

Last week Friday, we got together in the cafeteria to celebrate our students' perfect attendance, and honor rolls! Congratulation!

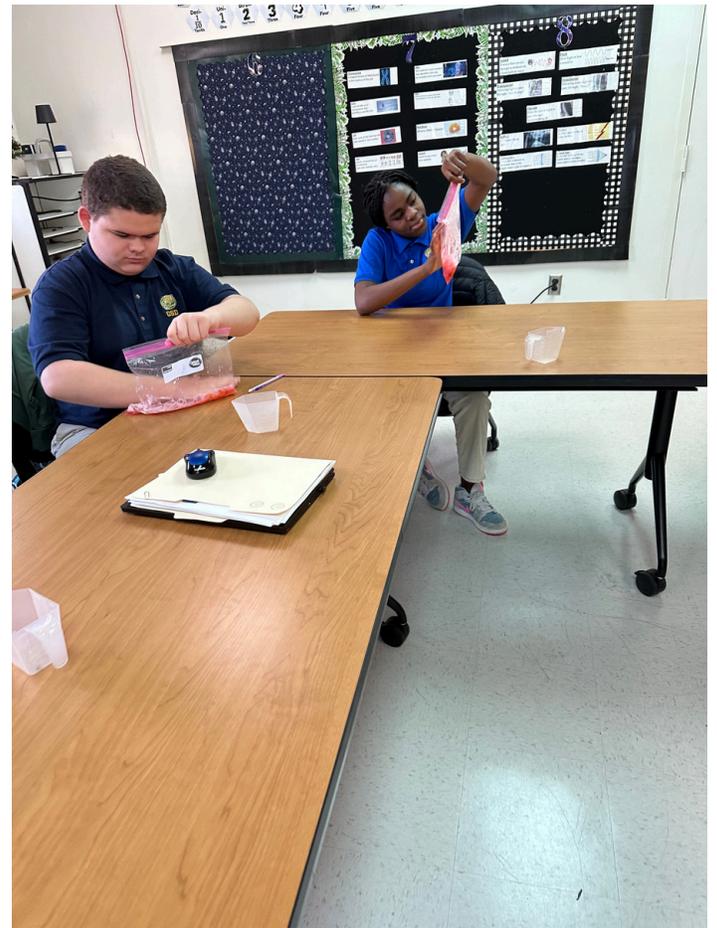

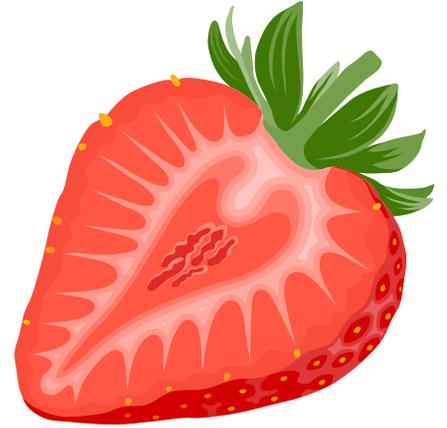

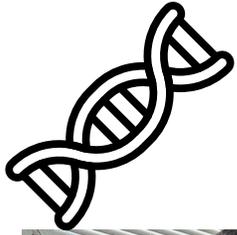

High School Literature and Composition II students were learning about the Renaissance period. As a connecting activity to get them to experience like Michelangelo painting the Sistine Chapel in that time period, they created their own drawings lying down. Here are some pictures of the activity and completed art work by Jose and Itzel!

Our middle schoolers in their science class, they smashed their strawberries to get the DNA out of it. They got to see the DNA on the screen from the strawberry. Woah! So cool.

The NTID/RIT National Math Competition is an academic event open to middle school deaf and hard-of-hearing students who enjoy mathematics. Each year, the competition begins with four regional contests, culminating in a national championship hosted by RIT/NTID. Up to 25 teams in each region compete in a fast-paced environment, answering a variety of challenging math questions. GSD will participate in the Southeast Regional Competition on January 23–25, 2026, at the Atlanta Area School for the Deaf. Following the regional events, the top four teams from each region will earn an all-expenses-paid trip to RIT/NTID to compete in the National Math Competition, scheduled for March 27–29, 2026. Please join us in wishing our Middle School Math Team the best of luck. Go Tigers!
