Grimsley High School Registration Information

Dear Whirlies,

Please read this entire document. It contains important information about registration!

This year, due to the change to Infinite Campus, students will not have access to select courses prior to meeting with a counselor. This is a significant change from previous years. As in the past, each student will individually meet with their counselor to select courses. It is essential that students come to this meeting prepared with an idea of the courses they plan to take. Before your meeting, be sure to review your current courses, workload, and grades to make an informed decision about next year's.

Students do not need to schedule an appointment with their counselor to select courses for the 2026-2027 school year. Each student will be assigned a time to meet with their counselor during their English class. During their individual meeting, students will select and confirm their courses with their counselor. If a student is absent on their scheduled day, your counselor will reach out to you individually to reschedule the appointment.

Due to recent funding cuts within the district, the number of online course enrollments available during both the summer session and the regular school year, in addition to zero period offerings, will be limited. As a result, access to these courses will be prioritized for students whose graduation requirements **cannot be met within the traditional school-day schedule** or who have specific, documented program needs that require online coursework. This approach is intended to ensure that limited resources are allocated to students with the greatest academic necessity. **Additionally, abbreviated schedules will be limited, and online classes will not be used to facilitate or accommodate shortened school-day schedules.**

Additionally, from March 28 - April 12, students and parents will be able to review and approve their course selections in Infinite Campus through Parent Portal. Families will not have the ability to change course selections during this window, but families will need to click if they approve of the selections or not. If families have questions regarding course selections during this time, you may contact your counselor by email. If you need any assistance with creating your Parent Portal, please email our Data Manager, Ms. Calhoun (calhour@gcsnc.com), and she will be happy to assist you.
