Dual Distance Learning

Dual Distance Learning (DDL) sections provide a designated time in students' daily schedules to complete an **online Dual Enrollment course** through the University of Memphis. Online courses allow HHS students to participate in college courses that would not otherwise be available, while also providing a strong foundation for virtual learning and establishing strong time management skills.

- Students will use Canvas through their UofM account to complete coursework. Course content will appear on the first official day of the university semester. Students are responsible for activating their Canvas accounts before the university semester begins.
- Grades for DDL courses will not be entered into PowerSchool until the end of the semester. Students will need to monitor their grades in Canvas to ensure they are successfully completing the course.
- DDL courses will follow the university's instructional calendar and students may be responsible for completing assignments during times when HHS is not in session.
- Students are responsible for keeping up with their coursework. If they have questions about the course, the course instructor will be their best source of information. If a student continues to struggle in a DDL course, please reach out to the HHS EPSO Coordinator or the student's grade-level counselor.
- All students should read the course syllabus on the first day of class to ensure they understand the expectations for the course.

DDL Courses Offered

- Dual Enrollment American Government
- Dual Enrollment Criminal Justice
- Dual Enrollment Introduction to Music
- Dual Enrollment Principles of Nutrition
- Dual Enrollment Personal Financial Management
- Dual Enrollment Sport Medical Terminology
- **Dual Enrollment Artificial Intelligence Literacy (AIFA 1000)
- **Dual Enrollment Artificial Intelligence Skills and Techniques (AIFA 1000-M5)

These two courses count for 6 of the 12 credit hours required for the new ***AI for All* minor from the University of Memphis, which launched in Fall 2025. Additional electives will be available during the 2027–2028 school year, allowing students to complete the full minor.

Why Choose the AI for All Minor?

Stand Out in the Job Market

- Gain a competitive edge with AI-enhanced problem-solving skills
- Access new career opportunities in AI-driven industries
- Prepare for leadership roles by understanding AI's impact on the future of work

AI Skills Employers Demand

- Hands-on experience with machine learning and generative AI tools
- Learn to apply AI ethically and responsibly across industries

Real-World Applications for Any Major

- Tailored coursework allows students to apply AI to their specific career interests
- Opportunities for interdisciplinary collaboration to solve real-world problems
