

Maryland Report Card Information for CCPS Site

The Maryland Report Card summarizes how a school performed on the Maryland Accountability System. The results reflect school performance in multiple areas, including: Academic Achievement, Academic Progress (for elementary and middle schools), School Quality and Student Success, as well as Graduation Rates and College and Career Readiness (for high schools).

These results are an important snapshot of how a school is performing. They show areas where a school is doing well, and illuminate those where a school needs to improve. The information provided on the Report Card is displayed in a way that makes it easy to understand a school's performance. Additionally, the performance of a school's student groups are also available. You can find the School Report Card, and much more information, at the Maryland Report Card website, <https://reportcard.msde.maryland.gov/>. The Report Card is available in six languages.

At each school's Report Card page, there is navigation bar.

At A Glance	Report Card	Demographics	MCAP	Civil Rights Data Collection
-------------	--------------------	--------------	------	------------------------------

On the **Report Card** page, users can view the data used to construct the Report Card and the percent of available points earned on each Indicator (e.g., Academic Achievement). There is a link called **Report Card Details** that allows users to view performance data for specific Student Groups. The **Equity** link allows users to compare the performance of students in a particular student group to students not of that group. The **Similar Schools** link allows users to compare a school's performance to schools with similar demographics.

On the **Demographics** page, there are links for **Enrollment** to view enrollment by grade, gender, and race/ethnicity, **Attendance** to view attendance rates for all student groups and chronic absenteeism rates, **Student Group Populations** to view enrollment data for all student groups, **Mobility** to view mobility, entrant and withdrawal rates for all student groups, and **Educator Qualifications** to view the number and percent of experienced and out-of-field teachers. The **Per-Pupil Expenditures** link will allow users to view this data.

On the **MCAP** page, users can view the state testing performance for ELA, Math, Science, and English Language Proficiency. Results can be filtered by year, test, gender, special services, and race/ethnicity.

While the final score on the Report Card does not tell the whole story, we hope the Maryland School Report Card will add to our community discussions about how to constantly improve our schools. The data on the Report Card is both informative and empowering and will help us ask questions, find answers, make decisions, and act. We hope you will view the Maryland School Report Card as a tool to become more involved in Cecil County Public Schools.

Directions on accessing a school's Maryland Report Card are included here.

To visit the Maryland Report Card site, visit: <http://reportcard.msde.maryland.gov/>

In the **View District Data** tile, select Cecil County.

In the **View Your School Report Card** tile, select your child's school in the dropdown menu. You will be directed to the school's Report Card page.
