Change your Gmail profile picture

You can choose a photo to set as your Gmail picture. This image shows up when someone sees your name in their email inbox or chat list. Please use a high quality headshot of yourself.

1. On your computer, open Gmail.
2. In the top right, click Settings > Settings.
3. In the "My Picture" section, click Change picture.
4. Select or upload a new picture.
5. Select the portion of the photo you want to show.
6. Click Apply changes.

If you added a photo or image from Google Drive, you'll need to share your image publicly for it to appear in your signature. Note: If you use Gmail with your work or school account, ask your administrator to let you share images publicly.

Search for an image, like your company logo, then get the image URL.

Add your own image to Google and use that URL.
