with the medicine.

What is the main, or central, idea of the passage?

Many dogsled teams worked together to help sick children in Alaska.

Balto's team saved sick children in Alaska.

Sick children in Alaska needed medicine that was far away.

2. Read the passage.

How Does Soap Work?

Everyone uses soap, but not everyone knows how it works. Soap works by helping water wash things. Without soap, water forms drops and runs off skin or clothes, like raindrops on a window. Soap helps to break up the drops. This makes the water spread out thinner and wet the skin or clothing. Soap also helps oil mix with water. Oil and water usually don't mix together easily, but soap can mix with each of them. In this way, it helps pull the oil and dirt off things and into the water. When you rinse the soapy water away, the dirt goes with it.

What is the main, or central, idea of the passage?

Soap and water work together to get things clean.

Soap helps break up water drops.

Soap pieces can be used to make many things.

Subtract within 1,000—Skills Practice

Name: _____

Subtract. Regroup twice if necessary.
